The importance of discrete and combinatorial mathematics continues to increase as the range of applications to computer science, electrical engineering, and the biological sciences grows dramatically. Providing a ready reference for practitioners in the field, the Handbook of Discrete and Combinatorial Mathematics, Second Edition presents additional material on Google's matrix, random graphs, geometric graphs, computational topology, and other key topics. New chapters highlight essential background information on bioinformatics and computational geometry. Each chapter includes a glossary, definitions, facts,

examples, algorithms, major applications, and references.

Walls Built On Sand

This book offers a detailed insight into the desire for, and consequences of, precise communications in the daily life of contemporary architectural practice through close readings of constructed architectural details by Sigurd Lewerentz, Caruso St John Architects, Mies van der Rohe and OMA. In the professionalised context of the contemporary architectural profession, precise communications - drawings, specifications, letters, faxes and emails - are charged with the complex task of translating architectural intent into a neutral and quantifiable language which is expected to guarantee an exact match between the architects' intentions and the constructed result. Yet, as any architectural practitioner will know, it is doubtful whether the construction of any architectural project may ever exactly match all written and drawn predictions. This book challenges claims to certainty which have been attributed to such communications from the mid-nineteenth century onwards, and critiques ongoing expectations of certainty in contemporary architectural production.

Development of Adult Thinking is a timely synthesis and evaluation of the current knowledge and emerging issues relating to adult cognitive development and learning. Focusing on psychological and educational cutting-edge research as well as giving an overview of the key theorists such as Piaget and Kohlberg, Kallio and the team of expert contributors offer a holistic view on the development of adult thinking, representing perspectives from developmental, moral, and social psychology, as well as education and philosophy. These topics are divided into three sections: Adult cognitive and moral development, Perspectives of adult learning, and Open questions and new approaches, offering introduction, analysis, and directions for future research. This text is essential reading for students and researchers in developmental psychology and related courses as well as adult educators and teachers working in adult education.

This best-seller continues to provide driving licence candidates with a thorough grounding in everything they need to know to prepare for their learner's licence and K53 driving tests. The text has been revised and updated to take account of changes in road traffic legislation and the practical requirements for the official K53 Defensive Driving system. This well-presented, user-friendly book combines all the elements needed to pass the written tests, yard test and road tests for motor vehicles, motorcycles and heavy motor vehicles, and is the only manual that illustrates every rule of the road. Now also includes a handy loose insert that contains information about the official computerised test questions. Taken together, the text, illustrations and self-tests are designed to reinforce the learning process and make it easier to pass the learner's or driver's test first time.

The Law of Third-party Compensation

An internationally bestselling comic novel in which a man—with the help of a bunny—suddenly realizes what’s important in life “Escapism at its best . . . Just pure fun.” —NPR.org “Which of us has not had that wonderfully seditious idea: to play hooky for a while from life as we know it?” With these words from his foreword, Pico Iyer puts his finger on the exhilaratingly anarchic appeal of *The Year of the Hare*, a novel in the bestselling tradition of *Watership Down*, *Jonathan Livingston Seagull*, and *Life of Pi*. While out on assignment, a journalist hits a hare with his car. This small incident becomes life-changing: he decides to quit his job, leave his wife, sell his possessions, and spend a year wandering the wilds of Finland—with the bunny as his boon companion. What ensues is a series of comic misadventures, as everywhere they go—whether chased up a tree by dogs, or to a formal state dinner, or in pursuit of a bear across the Finnish border with Russia—they leave mayhem (and laughter!) in their wake.

When used in tandem, systematic reviews and meta-analysis-- two distinct but highly compatible approaches to research synthesis-- form a powerful, scientific approach to analyzing previous studies. But to see their full potential, a social work researcher must be versed in the foundational processes underlying them. This pocket guide to Systematic Reviews and Meta-Analysis illuminates precisely that practical groundwork. In clear, step-by-step terms, the authors explain how to format topics, locate and screen studies, extract and assess data, pool effect sizes, determine bias, and interpret the results, showing readers how to combine reviewing and meta-analysis correctly and effectively. Each chapter contains vivid social work examples and concludes with a concise summary and notes on further reading, while the book's glossary and handy checklists and sample search and data extraction forms maximize the book's usefulness. Highlighting the concepts necessary to understand, critique, and conduct research synthesis, this brief and highly readable introduction is a terrific resource for students and researchers alike.

To most people, Emmett Conn is a confused old World War I veteran, fading in and out of senility. But in his mind, Emmett is haunted by events he'd long forgotten. In his dreams, he's a gendarme, a soldier marching Armenians out of Turkey. He commits unspeakable acts. Yet he feels compelled to spare one remarkable

woman: Araxie, the girl with the piercing eyes-one green, one blue. As the past and present bleed together in *The Gendarme*, Emmett Conn sets out on one final journey to find Araxie and beg forgiveness, before it's too late. With uncompromising vision and boundless compassion, Mark Mustian has written a transcendent meditation on the power of memory-and the dangers of forgetting who we are and have been.

In most regions of the world, road transport is the predominant channel of international trade traffic. Yet the agreements used by states to regulate international road transport services often lack transparency. This study sheds light on such agreements and identifies potential focus areas for reform.

This is a book about the men and women who police contemporary South Africa. Drawing on rich, original ethnographical data, it considers how officers make sense

of their jobs and how they find meaning in their duties. It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo-liberalising regimes such as South Africa can be traced to the day-to-day experiences and ambitions of the average police officer. It is about the stories they tell themselves about themselves and their social worlds, and how these shape the order they produce through their work. By focusing on police officers, this book positions the individual in primacy over the organisation, asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts. It acknowledges but downplays the importance of police culture in determining officers' attitudes and behaviour, and reminds readers that most officers' lives are entangled in, and shaped by a range of social, political and cultural forces. It suggests that a job in the South African Police Service (SAPS) is primarily just that: a job. Most officers join the organisation after other dreams have slipped beyond reach, their presence in the Service being almost accidental. But once employed, they re-write their self-narratives and enact carefully choreographed performances to ease managerial and public pressure, and to rationalize their coercive practices. In an era where 'evidence' and 'what works' reigns supreme, and where 'cop culture' is often deemed a primary socializing force, this book emphasises how officers' personal histories, ambitions, and vulnerabilities remain central to how policing unfolds on the street.

Handbook of Discrete and Combinatorial Mathematics, Second Edition

The practice of hatha yoga, as we commonly know it, is but one of eight branches of the body of knowledge that is yoga. In fact, yoga is a sophisticated system of self-empowerment that is capable of harnessing and activating inner energies in such a way that your body and mind function at their optimal capacity. It is a means to create inner situations exactly the way you want them, turning you into the architect of your own joy. A yogi lives life in this expansive state, and in this transformative book Sadhguru tells the story of his own awakening, from a boy with an unusual affinity for the natural world to a young daredevil who crossed the

Indian continent on his motorcycle. He relates the moment of his enlightenment on a mountaintop in southern India, where time stood still and he emerged radically changed. Today, as the founder of Isha, an organization devoted to humanitarian causes, he lights the path for millions. The term guru, he notes, means "dispeller of darkness, someone who opens the door for you As a guru, I have no doctrine to teach, no philosophy to impart, no belief to propagate. And that is because the only solution for all the ills that plague humanity is self-transformation. Self-transformation means that nothing of the old remains. It is a dimensional shift in the way you perceive and experience life."
