### **Farsi - English Dictionary**

This children dictionary book is a combination of two languages English and Farsi. Children dictionary like all other dictionaries is a book about words. It tells you what each word means and how each word spells. For each word in this book, a picture of the word exists. In addition, this book provides pronunciation of translated exact English word to Farsi word. Children dictionary book shows how to use each word in a sentence both in English and Farsi. At the end of this book, there is English alphabet and Farsi alphabet. However, that Farsi alphabet is like Arabic alphabet. (Farsi alphabet has four more letters of PEH, CH, ZH, GEH or . - - .) English language has twenty-six alphabets, and Farsi language has thirty-two alphabets. Writing direction in English is from left to right, but in Farsi is from right to left. This children dictionary book shows spelling of the English and Farsi word and sentence and pronunciation of translated English word to the Farsi word. Also, I wrote the vowels of pronunciation of Farsi word in English. This children dictionary book is in ABC order. You can find a word that begins with A before a word that

begins with B and a word that begins with B before a word that begins with C. There is a box of alphabet (AZ), which you can find each word according to the letter they begin with. For example, you can find the word airplane in the A section of the dictionary. Children dictionary gives the (1) spelling of a word, (2) meaning of a word, (3) picture of a word, and (4) pronunciation of a translated word from English to Farsi. Sometimes one word has more than one meaning, and only you can find the meaning of the word based on a given sentence. For example, shir has three different meanings in Farsi (lion, milk, and faucet). Pictures and meanings of these words are shown in children dictionary book. Most pictures in this book are drawn by the author, others are used from first grade Farsi book in Iran, and some are from relatives who permitted their pictures to be used in the book. Also, there are few Internet pictures that are permitted to be used in this book.

## **An English-Persian Dictionary**

The Persian Contributions to the English Language: An Historical Dictionary contains 811 main entries. Its major purpose is to advance the historical study of

comprehensive, chiefly lexical borrowing between languages in contact. The ancillary purpose is to show how a collected corpus of loans can shed light on multiple disciplines. This wide-ranging, innovative book is the largest, most up-to-date collection of English words and multiword lexical units borrowed from Persian, directly or through a mediating language such as Hindi/Urdu, Arabic or Turkish. All general English dictionaries were searched, including electronic retrieval from the second edition of the Oxford English Dictionary. A major feature of the tome is that each dictionary entry gives its first known recorded date in written English, its semantic field, any modern variant form and labels, etymology including 'native' meaning(s), English definitions in chronological order as could be dated, any derivative forms including functional shifts and compounds, sometimes a grammatical note, the symbolized sources where the loan is recorded, and the degree of naturalization in English.

This Collection of Selected Words contains more than 2,200 significant and commonly used Persian/Arabic words and phrases, with their corresponding English translation, that appear in the Baha'i Writings. The English translation of the Persian/Arabic word or phrase has been found by matching the words in the original Persian/ Arabic text with the same word or phrase in the published English translation of that same text. This method differs from consulting Persian to English or Arabic to English dictionaries to find the English equivalent of a Persian or Arabic word, taking advantage of the translator's research and insight in selecting the most appropriate translation for a particular context and meaning. In cases where the selected work has been translated by Shoghi Effendi, this method also enables us to follow the standard set by the beloved Guardian in his translations of those works. Furthermore, this method enables one to find the translation of complete phrases not normally found in dictionaries; therefore, every attempt has been made to include such phrases and special terms in this collection. Although a relatively small number of texts has been used in preparing this collection, it is hoped that it will be useful in the general study of the Baha'i Writings in both Persian/Arabic and English.

## **The Persian Contributions to the English Language**

This dictionary uses transliteration as the basis for the word entries and makes it easier for the language learners who are not familiar with the Persian script or are not skilled enough in using it. In those few dictionaries which use transliterations, since the alphabetical order is based on Persian script, it is very difficult and in some cases impossible for a non-native speaker to find the word, especially for those who are at the first stages of learning the language. However, in this method, they would be able to find the transliteration as quick as the English word and they can match it with the equivalent word in the script. So, this dictionary is the first one which can be used by those who even do not know writing and reading in Persian script.

Research shows that learning a second language boosts problem-solving, critical thinking, and listening skills, in addition to improving memory, concentration, and the ability to multitask. Children proficient in other languages also show signs of enhanced creativity and mental flexibility. There is a "critical period" or "window of opportunity" when children learn languages best. Studies have shown that this is when children are between birth and six years old. The younger children are, the easier they will learn a second language. As they get older that ability diminishes. These easy and fun flashcards aim to help parents as a useful educational tool for kids to learn a new language.
