## E-Book Energy Medicine East and West

China, the world's oldest and most populous state, remains an enigma to most people in the West, even at a time when that country is playing an increasingly prominent role on the international stage. At the heart of modern Chinese history have been the efforts of the Chinese people to transform their polity into a modern nation state, the Confucian orthodoxy into an ideology that can help direct that process, and an agrarian economy into an industrial one. These efforts are ongoing and of great importance. This book is both an introduction to the major features of modern Chinese history and a resource for researchers interested in virtually any topic relating to the Chinese experience of the last 220 years. This valuable reference contains: a historical narrative providing a comprehensive overview of five core aspects of Chinese history: domestic politics, society, the economy, the world of culture and thought, and relations with the outside world; a compendium of 250 short, descriptive articles on key figures, events, and terms; a resource guide containing approximately 500 annotated entries for the most authoritative sources for further research in English, as well as descriptions of important films depicting modern China and a guide to electronic resources; and appendices, including a chronology, excerpts from key primary source documents, and a wealth of tables and graphs on demographic, social, and economic trends.

Energy Medicine East and West: A Natural History of Qi provides a unique, comprehensive overview of Qi or bioenergy for students and practitioners of energy medicines, Chinese and Oriental Medicine, and all disciplines of Complementary and Integrative Medicine. Mayor and Micozzi start with a comparative historical account of the ancient concepts of Qi and vital energy before covering theories of Qi, a discussion of the organized therapeutic modalities based upon Qi and its applications to specific health and medical conditions. Contributions are included from international experts in the field. The book moves from anatomical and bioenergetic complementarity of Western vital energy and Eastern Qi, through convergence of perspectives and models to demonstrations of how the traditional therapies are being melded together in a new, original and creative synthesis. David Mayor and Marc Micozzi are experienced medical practitioners, authors and editors. David Mayor has been actively involved in bioenergy research, practice and publishing for over 30 years, and is author/editor of *Electroacupuncture: A practical manual and resource* (2007), as well as other acupuncture texts and studies. Marc Micozzi is Professor in the Department of Physiology and Biophysics at Georgetown University School of Medicine, Washington, DC. As author/editor of *Fundamentals of Complementary & Alternative Medicine*, 4E (2011), and 25 other books, he has been writing, editing and teaching on bioenergy, Qi and related topics for 20 years. Endorsements "This wonderful book has assembled some 25 authors expressing well a view of qi which entirely does justice to its nature. Meticulously referenced, it is a milestone to set beside Maciocias Foundations of Chinese Medicine and Deadmans Manual of Acupuncture. Here at last are the beginnings of a true science of qi There is truly nothing like it in contemporary literature. Alone, it lays the foundation for the beginnings of a modern science of qi." Richard Bertschinger, Acupuncturist and translator, Somerset, UK. "This book offers a timely and thorough examination of the experience and nature of qi, including

a series of fascinating philosophical discussions with a direct application to our patients. Required reading for acupuncture practitioners seeking to justify and clarify their clinical reasoning."Val Hopwood PhD FCSP, Physiotherapist, acupuncturist, researcher and educator; Course director, MSc Acupuncture, Coventry University, UK. "Over the last decade most books on Asian medicine paid tribute to the aura of evidence-based medicine - experience counted little, RCTs were convincing. This book, at last, returns to an old tradition of debate, opening up quite a few new horizons. Reading it, my striving for knowledge was married with enjoyment and happiness. This book made me happy!" Thomas Ots MD PhD, Medical acupuncturist specialising in psychiatry, Graz, Austria; Editor-in-Chief, Deutsche Zeitschrift für Akupunktur. "To simply review the chapter headings is to know the truly remarkable expanse of this book a wonderful bridge between the mysteries of the East and the sciences of the West well documented, well written, and enlarging both. Enlighteningly depicts outstanding advances in energy psychotherapeutics, thus ultimately helping to move forward the human condition." Maurie D Pressman MD, Emeritus Clinical Professor of Psychiatry, Temple University School of Medicine, Philadelphia, PA; Emeritus Chairman of Psychiatry, Albert Einstein Medical Center, Philadelphia PA; past President, International Society for the Study of Subtle Energies and Energy Medicine, Lafayette, CO, USA.
