The #1 New York Times–bestselling humorist’s tribute to car travel is “a ride worth taking, even for readers who don’t know an oil pan from a frying pan” (The Washington Times). From a veteran of both Car and Driver and National Lampoon magazines, this hilarious book chronicles the golden age of the automobile in America—and takes us on a whirlwind tour of the world’s most scenic and bumpiest roads in trouble-laden cross-country treks, from a 1978 Florida-to-California escapade in a 1956 special four-door Buick sedan, to a thousand-mile effort across Mexico in the Baja 1000 in 1983, to a journey through Kyrgyzstan in 2006 on the back of a Soviet army surplus six-wheel-drive truck. For longtime fans of the celebrated humorist, the collection features a host of O’Rourke’s classic pieces on driving, including “How to Drive Fast on Drugs While Getting Your Wing-Wang Squeezed and Not Spill Your Drink,” about the potential misdeeds one might perform in the front (and back) seat of an automobile; “The Rolling Organ Donors Motorcycle Club,” which chronicles a seven-hundred-mile weekend trip through Michigan and Indiana that O’Rourke took on a Harley-Davidson; his brilliant and funny piece from Rolling Stone on NASCAR and its peculiar culture recorded during an alcohol-fueled weekend in Charlotte, North Carolina, in 1977; and an hilarious account of a ride from Islamabad to Calcutta in Land Rover’s new Discovery Trek. “Never in neutral, O’Rourke offers laughter on wheels.” —Publishers Weekly “An insightful look not just at the American love affair with cars, but also at one man’s changing outlook on life, all of it fast-paced and over the top . . . Even readers who know nothing about cars and motorcycles will appreciate the joy and hilarity of this book.” —Booklist

Statistics and Probability for Engineering Applications provides a complete discussion of all the major topics typically covered in a college engineering statistics course. This textbook minimizes the derivations and mathematical theory, focusing instead on the information and techniques most needed and used in engineering applications. It is filled with practical techniques directly applicable on the job. Written by an experienced industry engineer and statistics professor, this book makes learning statistical methods easier for today's student. This book can be read sequentially like a normal textbook, but it is designed to be used as a handbook, pointing the reader to the topics and sections pertinent to a particular type of statistical problem. Each new concept is clearly and briefly described, whenever possible by relating it to previous topics. Then the student is given carefully chosen examples to deepen understanding of the basic ideas and how they are applied in engineering. The examples and case studies are taken from real-world engineering problems and use real data. A number of practice problems are provided for each section, with answers in the back for selected problems. This book will appeal to engineers in the entire engineering spectrum (electronics/electrical, mechanical, chemical, and civil engineering); engineering students and students taking computer science/computer engineering graduate courses; scientists needing to use applied statistical methods; and engineering technicians and technologists. \* Filled with practical techniques directly applicable on the job \* Contains hundreds of solved problems and case studies, using real data sets \* Avoids unnecessary theory

This fully revised and corrected edition of the International Classification of Primary Care 2e (ICPC-2) is indispensable for anyone wishing to use the international classification system for classification of morbidity data in a primary care setting. The concept of ICPC-2 has not been changed but the main body of the actual classification (chapter 10) has been completely revised to reflect the adequate use for an individual patient record and for research purposes. This now brings the printed version of ICPC-2 completely in-line with the electronic version previously only available through the Oxford Website for the journal Family Practice. ICPC-2 is patient-oriented rather than disease or provider-oriented. It encompasses both the patient's reason for encounter and the patient's problem. ICPC-2 is extensively used internationally and includes a detailed conversion system for linking the ICPC and ICD-10 codes published by WHO, additional inclusion criteria, and cross-referencing rubrics. ICPC-2 It has been developed based on the recognition that building the appropriate primary care systems to allow the assessment and implementation of health care priorities is possible only if the right information is available to health care planners.

The Complete Book of BMW is a master work. The word 'definitive' is a bold claim but this book should be viewed in this light. It is the most comprehensive survey of BMW Group models from the 501 right up to this year's 1 and 6 Series published in the English language. Data tables covering specifications, production volumes and prices will be invaluable to the BMW enthusiast and the layout and production volumes are second to none. Tony Lewin deserves high praise for this outstanding book. - Chris Willows, Corporate Communications Director, BMW Great Britain BMW is the most remarkable phenomenon to hit the auto industry in a generation. Celebrated for its luxury sports cars, motorcycles and aero engines in the pre-war era, it squandered its glamorous heritage in the 1950s; on its knees and near-bankrupt, it was rejected as a lost cause when offered by desperate banks to Mercedes-Benz. But thanks to a wealthy German aristocrat, a brilliant engineer and a young and inspirational manager, Mercedes would soon regret not having scooped up the once-glorious firm: pioneering the concept of the compact, high-quality sports saloon, the visionary new team systematically built BMW into the spectacular success we know today. Through the most expressive medium of all - the cars themselves - The Complete Book of BMW tells the story of one of the most remarkable turnarounds of the century.
