Buying Guide 2003

Whether readers are looking to purchase a new computer or upgrade current systems, this guide can help make the right choice for both needs and budgets. It covers printers, monitors, hard drives, modems and more.

The Career Guide

Consumer Reports Buying Guide 2005

More than a decade ago, Clayton Christensen's breakthrough book *The Innovator's Dilemma* illustrated how disruptive innovations drive industry transformation and market creation. Christensen's research demonstrated how growth-seeking incumbents must develop the capability to deflect disruptive attacks and seize disruptive opportunities. In *The Innovator's Guide to Growth*, Scott Anthony, Mark Johnson, Joseph Sinfield, and Elizabeth Altman take the subject to the next level: implementation. The authors explain how to create this crucial capability for unlocking disruption's transformational power. With a foreword by Christensen, this book provides a set of market-proven tools and approaches to innovation that have been honed through fieldwork with innovative companies like Procter & Gamble, Johnson & Johnson, Pepsi, Intel, Motorola, SAP, and Cisco Systems. The book shows you how to: Follow a market-proven process -- so your company can reliably create blockbuster businesses Create structures, systems, and metrics -- so the disruptive innovations that will power your firm's future growth

receive the funding and personnel needed to succeed
Create a common language of disruptive innovation --
so managers can reach consensus around
counterintuitive courses of action Incisive and
practical, this book helps your company take the
steps necessary to benefit from disruption -- instead
of being eclipsed by it.

Offers advice to Seniors on health, housing, helpful products, services and hotlines, and best ways to travel, shop, and socialize

Non-Communicable Disease Prevention: Best Buys, Wasted Buys and Contestable Buys

Non-communicable diseases (NCDs) are the leading cause of death worldwide, contributing to over 73% of all deaths annually. Each day NCDs cause more than 100,000 deaths, 80% of which occur in low- and middle-income countries. NCDs, however, are largely preventable, and a great deal of technical knowledge exists about how to prevent and manage them. Why, then, have we, as a global community, not been more successful at reducing this NCD burden? Does a universal problem not have a universal solution? Created by an international consortium of experts, this informative and accessible book provides practical guidelines, key learning points, and dynamic, real-world case studies to aid NCD program managers, policy officers and decision-makers in low- and middle-income countries, so that they can assess interventions for the prevention and control of NCDs. The book was commissioned by the Prince Mahidol Award Conference (PMAC), an annual international conference centred on policy of global significance

related to public health. *Non-Communicable Disease Prevention: Best Buys, Wasted Buys and Contestable Buys* emphasises the importance of context in NCD control and prevention, arguing that the success of an intervention lies in an ability to respond to local needs and environments. The book comprises ten chapters, which collectively explore the reasons behind, and strategies for, preventing and managing the NCD burden. It spans key themes such as political economy, the transferability of economic evidence, the role of cross-sectoral policies, the importance of deliberative processes, and health technology assessment. This book is written for the benefit of the global health community, and is primarily targeted at those individuals who are involved in NCD programs. This book will also be of interest to NCD champions, policy advocates, and educators spearheading the movement for increased visibility of NCDs.
