Iron Age

This book analyzes the effect of political and economic forces on the ideas and values disseminated to the general public by schools, movies, radio, and television. The author shows how similar and conflicting political and economic pressures influence education, movies, and broadcasting. The book provides an understanding of how ideas are shaped in American society by the interplay between government power, private enterprise, and organized advocacy groups. The story is complex with many different and conflicting strands. In a broad sense, it is the story of the public education of the American people. The book does not attempt to measure the actual effect of various media, but it does show what was intended for the education of the public mind by forces that shaped and continue to shape the content of schools, movies, and broadcasting.

The field of the theology of mission has developed variously across Christian traditions in the last century. Pentecostal scholars and missiologists also have made their share of contributions to this area. This book brings the insights of pentecostal theologian Amos Yong to the discussion. It delineates the major features of what will be argued as central to a viable vision and praxis for Christian mission in a postmodern, post-Christendom, post-Enlightenment, post-Western, and postcolonial world. What emerges will be a distinctively pentecostally- and

evangelically-informed missiological theology, one rooted in the Christian salvation-history narrative of Incarnation and Pentecost that is yet open to the world in its many and various cultural, ethnic, religious, and disciplinary discourses and realities. The argument unfolds through dialogical engagements with the work of others, concrete case studies, and systematic theological reflection. Yong's pneumatological and missiological imagination proffers a model for Christian theology of mission suitable for the twenty-first-century global and pluralistic context even as it exemplifies how a missiological understanding of theology itself unfolds amidst engagements with contemporary ecclesial practices and academic/theological impulses.
