This is the long-awaited tenth-anniversary edition of Dr. Chamberlain's 1988 classic, *Babies Remember Birth*. In paperback format and enriched with a new last chapter, this book has the potential to revolutionize the way we look at babies, both before and after birth. Part I is filled with "user-friendly" information about the mind and abilities of newborns, as well as a thorough look at their development before birth. Parts II and III present evidence that babies do remember birth and

are very much aware of the people around them at that time. Dr. Chamberlain writes compellingly about the newborn's sensitivity, awareness, and vulnerability. He emphasizes the importance and power of the infant-and-parent connection during pregnancy and after birth. When the information in this book becomes common knowledge, we will look at our children with new respect and understanding.

We Own The Sky

Calico Captive

From a Newbery Medal-winning author, an "exciting novel" about a colonial girl's experience during the French and Indian War (Saturday Review). In the year 1754, the stillness of Charlestown, New Hampshire, is shattered by the terrifying cries of an Indian raid. Young Miriam Willard, on a day that had promised new happiness, finds herself instead a captive on a forest trail, caught up in the ebb and flow of the French and Indian War. It is a harrowing march north. Miriam can only force herself to the next stopping place, the next small portion of food, the next icy stream to be crossed. At the end of the trail waits a life of hard work and, perhaps, even a life of slavery. Mingled with her thoughts of Phineas Whitney, her sweetheart on his way to Harvard, is the crying of her sister's baby, Captive, born on the trail. Miriam and her companions finally reach Montreal, a city of shifting loyalties filled with the intrigue of war, and here, by a sudden twist of fortune, Miriam meets the prominent Du Quesne family, who introduce her to a life she has never imagined. Based on an actual narrative diary published in 1807, *Calico Captive* skillfully reenacts an absorbing facet of history. "Vital and vivid, this short novel based on the actual captivity of a pre-Revolutionary girl of Charlestown, New Hampshire, presents American history with force and verve." —Kirkus Reviews

Our America

The Pennsylvania School Journal

A decisive intervention in the "war" between generations, asking who stands to gain from conflict between baby boomers and millennials Millennials have been incited to regard their parents' generation as entitled and selfish, and to blame the baby boomers of the Sixties for the cultural and economic problems of today. But is it true that young people have been victimized by their elders? In this book, Jennie Bristow looks at generational labels and the groups of people they apply to. Bristow argues that the prominence and popularity of terms like "baby boomer," "millennial," and "snowflake" in mainstream media operates as a smoke screen—directing attention away from important issues such as housing, education, pensions, and employment. Bristow systematically disputes the myths that surround the "generational war," exposing it to be nothing more than a tool by which the political and social elite can avoid public scrutiny. With her lively and engaging style, Bristow highlights the major issues and concerns surrounding the sociological blame game.

A New Concordance to the Holy Scriptures By the Rev. John Butterworth A new edition, with considerable improvements, by Adam Clarke

From Justin Bieber, to Sarah Palin and Michele Bachmann, to the controversial documentary Jesus Camp (2006), the New Apostolic Reformation's influence can be seen everywhere in mainstream America. Beginning with an examination of the Latter Rain, Church Growth and Shepherding movements, this book explores how the new Reformation has become one of the most powerful movements in modern evangelical Christianity and a major influence on American political and cultural life. The author describes the New Apostolic Reformation's organization, how the movement spread and its national and international objectives.

In this "provocative primer on the nature versus nurture debate" ("Mirabella"), psychologist and noted journalist Robert Karen offers fresh insights into some of the most fundamental questions of emotional life. He traces the history of attachment theory through the controversial work of John Bowlby, a British psychoanalyst, and Mary Ainsworth, an American developmental psychologist, who together launched a revolution in child psychology.

The power of collaboration, from Lennon and McCartney to Wozniak and Jobs: "An inspiring book that also happens to be a great read" (Daniel H. Pink, author of

Drive). Throughout history, partners have buoyed each other to better work—though often one member is little known to the general public. (See Warren Buffett and Charlie Munger, or Vincent and Theo van Gogh.) Powers of Two draws on neuroscience, social psychology, and cultural history to present the social foundations of creativity, with the pair as its primary embodiment. Revealing the six essential stages through which creative intimacy unfolds, this book shows how pairs begin to talk, think, and even look like each other; how the most successful ones thrive on conflict; and why some cease to work together while others carry on. At once intuitive and deeply surprising, Powers of Two will reshape the way you view individuals, relationships, and society itself. “A rare glimpse into the private realms of duos . . . A natural storyteller.” —The New York Times “A book about magic, about the Beatles, about the chemistry between people, about neuroscience, and about the buddy system; it examines love and hate, harmony and dissonance, and everything in between . . . Wise, funny, surprising, and completely engrossing.” —Susan Orlean “We sometimes think of creativity as coming from brilliant loners. In fact, it more often happens when bright people pair up and complement each other. Shenk’s fascinating book shows how to spark the power of this phenomenon.” —Walter Isaacson “Surprising, compelling . . . Shenk banishes the idea of solitary genius by demonstrating that our richest art and science come from collaboration: we need one another not only for love, but also for thinking and imagining and growing and being.” —Andrew Solomon
