There has been an explosion in the creation and use of digital media over the past quarter century and in particular over the past decade. As the varieties of digital media multiply, scholars are beginning to examine its origins, organization, and preservation, which present new challenges compared to the organization and preservation of traditional media such as books, papers, films, photographs, music scores, and works of art. In order to examine from multiple perspectives issues related to history, preservation, and ontology of digital media, editors of this volume organized an invitation-only workshop on digital media. The participants were carefully chosen to represent a variety of backgrounds and perspectives, ranging from humanities to information studies to technology to history to communication theory to fine arts. The book is organized in four parts, each representing a different perspective on digital media: preservation, interaction, organization, and history. The preservation section considers the problems of archiving digital media for long-term preservation. Many digital objects are readily copied but are fragile and not designed for preservation, and this nature of digital objects provides both challenges and opportunities for adapting archival practice. The remaining sections look at the interaction between technological changes and cultural practices, the organization of digital media, and the history of digital media and how technology has changed over time. The wealth of varied perspectives collected together in this volume provides new light

on the topic of digital media.

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that

their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as *I Plan to Kill You Now* and the sequel, *I Plan to Kill You Now, Too*, the ninja film, *Chuck Butcher: Sword Wielding Jackal*, as well as the light-hearted romp, *Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska* -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.

His dreams and wonders take him through a magical land of creatures - Feathers, Shells, Fins, and others - as he seeks out the dread Magistrate, who seems to be the keeper of the land.
