Efficient design management solutions for today's new challenges Design Management: Process and Information Issues is a collection of papers presented at the 13th International Conference on Engineering Design in Glasgow, Scotland. One of four volumes,

this book highlights the newest developments in design management and the solutions that facilitate innovation. Focused on common challenges within the design process, these papers provide insight gleaned from current and ongoing work to help design and engineering teams meet the increasing demands of the modern product development environment.

I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Tom Cotter is the best-known barn-find collector-car expert working today. Tom Cotter's Best Barn-Find Collector Car Tales pulls together his best barn find stories from America and around the globe. Tom Cotter bought his first barn find some 50 years ago and has never looked back. Over the proceeding decades, he has continued to unearth automotive gems, some of which reside in his garage and others found just for the pleasure of the hunt. Tom's passion for automotive archaeology has made him a nexus for other barn finders, whose stories he has collected for more than 20 years. He's further expanded the scope of his passion as host for The Barn Find Hunter, a Hagertys-sponsored webcast with over 20 episodes now available. Tom Cotter's Best Barn-Find Collector Car Tales pulls together the very best stories from Cotter's previous books and adds several new tales, all of which are presented in this handsome hardcover edition. From Shelby Cobras, to classic Duesenbergs, to Harley hoards and lost supercars, Cotter brings to light the most amazing, outrageous, and unexpected finds he and his barn-finding brethren have discovered.
