Company News and Notes

The management framework presented in this study addresses the demand for water in Asia caused by rapid population growth and economic development. It focuses on three key actions to meet the challenge: - evaluate how the region manages water resources - identify guidelines for the Bank's water resource programs - develop country-specific strategies and promote joint programs Reforms built into the framework seek to modernize institutions that affect water resources. The authors suggest ways to improve planning and long-term management, streamline economic and financial policy, and upgrade real-time management, operation and maintenance. A general strategy for future World Bank lending and involvement is described. It features a comprehensive approach toward dealing with water resource issues. This approach calls for international and interprovincial basin agreements, makes institutional reform a condition for lending, and promotes integrated water planning and management in borrower countries. Policy guidelines for regional and country activities are also discussed.

For ten years Gillis's The Car Book has been a top authoritative consumer resource for buying and living with a new car. He tells readers not only what to look for, but also what to look out for. Includes how to get the most for one's money, showroom strategies, the price/performance conflict, insurance costs, safety records, maintenance, resale value, choosing options, and more.

Kiplinger's Personal Finance

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
