Use structural, behavioral, and concurrent patterns in Delphi to skillfully develop applications Key Features Delve into the core patterns and components of Delphi to enhance your application's design Learn how to select the right patterns to improve your program's efficiency and productivity Discover how parallel programming and memory management can optimize your code Book Description Delphi is a cross-platform Integrated Development Environment (IDE) that supports rapid application development for most operating systems, including Microsoft Windows, iOS, and now Linux with RAD Studio 10.2. If you know how to use the features of Delphi, you can easily create scalable applications in no time. This Learning Path begins by explaining how to find performance bottlenecks and apply the correct algorithm to fix them. You'll brush up on tricks, techniques, and best practices to solve common design and architectural challenges. Then, you'll see how to leverage external libraries to write better-performing programs. You'll also learn about the eight most important patterns that'll enable you to develop and improve the interface between items and harmonize shared memories within threads. As you progress, you'll also delve into improving the performance of your code and mastering cross-platform RTL improvements. By the end of this Learning Path, you'll be able to address common design problems and feel confident while building scalable projects. This Learning Path includes content from the following Packt products: Delphi High Performance by Primož Gabrijelčič Hands-On Design Patterns with Delphi by Primož Gabrijelčič What you will learn Understand parallel programming and work with the various tools included with Delphi Explore memory managers and their implementation Leverage external libraries to write better-performing programs Keep up to date with the latest additions and design techniques in Delphi Get to grips with various modern multithreading approaches Break a design problem down into its component parts Who this book is for This Learning Path is for intermediate-level Delphi programmers who want to build robust applications using Delphi features. Prior knowledge of Delphi is assumed.

## The Complete Step-by-Step Guide to Designing and Teaching Online Courses

Eleven-year-old Delphine has it together. Even though her mother, Cecile, abandoned her and her younger sisters, Vonetta and Fern, seven years ago. Even though her father and Big Ma will send them from Brooklyn to Oakland, California, to stay with Cecile for the summer. And even though Delphine will have to take care of her sisters, as usual, and learn the truth about the missing pieces of the past. When the girls arrive in Oakland in the summer of 1968, Cecile wants nothing to do with them. She makes them eat Chinese takeout dinners, forbids them to enter her kitchen, and never explains the strange visitors with Afros and black berets who knock on her door. Rather than spend time with them, Cecile sends Delphine, Vonetta, and Fern to a summer camp sponsored by a revolutionary group, the Black Panthers, where the girls get a radical new education. Set during one of the most tumultuous years in recent American history, one crazy summer is the heartbreaking, funny tale of three girls in search of the mother who abandoned them—an unforgettable story told by a distinguished author of books for children and teens, Rita Williams-Garcia.

Masterminds of Programming features exclusive interviews with the creators of several historic and highly influential programming languages. In this unique collection, you'll learn about the processes that led to specific design decisions, including the goals they had in mind, the trade-offs they had to make, and how their experiences have left an impact on programming today. Masterminds of Programming includes individual interviews with: Adin D. Falkoff: APL Thomas E. Kurtz: BASIC Charles H. Moore: FORTH Robin Milner: ML Donald D. Chamberlin: SQL Alfred Aho, Peter Weinberger, and Brian Kernighan: AWK Charles Geschke and John Warnock: PostScript Bjarne Stroustrup: C++ Bertrand Meyer: Eiffel Brad Cox and Tom Love: Objective-C Larry Wall: Perl Simon Peyton Jones, Paul Hudak, Philip Wadler, and John Hughes: Haskell Guido van Rossum: Python Luiz Henrique de Figueiredo and Roberto Ierusalimschy: Lua James Gosling: Java Grady Booch, Ivar Jacobson, and James Rumbaugh: UML Anders Hejlsberg: Delphi inventor and lead developer of C# If you're interested in the people whose vision and hard work helped shape the computer industry, you'll find Masterminds of Programming

fascinating.

## One Crazy Summer

A growing number of people completing or holding graduate degrees now seek non-faculty positions—also called alternative academic, or "alt-ac" positions—at different stages in their careers. While an increasing number of people with doctoral degrees are hunting for a diminishing pool of tenure-track faculty jobs, most degree-granting institutions do not adequately prepare their graduate students to enter the new reality of the alt-ac job market. Yet the administrative ranks in higher education institutions are growing, as colleges and universities are creating a diverse range of positions that support teaching and learning efforts. Focusing on the range of potential alternative career choices, this highly practical book offers tools and prompts for readers who are: Considering whether to choose an alt-ac career path Seeking specific alt-ac positions Advising graduate students or mentoring recent professional graduates Encountering alt-ac career challenges The authors offer case stories—their own and those of colleagues across North America in alt-ac roles—with concrete examples designed to help readers pursue, obtain, and excel in a wide variety of alt-ac positions. The book can equally be used as a resource for graduate courses on professional development and job-market preparation.

## Forthcoming Books

In this valuable resource, experts share deep knowledge including practical "how-to" and preventive trouble-shooting tips. Instructors will learn about course design and development, instructional methods for online teaching, and student engagement and community building techniques. The book contains successful teaching strategies, guidance for facilitating interactions and responding to diversity, and assessments, as well as future directions for online learning. With many field-tested examples and practice assignments, and with voices from students, teachers, and experts, this book arms instructors and administrators with the tools they need to teach effective and empowering online courses. This one-stop resource addresses all of the core elements of online teaching in terms that are universally applicable to any content area and at any instructional level. "A rare book in education: one that is not only highly useful but also intellectually coherent and based on robusta>, transferable principles of learning and teaching. All educators—in online environments and in brick-and-mortar schools—will find this an invaluable resource." —From the Foreword by Grant Wiggins "We now know we can get increased participation with online tools to make thinking more visible and switch the traditional delivery of instruction to personalize learning. While it is inevitable that online learning will become an important skill for everyone, the ideas, concepts, strategies, design elements, and tools in the book by Thormann and Zimmerman can also be applied to blended learning." —Alan November, Senior Partner and Founder, November Learning "The authors of this book have created an excellent resource for anyone interested in becoming an online

instructor or improving his or her skills in online teaching. The authors share a wealth of step-by-step activities, examples of assignments and teaching strategies that will guide both novice and experienced teachers as they expand their skills into the online realm. Even as a 'veteran' online instructor the book provided me with new ideas to try in my next online class." —Sam Gladstein, Coordinator, Edmonds eLearning Program at Edmonds School District, WA "Cheers to Thormann and Zimmerman for providing a must-read for online teaching. This clear and practical guide takes the instructor from design to implementation of online courses. The authors remove the anxiety about online teaching for those thinking about on-screen instruction, and provide new thinking and examples for those already immersed in it. It is a great guide for those entering the field and a superb resource for those actively engaged in it." —Anthony J. Bent, Chairman, Global Studies-21st Century Skills Committee of the Massachusetts Association of School Superintendents Book Features: The building blocks necessary to create a successful online course. The know-how of long-time online instructors. Models for Skype conferencing with groups of students. Templates for course building, including sample assignments, activities, assessments, and emails. Detailed treatment of diversity in the online environment Joan Thormann is professor in the division of Technology in Education at Lesley University, Cambridge, Massachusetts. She edits a column on technology and special needs for Learning and Leading with Technology. Isa Kaftal Zimmerman is the principal of IKZ Advisors in Boston, Massachusetts, an educational consulting firm serving educators and stakeholders in the Science, Technology, Engineering, and Mathematics (STEM) fields.

## Films and Other Materials for Projection

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new

index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

## Coding in Delphi

Essential Skills for a Medical Teacher is a new book that will serve as a perfect introduction for new teachers to the exciting opportunities facing them, whether they are working in undergraduate, postgraduate or continuing education. It will also be of considerable use to more experienced teachers to review and assess their own practice and gain a new perspective on how best to facilitate their students' or trainees' learning. The contents are based on the authors' extensive experience of what works in medical education, whether in teaching and curriculum planning or in the organisation of faculty development courses in medical education at basic and advanced levels. About the authors Ronald M Harden is General Secretary for the Association of Medical Education in Europe, Editor of Medical Teacher, former Professor of Medical Education, Director of the Centre for Medical Education and Teaching Dean at the University of Dundee, UK and Professor of Medical Education at Al-Imam University, Riyadh, Saudi Arabia. He is internationally recognised for his commitment to developing new approaches to medical education, curriculum planning and to teaching and learning. His contributions to excellence in medical education have attracted numerous awards. Jennifer M Laidlaw is Former Assistant Director of the Education Development Unit of the Scottish Council for Postgraduate Medical and Dental Education and the University of Dundee, UK. She has planned, organised and lead courses on medical education both in Dundee and overseas. She has acted as a medical education consultant for the World Health Organisation, the British Council, medical schools and colleges. The text provides hints drawn from practical experience to help teachers create powerful learning opportunities for their students, providing readable guidelines and introducing new techniques that potentially could be adopted for use in any teaching programme. Throughout the book introduces some key basic principles that underpin the practical advice that is given and which will help to inform teaching practice. This book will assist readers to reflect on and analyse with colleagues the different ways that their work as a teacher or trainer can be approached and how their student or trainee's learning can be made more effective.
