Cost Accounting

A Textbook of Cost and Management Accounting provides the students with thorough grounding in cost concepts, cost behaviour and methods, and techniques of cost and management accounting with an understanding of the uses and limitations of cost and financial data for managerial operations. The text of the subject matter has been presented in a student-friendly, simple and intelligible manner. Every discussion involving conceptual complexity is immediately illustrated by a numerical example. In addition, the book contains a liberal sprinkling of charts and diagrams so as to make the subject easily understandable and highlight its finer points. The subject matter has been organized on 'first things first' basis for its logical presentation that sustains interest. The approach of the book is examination oriented. Thus, a good number of problems and solutions have been included in its chapters.

Theoretical and numerical questions have been mostly selected from various examinations. Objective type questions have been given to serve as self test by students. This is an ideal book for self study. New to this edition • All chapters thoroughly revised • Latest information on Cost Accounting Standards (CAS) issued by the Institute of Cost Accountants of India (ICAI) • Chapter on 'Miscellaneous Topics' made

19). · Cutting-edge topics are covered, including: · Material around recent trends in big data and data analytics in predicting costs and when making demand forecasts. Provide a solid presentation of accounting hallmarks with a great emphasis on strategy · Strategy maps are presented as a useful tool to implement the balanced scorecard and a simplified presentation of how income statements of companies can be analyzed from the strategic perspective of product differentiation or cost leadership. A new section helps students evaluate strategy maps such as the strength of links, differentiators, focal points and trigger points. · Try It examples are simple and focus on key ideas or concepts. They are located after a particular concept or calculation, and invite students to practice what they have just learned. · Becker Multiple Choice Questions in the assignment material probe students' knowledge of the chapter material and their ability to think critically about key concepts. · Opening Vignettes. Each chapter opens with a vignette on a real company situation. The vignettes get students engaged in a business situation, or dilemma, illustrating why and how the concepts in the chapter are relevant in business. New examples on Quiksilver, General Motors, Boeing, Delta, Honda, and Viacom have been incorporated. · Concepts in Action Boxes. Found in every chapter, these boxes cover real-world cost accounting issues across a variety of industries including automobile racing, defense contracting, entertainment, manufacturing, and retailing. New examples include Subway, Chipotle, H&M, Amazon, Under Armour, and Netflix.

COST ACCOUNTING THEORY AND PRACTICE

Cost Accounting

This dynamic text provides a practical, real-world approach to cost accounting, including substantial coverage of recent developments. COST ACCOUNTING, 12TH provides the essential background for those who will use accounting information as well as those who will prepare it. This edition continues the book's successful framework with early chapters devoted to thorough treatment of the elements of cost. Planning and control are recurring themes throughout the text as the authors provide special attention to decision-making and human behavioral considerations.

With a user-oriented approach, COST ACCOUNTING provides all the background your students need to become successful users and preparers of accounting information. The text encourages students to look at the business system first, then design a system that can collect and generate important information. Plus, because all businesses are different, the mechanics of alternative accounting systems and techniques are demonstrated and explained fully. The latest topics, such as TQM, measuring cost of quality, JIT, ABC, and activity-based management, are covered.

The Demo Docs System of instruction replicates the classroom experience by providing more “I get it” moments outside of class. We’ve talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: & Students understand (or “get it”) right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. & On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. & The Demo Docs system helps to recreate the “I get it” moments outside of class-keeping both you and the students on track.
