Amy Bovaird suffers from Retinitis Pigmentosa, a hereditary eye disease that progressively steals her vision. Unwilling to accept that she is truly losing her eyesight, Amy resists when the Bureau of Blindness schedules a mobility specialist to train her to use a white cane. Mobility Matters: Stepping Out in Faith chronicles a partnership between Bovaird and her blind instructor as she begins to navigate using a whole new system of "seeing." Will her faith prove strong enough to allow her to move forward and accept herself as she is?

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Song Sheets to Software is about learning and teaching music through new, stimulating, and accessible means -- computers and the Internet. A landmark resource for anyone who wants to know more about music, the book is divided into five chapters. Chapter 1 is a detailed history of songs sheets, covering early American religious, folk and popular music in print, as well as songs in musicals, silent films, talkies, radio and records. Chapter 2 covers print music royalties, copyright laws, formats and terms, while the last three chapters consist of annotated listings of 600+ music software titles, 6,000+ music-related web sites for musicians, and Internet tech terms.

The Threads of Reading

How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The Threads of Reading addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers.
