A CREATIVE, FUN, AND EFFECTIVE WAY TO LEARN HUMAN ANATOMY More than 200 illustrations If you're looking for an interesting and innovative way to learn the various parts and systems of the human body, your search ends here! Anatomy Coloring Book for Health Professions is a fresh, fun way for students to grasp the big picture of human anatomy through a regional approach (head and neck and limbs). Anatomy Coloring Book for Health Professions is designed for the most effective learning possible: The left-hand page features a numerated structure list

The right-hand page has illustrations correlating to the numerated structure list. Simply choose a color and shade in a term on the left and the correlated structure on the right. Repeat for each structure in the list. White space is provided to enable you to transfer anatomy and clinical information from your lecture notes to the appropriate illustration or term. After an illustration is fully colored and notes have been transferred you will have created your own personalized textbook specific to your anatomy course! You will find that coloring imprints on your mind the shape and location of each body part, making later visualization much easier. The connection between eye and hand when coloring anatomic structures will prove to be an active and effective way to learn human anatomy.

Anatomy and Physiology Coloring Book

This innovative new resource covers basic body systems, beginning with the skin and ending with the reproductive system. The illustrations have been created

specifically for this book, and each features a simplicity of scope and format that is perfect for introductory anatomy and physiology courses. To ensure that students approach each figure correctly, all pages contain a brief statement describing the body system and directions for completion. From there, the student can color each body part and identify them by name using the labeled leader lines. Original, simple illustrations make coloring and body part identification easy. The basic scope ensures that students will not be overwhelmed with information that is not needed for their course. Perforated pages facilitate classroom study and review, and provide flexibility to both the instructor and the student. Each figure is backed by a blank page so students can make notes regarding any given body part without interfering with the illustration. The corresponding answer key located in the back of the book provides a quick reference for the student to check accuracy and spelling. A pronunciation guide, listed after the answer key, has been created to ensure students pronounce medical terms with accuracy and confidence. A real value for students needing to purchase required texts.
