The Secrets of Tenet

Based on a true story: A magnificent portrayal of chaos, darkness, and adventure in Asia's Golden Triangle as the war wages in Vietnam Adrift at the end of the Vietnam War, Paul Roberts and his girlfriend, Fay, are arrested at the Burmese-Thai border for smuggling a couple of ounces of hashish. Stranded in a small Thai prison, they become part of a grisly contest played out by opium warlords, corrupt border patrol police, and two AWOL GIs. The war echoes through their intrigues and jailbreak attempts, especially when a regiment of North Vietnamese joins the skirmish. Transcending the adventure story, John Balaban's lyric prose conjures beautiful and frightening images, evoking the Golden Triangle's jungle as well as the complex hazards of the opium trade.

Transportation Infrastructure Engineering: A Multimodal Integration, intended to serve as a resource for courses in transportation engineering, emphasizes transportation in an overall systems perspective. It can serve as a textbook for an introductory course or for upper-level undergraduate and first-year graduate courses. This book, unlike the widely used textbook, Traffic and Highway Engineering, serves a different purpose and is intended for a broader audience. Its objective is to provide an overview of transportation from a multi-modal viewpoint rather than emphasizing a particular mode in great detail. By placing emphasis on explaining the environment in which transportation operates, this book presents the big picture to assist students in understanding why transportation systems operate as they do and the role they play in a global society. How is it possible to feel more at home with your friends than with your own family? Sometimes Calvin Miller really hates that he and his mother, Nina, don't have a home of their own. Instead, they live in Garo's house—well, more precisely, Alan's house. A pilot who is always away, Alan is also Nina's boss. As his live-in housekeeper, Nina raises Alan's son, Garo, right alongside Cal. Luckily, the boys are good friends despite their differences. Though Cal is better at school, Garo is better with people—his outgoing personality makes everyone like him. But sometimes Cal thinks even his mother is closer to Garo than she is to her own son. Cal figures he must take after his dad, but how can he be sure when the only contact he's had with his father is in the form of three postcards over a course of nine years? As Cal navigates his teenage years, he may be in store for more changes than he realizes.
