Dream Year

Sometimes the past is best left buried Meredith King longs for escape. Life in Deer Run is stifling, the Amish town too small for a modern woman staying just to care for her ailing mother. When a friend enlists her help in clearing the name of an Amish boy whose decades-old death is still shrouded in mystery,

she welcomes the distraction. But when a ghost from her own past reappears, there is suddenly a lot more at stake. Zach Randal was always a bad boy, and their romance never had a chance. As charming as ever, he returns to town on the heels of a deadly new threat. Is Zach as dangerous as Meredith was always led to believe? Or is the attraction they both feel the only thing that can save them from harm?

Flying with Kids

If you're reading this, you may be dreading an upcoming flight with your young child or thinking about taking one, but aren't sure you can handle it. I completely understand, but have no fear. Long haul flights were routine for us as we spent 7 years as expatriates. When my daughter was born in Hong Kong (7500 miles away from our families in California), we obviously had to fly her home for visits. I had anxiety about this for years before I was pregnant and I thought about canceling our first long haul flight trip multiple times. My newborn baby was fussier than most, had major acid reflux, I had to fly alone with her, and our journey was 24 hours door to door. We were just fine, in the end. With preparation, you will be, too. Since then, I've flown long haul and domestically with my daughter more times than I can count. I now enjoy the adventure with her, but getting to this point was not without challenges. I bought tons of useless gear and spent countless hours scouring the Internet for information. The purpose of this ebook is to share details both large and small to help you get from departure to destination without

hiccups. I share how I plan my flights from scheduling to seat assignments. Does your baby need a bassinet? There are a few things you need to know that isn't information usually found on airline websites. I include tips to get you, your child and all of your gear through security and to the airplane. Speaking of gear, specific products have been very helpful to us. I'll tell you why and where to buy some of it. The most pressing issue parents seem to have is how to keep kids entertained and fuss free on the plane. Specific things worked for us and I developed a strategy for quieting meltdowns. It can also be tough to get kids on long haul flights to sleep and keep them (and, therefore, you) from getting severe jet lag. We received jet lag advice from medical professionals that does work. My daughter is usually over her jet lag by the second day. What you bring in your carry-on is key. To avoid stress, it's important to organize and pack it well. I'll tell you everything I bring onboard and keep within arms reach on the plane. There is nothing worse than having something you need in a bag in the overhead compartment, when the seat belt sign is on. Remember, if you request bulkhead seats you will not be able to store a bag at your feet. Other topics include tips for diapering on the plane, in flight meals, flying first or business class, and more. You'll also be able to receive quick answers to questions via our ongoing discussion on Twitter via the #flyingwithkids hashtag. There is helpful information in this ebook, regardless of how long your flight is.

Twenty Fathoms Down

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered

the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.
