### A Dark Brown Dog

"Yąnomamö culture, in its major focus, reverses the meanings of "good" and "desirable" as phrased in the ideal postulates of the Judaic-Christian tradition. A high capacity of rage, a quick flash point, and a willingness to use violence to obtain one's ends are considered desirable traits. Much of the behavior of the Yąnomamö can be described as brutal, cruel, treacherous, in the value-laden terms of our own vocabulary. The Yąnomamö themselves, however, as Napoleon Chagnon came to intimately know them in the year and a half he lived with them, do not all appear to be mean and treacherous. As individuals, they seem to be people playing their own cultural game, with internal feelings that at times may be quite divergent from the demands placed upon them by their culture. This case study furnishes valuable data for phrasing questions about the relationship between the individual and his culture."-- Foreword.

### Values and Ethics in Social Work Practice

In a shocking, never-before-told story from the vaults of American history, *Tonight We Bombed the US Capitol* takes a close look at the explosive hidden history of M19—the first and only domestic terrorist group founded and led by women—and their violent fight against racism, sexism, and what they viewed as Ronald Reagan’s imperialistic vision for America. In 1981, President Ronald Reagan announced that it was “morning in America.” He declared that the American dream wasn’t over, but the United States needed to lower taxes, shrink government control, and flex its military muscles abroad to herald what some called “the Reagan Revolution.” At the same time, a tiny band of American-born, well-educated extremists were working for a very different kind of revolution. By the end of the 1970s, many radicals had called it quits, but six veteran women extremists came together to finish the fight. These women had spent their entire adult lives embroiled in political struggles: protesting the Vietnam War, fighting for black and Native American liberation, and confronting US imperialism. They created a new organization to wage their war: The May 19th Communist Organization, or “M19,” a name derived from the birthday shared by Malcolm X and Ho Chi Minh, two of their revolutionary idols. Together, these six women carried out some of the most daring operations in the history of domestic terrorism—from prison breakouts and murderous armed robberies, to a bombing campaign that wreaked havoc on the nation’s capital. Three decades later, M19’s actions and shocking tactics still reverberate for many reasons, but one truly sets them apart: unlike any other American terrorist group before or since, M19 was created and led by women. *Tonight We Bombed the US Capitol* tells the full story of M19 for the first time, alongside original photos and declassified FBI documents. Through the group’s history, intelligence and counterterrorism expert William Rosenau helps us understand how homegrown extremism—a threat that still looms over us today—is born.

From the New York Times bestselling author of *H is for Hawk* and winner of the Samuel Johnson Prize for nonfiction, comes a transcendent collection of essays about the natural world. Animals don't exist in order to teach us things, but that is what they have always done, and most of what they teach us is what we think we know about ourselves. Helen Macdonald's bestselling debut *H is for Hawk* brought the astonishing story of her relationship with goshawk Mabel to global critical acclaim and announced Macdonald as one of this century's most important and insightful nature writers. *H is for Hawk* won the Samuel Johnson Prize for Nonfiction and the Costa Book Award, and was a finalist for the National Book Critics Circle Award and the Kirkus Prize for Nonfiction, launching poet and falconer Macdonald as our preeminent nature essayist, with a semi-regular column in the New York Times Magazine. In *Vesper Flights* Helen Macdonald brings together a collection of her best loved essays, along with new pieces on topics ranging from nostalgia for a vanishing countryside to the tribulations of farming ostriches to her own private vespers while trying to fall asleep. Meditating on notions of captivity and freedom, immigration and flight, Helen invites us into her most intimate experiences: observing the massive migration of songbirds from the top of the Empire State Building, watching tens of thousands of cranes in Hungary, seeking the last golden orioles in Suffolk's poplar forests. She writes with heart-tugging clarity about wild boar, swifts, mushroom hunting, migraines, the strangeness of birds' nests, and the unexpected guidance and comfort we find when watching wildlife. By one of this century's most important and insightful nature writers, *Vesper Flights* is a captivating and foundational book about observation, fascination, time, memory, love and loss and how we make sense of the world around us.

Seminar paper from the year 2010 in the subject American Studies - Literature, grade: 1,7, Johannes Gutenberg University Mainz, language: English, abstract: In my paper, I will first provide a brief overview of Darwin's theory of evolution and of social Darwinism, the underlying principles of "Call of the Wild". Afterwards, I will examine the numerous Darwinist and social Darwinist aspects as they appear in the novel itself. This way, I want to help the reader understand why the survival of the fittest plays a major role in "Call of the Wild". Moreover, I want to show what view of human society can be deduced from London's depiction of life in the novel. Jack London's 1903 novel "The Call of the Wild" is a classic example of a literary work dealing with life in the wilderness, the struggle for existence, and the survival of the fittest. Indeed, the survival of the fittest rules all encounters in the story. This realistic way of describing nature as dictated by Darwinian principles is certainly one of the reasons why the story seems so vivid. Another reason for the novel's vividness is London's technique of telling the story from the perspective of a dog named Buck, which gives the reader a deep insight into the harsh realities of nature. The novel begins with the kidnapping of Buck from Judge Miller's place in California. He is then sold to Canadian mail carriers by a dog seller and experiences the wilderness for the first time in his life when he travels to the Klondike. In the following months, Buck adjusts to his new life and even becomes the new leader of his team of dogs after having defeated his long-time rival Spitz. After his adventures in the Klondike, Buck is sold to inexperienced people that mistreat their sled dogs. Later, he is saved by a man called John Thornton before he would have drowned along with his masters and the rest of his team. In the following part of the book, Buck develops a deep affection for Thornton and the two of them experience many adventures together. When Thornton is killed by a group of Native Americans at the end of the story, Buck finally decides to follow the call of the wild and joins a pack of wolves.

### **The Call of the Wild Weekly #2**

Buck, living in comfort on an estate in California, is kidnapped and shipped to the Klondike. He becomes leader of a sledge-team and, after some hair-raising adventures, finally abandons human civilization and runs wild with the wolves.

### **Kafka on the Shore**

### **"The Call of the Wild" Weekly #3**

### **Walden**

In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. His name was Christopher Johnson McCandless. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and , unencumbered

by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page. From the Trade Paperback edition.

A pioneering canine behaviorist draws on cutting-edge research to show that a single, simple trait—the capacity to love—is what makes dogs such perfect companions for humans, and explains how we can better reciprocate their affection. “Lively and fascinating . . . The reader comes away cheered, better informed, and with a new and deeper appreciation for our amazing canine companions and their enormous capacity for love.” —Cat Warren, New York Times best-selling author of *What the Dog Knows* Does your dog love you? Every dog lover knows the feeling. The nuzzle of a dog’s nose, the warmth of them lying at our feet, even their whining when they want to get up on the bed. It really seems like our dogs love us, too. But for years, scientists have resisted that conclusion, warning against anthropomorphizing our pets. Enter Clive Wynne, a pioneering canine behaviorist whose research is helping to usher in a new era: one in which love, not intelligence or submissiveness, is at the heart of the human-canine relationship. Drawing on cutting-edge studies from his lab and others around the world, Wynne shows that affection is the very essence of dogs, from their faces and tails to their brains, hormones, even DNA. This scientific revolution is revealing more about dogs’ unique origins, behavior, needs, and hidden depths than we ever imagined possible. A humane, illuminating book, *Dog Is Love* is essential reading for anyone who has ever loved a dog—and experienced the wonder of being loved back.
