Edmund's Used Cars & Trucks

Edmund's Used Cars Prices and Ratings

From the award-winning author of *American Canopy*, a dazzling account of the world's longest road, the Pan-American Highway, and the epic quest to link North and South America, a dramatic story of commerce, technology, politics, and the divergent fates of the Americas in the nineteenth and twentieth centuries. The Pan-American Highway, monument to a century's worth of diplomacy and investment, education and engineering, scandal and sweat, is the longest road in the world, passable everywhere save the mythic Darien Gap that straddles Panama and Colombia. The highway's history, however, has long remained a mystery, a story scattered among government archives, private papers, and fading

memories. In contrast to the Panama Canal and its vast literature, the Pan-American Highway—the United States' other great twentieth-century hemispheric infrastructure project—has become an orphan of the past, effectively erased from the story of the “American Century.” The Longest Line on the Map uncovers this incredible tale for the first time and weaves it into a tapestry that fascinates, informs, and delights. Rutkow’s narrative forces the reader to take seriously the question: Why couldn’t the Americas have become a single region that “is” and not two near irreconcilable halves that “are”? Whether you’re fascinated by the history of the Americas, or you’ve dreamed of driving around the globe, or you simply love world records and the stories behind them, The Longest Line on the Map is a riveting narrative, a lost epic of hemispheric scale.

Gale's Auto Sourcebook 2

Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.

War Department Technical Manual

A muscle car is not a piece of Italian exotica, a Ferrari or a Lamborghini, cars which are just too complex and too specialized; nor is it a German Porsche, which is too efficient and too clever by half; nor yet a classic British sports car, a Morgan, TVR or Jaguar, which could never be regarded as fitting the bill. Sports cars, by and large, are not muscle cars, with two notable exceptions: the legendary AC Cobra of the 1960s, and the Dodge Viper of the 1990s. These followed the muscle car creed of back-to basics raw power. In effect, muscle cars always were, and always will be, a quintessentially North American phenomenon. The basic concept is something like this: take a mid-sized American sedan, nothing complex, upmarket or fancy, in fact the son of car one would use to collect the groceries in any American town on any day of the week; add the biggest, raunchiest V8 that it is possible to squeeze under the hood; and there it is. The muscle car concept really is as simple as that.
