There have been plenty of books published about Italian motorcycles, and a few covering the café racer genre, but none has covered the evolution of the Italian sportsbike into the Italian café racer – until now. Coming from a nation with a great motorcycle racing heritage, Italian motorcycles have, unsurprisingly, always had a sporting flair. This book lifts the lid on the growing trend of custom Italian café conversions, illustrated in detail with stunning images of select sporting, racing, and café'd Italian motorcycles. Italian Café Racers celebrates stunning Italian bikes from all over the globe. From the old to the modern, from horizontal-singles to inline sixes, this book reveals these stylish machines in all their innovative glory. Whether you're an enthusiast, a follower of the café racer culture, or simply appreciate beautiful bikes, this book is guaranteed to interest and inspire ... see the 'café'd' side of Italian bikes.

The most comprehensive guide to aircraft powerplants—fully updated for the latest advances This authoritative textbook contains all the information you need to learn to master the operation and maintenance of aircraft engines and achieve FAA Powerplant certification. The book offers clear explanations of all engine components, mechanics, and technologies. This ninth edition has been thoroughly revised to include the most current and critical topics. Brand-new sections explain the latest engine models, diesel engines, alternative fuels, pressure ratios, and reciprocating and turbofan engines. Hundreds of detailed diagrams and photos illustrate each topic. Aircraft Powerplants, Ninth Edition covers:

- Aircraft powerplant classification and progress
- Reciprocating-engine construction and nomenclature
- Internal-combustion engine theory and performance
- Lubricants and lubricating systems
- Induction systems, superchargers, and turbochargers
- Cooling and exhaust systems
- Basic fuel systems and carburetors
- Fuel injection systems
- Reciprocating-engine ignition

and starting systems • Operation, inspection, maintenance, and troubleshooting of reciprocating engines • Reciprocating engine overhaul practices • Principal parts, construction, types, and nomenclature of gas-turbine engines • Gas-turbine engine theory and jet propulsion principles • Turbine-engine lubricants and lubricating systems • Ignition and starting systems of gas-turbine engines • Turbofan, turboprop, and turboshaft engines • Gas-turbine operation, inspection, troubleshooting, maintenance, and overhaul • Propeller theory, nomenclature, and operation • Turbopropellers and control systems • Propeller installation, inspection, and maintenance • Engine indicating, warning, and control systems
