This book covers the principles, concepts, techniques and practical tools of financial accounting in supporting overall business decisions. Using a comprehensive theoretical framework, this book is enhanced by practical examples, exercises, chapter summaries and complex cases in each of the eleven chapters. With the International Financial Reporting Standards (IFRS) and their specific Conceptual Framework as the baseline approach, this book also highlights Romanian regulation and practice specifically. Despite the globalisation efforts, this book demonstrates that there are still discrepancies and cultural challenges and will be of interest to students and academics of financial accounting.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
