The Prentice Hall Guide for College Writers

“Over the years I have developed a distaste for the spectacle of *joie de vivre*, the knack of knowing how to live,” begins the title essay by Phillip Lopate. This rejoinder to the cult of hedonism and forced conviviality moves from a critique of the false sentimentalization of children and the elderly to a sardonic look at the social rite of the dinner party, on to a moving personal testament to the “hungry soul.” Lopate’s special gift is his ability to give us not only sophisticated cultural commentary in a dazzling collection of essays but also to bring to his subjects an engaging honesty and openness that invite us to experience the world along with him. Also included here are Lopate’s inspiring account of his production of Chekhov’s *Uncle Vanya* with a group of preadolescents, a look at the tradition of the personal essay, and a soul-searching piece on the suicide of a schoolteacher and its effect on his students and fellow teachers. By turns humorous, learned,

celebratory, and elegiac, Lopate displays a keen intelligence and a flair for language that turn bits of common, everyday life into resonant narrative. This collection maintains a conversational charm while taking the contemporary personal essay to a new level of complexity and candor.

A Rose for Emily

From the foreword by Amb. Philip Wilcox, Jr.: I know of no other American who can equal Landrum Bolling's forty years of commitment to and dedicated personal involvement in peace between Israelis and Palestinians. This brief book of deeply informed reflection and analysis is based on Bolling's unique and distinguished career as a citizen-peacemaker, a friend of and advisor to many American, Israeli and Palestinian statesmen, a philanthropic and humanitarian leader, and a constant advocate for a just Israel-Palestine peace. His efforts have touched the lives of many. Bolling's book is a valuable review, beginning a century ago, of the competing struggles for nationhood, sovereignty, and security between Jews and Palestinians over the same land, to which both peoples are profoundly attached. In readable prose, it combines an efficient summary of diplomatic history with rich personal anecdotes that illustratrate Bolling's analysis. The author's deep friendships with many leading Israeli and Palestinian activists and his respect and sympathy for the struggles of both peoples give this book special authenticity and credibility on a subject that, alas, has produced too much strident partisanship and

too few prescriptions for peace. Ending the Israel-Palestinian Conflict breaks new and controversial ground on advocating a permanent solution to the conflict. It commands attention.

21 colleges participated in this study which looks closely at how colleges and universities are complying with U.S. export control regulations and related strictures. The study presents detailed data on staffing, budgets, spending on information, legal services and conferences, use of government and private sector resources and consultants, and other facets of the efforts by colleges in the United States to comply with U.S. export control regulations that seek to control the outflow of critical technologies, particularly those with a military or dual use application. Among other issues covered: experience of hacking attacks on data subject to export controls, controls on foreign students and scholars, restrictions on information dissemination, interface with the US government export control bureaucracy, development of risk assessment reports and much more. Just a few of the report's many findings are that: * Colleges named as models for others in export control compliance practices include MIT, Stanford, Georgia Tech and Virginia Tech, which were named multiple times.* Institutions in the sample devoted a considerable amount of staff time to export controls; a mean of 1,560 staff hours and a median of 1,850. * 27.27% of the organizations sampled have used an outside attorney for any issue involving export controls in the past year;

33.33% of research universities had done so.* Only 4.5% of organizations sampled have made their own training videos about export controls compliance. * A mean of 86.05% and a median of 95% of the research performed by the colleges sampled falls under the "Fundamental Research" exclusion which excludes it from export controls.

Was It a Dream?

The first chapter in this volume presents an overview of the faculty personnel challenges facing community colleges; the next three discuss the socialization and professional development of new faculty. Authors stress the importance of understanding differences among the types of community colleges and the importance of gender and racial/thnic diversity among the faculty of the institutions who educate the majority of undergraduate females and students of color. The volume concludes with chapters on legal aspects related to the faculty employment and the experiences of presidents and senior instructional administrators, giving valuable guidance to those actively involved in the hiring process. At the heart of this volume is the continued commitment to the community college ideal of providing educational access and, through quality instruction, facilitating student learning and success. Previous research indicated that community college faculty retire at or near the traditional age of sixty-five. With an aging faculty, enrollments that are reaching unprecedented levels, and the federal government calling for the community college to take an even greater role in workforce training, community colleges will need to both replace significant portions of their faculty and hire additional faculty lines between now and 2020. This next hiring wave has implications for community colleges, the diverse student populations who attend these institutions, and society in general. This is the 152nd volume of the Jossey-Bass quarterly report series New Directions for Community

Colleges. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

Teaching Science in the Two-year College

This handbook acts as an essential guide to understanding and using reflective and experiential learning - whether it be for personal or professional development, or as a tool for learning. It takes a fresh look at experiential and reflective learning,

locating them within an overall theoretical framework for learning and exploring the relationships between different approaches. As well as the theory, the book provides practical ideas for applying the models of learning, with tools, activities and photocopiable resources which can be incorporated directly into classroom practice. This book is essential reading to guide any teacher, lecturer or trainer wanting to improve teaching and learning.

Resources in education

Year after year, prospective college applicants hear of the decreasing acceptance rates of elite colleges and the rising competition to get those few seats available. Many students find themselves wondering how to stand out among all these talented applicants. These students tire themselves out, pursuing a million different activities and despair when the college process doesn't seem to reward their struggles. I decided to write this guide the summer before I began my schooling at Harvard in an attempt to help ameliorate some of these concerns and present a focused path through this college journey from a fellow student's perspective. I hope that by applying some of the advice I present these students will have a healthier, more rewarding and successful college admissions experience.

The portfolio is a powerful tool for learning and assessment. Introducing the electronic into the mix increases its power, especially through the key feature of interactive hyperlinks and the potential to promote continuous reflection on, and updating of, learning. This introduction examines the potential of electronic portfolios by addressing: rationales for creating an electronic portfolio; possible features of the portfolio; examples of current practice; cautions; and recommendations. Chapters by nineteen portfolio practitioners from a range of disciplines and institutions describe the construction and use of electronic portfolios. They describe the uses: * By students to display and reflect on work for a specific course or program * By faculty to document and reflect on their classroom practice and allow comment by colleagues or others * By institutions to demonstrate accountability to their stakeholders and as a vehicle for institution-wide reflection, learning, and improvement. The section on institutional portfolios includes chapters on the incorporation of institutional research and data, and the potential role for such portfolios in accreditation. Section editors: Susan Kahn, Daniel P Tompkins, and Kathleen Blake Yancey.

Remember Who You Truly Are

In "Home at Last," a stunning collection of short fiction, an award-winning writer shares his compelling and introspective glimpses into real life. Chet Kozlowski, a graduate of the Creative Writing M.F.A. Program at The City College of New York,

offers thirteen vivid tales that illustrate the emotional challenges of ordinary characters placed in extraordinary situations. In each story, Kozlowski's characters confront their own unique dilemmas like the four-year-old boy who believes he can fly despite his parents' fears; the woman who travels far to reconnect with the child she abandoned years before; the writer who seeks salvation in a neighbor's unorthodox request; the wife who mulls secrets while studying her husband's sleeping form; and the mother who protects her children at all costs from a threat next door. In his first collection of short stories, Kozlowski exposes a group of eclectic characters while weaving an unforgettable journey through their imperfect lives. "As timely as last night's water-boarding or tomorrow morning's hurricane each episode explodes, creating immense but subtle drama." -Wayne Greenhaw, author of "King of Country" and "The Thunder of Angels"

Ten Days that Shook the World

What if everything they've told you about how to make money and get the things you want is wrong?! What if “getting ahead” financially were not only easy, but fun? What if the process of improving your own financial position could actually make the world a better place? In fact, what if it were required that you make the world a better place while improving your own financial position? What if attracting any amount of money were as simple as following a formula; and what if the formula did not work, and you could go back and repeat the process, learning and correcting what you had done wrong? What if you learned that most financially successful people throughout history got that way by knowing these questions

were true, and by following the aforementioned “formula?” What if spiritual, business, and financial leaders since the beginning of time have tried to share this information, and we simply haven't listened? In this important new work, Kerry O'Hallaron explores each of these questions and more. He lays out his findings in an easy-to-read, humorous and uplifting format, without departing from the book's premise. Can the above questions be true? You decide. Many have, long before O'Hallaron's time. He simply brings us a modern interpretation of a timeless classic. Read, enjoy, and employ the important teachings as you learn an elegantly simple approach to enjoying new streams of income and the many delightful things you can buy when you have money!

"This book is a slice of intensified history—history as I saw it." So begins John Reed's first-hand account of the Bolshevik Revolution of 1917. Much anticipated

when it was published in 1919, Reed's narrative remains as riveting today as when the events he describes were still reverberating throughout the world. Reed was hardly a disinterested observer, and his involvement in the Communist labor movement lends urgency and passion to his classic account. He vividly describes events in Petrograd in November 1917, when Vladimir Lenin and the Bolsheviks stormed the Winter Palace and seized the reins of power. Despite Reed's personal leanings, which he made no attempt to hide, the book garnered praise from luminaries across the political spectrum. George F. Kennan, the American diplomat, and father of the policy of Soviet containment, said that "Reed's account of the events of that time rises above every other contemporary record for its literary power, its penetration, its command of detail. It will be remembered when all others are forgotten." Reed was committed to telling the story of the Russian revolution as truthfully as possible. That the book was banned by Russian premier Josef Stalin is a testament to the author's success in carrying out his mission. One hundred years after Russia and the world trembled, *Ten Days that Shook the World* brings alive the momentous events of 1917.

It is a world where the warriors of the past and the technology of the future meet, where magic exists for some, and everything is upside down. In this world lives a boy. He lives as the village freak and has a habit of waking up next to dead bodies with no explanation as to how they got there. But one thing is certain: there's definitely something very, very wrong.
