“Brave, honest, and necessary.”—Nancy Pearl, NPR Seattle Kayla Williams is one of the 15 percent of the U.S. Army that is female, and she is a great storyteller. With a voice that is “funny, frank and full of gritty details” (New York Daily News), she tells of enlisting under Clinton; of learning Arabic; of the sense of duty that fractured her relationships; of being surrounded by bravery and bigotry, sexism and fear; of seeing 9/11 on Al-Jazeera; and of knowing she would be going to war. With a passion that makes her memoir “nearly impossible to put down” (Buffalo News) Williams shares the powerful gamut of her experiences in Iraq, from caring for a wounded civilian to aiming a rifle at a child. Angry at the bureaucracy and the conflicting messages of today’s military, Williams offers us “a raw, unadulterated look at war” (San Antonio Express News) and at the U.S. Army. And she gives us a woman’s story of empowerment and self-discovery.

## **MONEY Master the Game**

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

FISHING FOR FAIRNESS develops an explicitly cultural perspective on environmental politics in the Philippines by analysing the responses of fishers to marine resource regulations. In the resource frontier of the Calamianes Islands, fishing, conservation and tourism provide the context where competing visions of how to engage with marine resources are played out. The book draws on data from ethnographic fieldwork with fishers, government and NGO officials, fish traders and tourism operators to show how the strategic responses of fishers to management initiatives are couched within particular cultural idioms. Tapping into broader notions of morality in the Philippines, fishers express a discourse that emphasises their poverty and the obligations of the wealthy to treat them with fairness. By deploying this discourse, fishers are able to reframe what are--on the surface--questions of environmental management into issues about poverty within particular social relationships. By using a cultural political ecology framework to analyse fishers' responses to regulation, the book emphasises the distinctive ways in which marginalised people in the Philippines resist and reframe resource management initiatives. FISHING FOR FAIRNESS will appeal to both academics and policy makers interested in marine resource management, political ecology, anthropology and development studies particularly throughout the Asia-Pacific.

## **When I Fall**

Given the wide-ranging implications for global competition, domestic political systems and daily life, US policymakers must prepare for the impacts of new artificial intelligence (AI)-related technologies. Anticipating AI's impacts on the global order requires US policy makers' awareness of certain key aspects of the AI-related technologies--and how those technologies will interact with the rapidly changing global system of human societies. One area that has received little in-depth examination to date is how AI-related technologies could affect countries' domestic political systems--whether authoritarian, liberal

democratic, or a hybrid of the two--and how they might impact global competition between different regimes. This work highlights several key areas where AI-related technologies have clear implications for globally integrated strategic planning and requirements.

Meet Blackwater USA, the private army that the US government has quietly hired to operate in international war zones and on American soil. Its contacts run from military and intelligence agencies to the upper echelons of the White House; it has a military base, a fleet of aircraft and 20,000 troops, but since September 2007 the firm has been hit by a series of scandals that, far from damaging the company, have led to an unprecedented period of expansion. This revised and updated edition includes Scahill's continued investigative work into one of the outrages of our time: the privatisation of war.

## **Quality Control in Fact-Finding**

This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, "hate speech" and "fake news" will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies. Instead of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as *Dit opslag er blevet fjernet - techgiganter & ytringsfrihed*. Praise for 'Your Post has been Removed' "From my perspective both as a politician and as private book collector, this is the most important non-fiction book of the 21st Century. It should be disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future." Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe "This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential

strategies for restoring individual control over information flows to and about us. Policymakers worldwide should take heed!" Nadine Strossen, Professor, New York Law School. "Futurist Juan Enriquez and scientist Steve Gullans conduct a sweeping tour of how humans are changing the course of evolution for all species--sometimes intentionally, sometimes not. For example: What if life forms are limited only by the bounds of our imagination? Are designer babies and pets, de-extinction, even entirely newspecies fair game?; As humans, animals, and plants become ever more resistant to disease and aging, what will become the leading causes of death?; Man-machine interfaces may allow humans to live much longer. What will happen when we transfer parts of our 'selves' into clones, into stored cells and machines? Though these harbingers of change are deeply unsettling, the authors argue we are also in an epoch of tremendous opportunity. Future humans, perhaps a more diverse, resilient, gentler, and intelligent species, may become better caretakers of the planet--but only if we make the right choices now."--Provided by publisher.

## **The Glass Castle**

This book discusses how fact-finding mechanisms for alleged violations of international human rights, humanitarian and criminal law can be improved. There has been a significant increase in the use of international, internationalised and domestic fact-finding mechanisms since 1992, including by the United Nations human rights system, international commissions of inquiry, truth and reconciliation commissions, and NGOs. They are analysed and assessed in detail by 19 authors under the common theme 'Quality Control in Fact-Finding'. The authors include Richard J. Goldstone, Martin

Scheinin, LIU Daqun, Charles Garraway, David Re, Simon De Smet, FAN Yuwen, Isabelle Lassée, WU Xiaodan, Dan Saxon, Chris Mahony, Dov Jacobs, Catherine Harwood, Lyal S. Sunga, Wolfgang Kaleck, Carolijn Terwindt, Iliia Utmelidze and Marina Aksenova. Serge Brammertz has written the Preface, and LING Yan a Foreword. The book emphasises quality awareness and improvement in non-criminal justice fact-work. This quality control approach recognises, inter alia, the importance of leadership in fact-finding mechanisms, the responsibility of individual fact-finders to continuously professionalise, and the need for fact-finders to be mandate-centred. It is an approach that invites the consideration of how the quality of every functional aspect of fact-finding can be improved, including work processes to identify, locate, obtain, verify, analyse, corroborate, summarise, synthesise, structure, organise, present, and disseminate facts. The book also considers regulatory approaches to enhance quality and professionalisation.

Inside the most controversial issue in sports Traumatic brain injury in football is not incidental, but an inevitable and central aspect of the sport. Starting in high school, through college, and into the NFL, young players face repeated head trauma, and those sustained injuries create lifelong cognitive and functional difficulties. Muchnick's Concussion Inc. blog exposed the decades-long cover-up of scientific research into sports concussions and the ongoing denial to radically reform football in North America. This compilation from Muchnick's no-holds-barred investigative website reveals the complete head injury story as it developed, from the doctor who played fast and loose with the facts about the efficacy of the state-mandated concussion management system for high school football players, to highly touted solutions that are more self-serving cottage industry than of any genuine benefit. Known for extensive reporting on the tragic story of the Chris Benoit murder-suicide, Muchnick turns his investigative analysis to traumatic brain injury and probes deep into the corporate, government, and media corruption that has enabled the \$10-billion-a-year National Football League to trigger a public health crisis.

## **The Current Digest of the Post-Soviet Press**

In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. His name was Christopher Johnson McCandless. He had given \$25,000 in savings to charity, abandoned his car

and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page. From the Trade Paperback edition.

## **Your Money: The Missing Manual**

"Katch has done the impossible: he makes socialism sexy . . . eye-opening, inspiring, and funny . . . this book might turn you into a closet socialist" (Judah Friedlander, actor and comedian). Opinion polls show that many people in the United States prefer socialism to capitalism. But after being declared dead and buried for decades, socialism has come to mean little more than something vaguely less cruel and stupid than what we have now. That's not exactly going to inspire millions to storm the barricades. Danny Katch brings together the two great Marxist traditions of Karl and Groucho to provide an entertaining and insightful introduction to what the socialist tradition has to say about democracy, economics, and the potential of human beings to be something more than being bomb-dropping, planet-destroying racist fools. "The most

hilarious book about socialism since Karl Marx and his brother Harpo wrote their joke book.” —Hari Kondabolu, filmmaker and comedian “If The Communist Manifesto and America’s Funniest Home Videos had a baby, it would be Danny Katch’s new book. It’s a hilarious and fun way to think about what’s wrong with our world, how it could be different, and how we might get there. Keep an extra copy of Socialism . . . Seriously in your bag and hand it to the next person who asks you what socialism is all about; as long as that person is not your boss . . . seriously.” —Brian Jones, actor, educator, and activist “A lighthearted, easy read that packs an intro course on socialism into a short volume. With jokes that made me laugh out loud, and a lot of heart. Socialism is for lovers. Indeed.” —Sarah Jaffe, Belabored podcast host

## **Rebellious Mourning**

"This intimate, moving, and timely collection of essays points the way to a world in which the burden of grief is shared, and pain is reconfigured into a powerful force for social change and collective healing." —Astra Taylor, author *The People's Platform* "A primary message here is that from tears comes the resolve for the struggle ahead." —Ron Jacobs, author of *Daydream Sunset* "Rebellious Mourning uncovers the destruction of life that capitalist development leaves in its trail. But it is also witness to the power of grief as a catalyst to collective resistance." —Silvia Federici, author of *Caliban and the Witch* We can bear almost anything when it is worked through collectively. Grief is generally thought of as something personal and insular, but when we publicly share loss and pain, we lessen the power of the forces that debilitate us, while at the same time building the humane social practices that alleviate suffering and improve quality of life for everyone. Addressing

tragedies from Fukushima to Palestine, incarceration to eviction, AIDS crises to border crossings, and racism to rape, the intimate yet tenacious writing in this volume shows that mourning can pry open spaces of contestation and reconstruction, empathy and solidarity. With contributions from Claudia Rankine, Sarah Schulman, David Wojnarowicz, Leanne Betasamosake Simpson, David Gilbert, and nineteen others. Cindy Milstein is the author of *Anarchism and Its Aspirations*, co-author of *Paths toward Utopia: Graphic Explorations of Everyday Anarchism*, and editor of the anthology *Taking Sides: Revolutionary Solidarity and the Poverty of Liberalism*.

## **Unbroken**

Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had

envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

### **Law for Business and Personal Use**

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security,

nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
