Official Verbatim Report of the Parliamentary Debates

Nigerian Universities Inaugural Lectures Series

This report assesses the status and practice of higher education quality assurance in Sub - Sahara Africa, focusing on degree - granting tertiary institutions. A main finding is that structured national - level quality assurance processes in African higher education are a very recent phenomenon and that most countries face major capacity constrains. Only about a third of them have established structured national quality assurance mechanism, often only as recently as during the last ten years. Activities differ in their scope and rigor, ranging from simple licensing of institutions by the minister responsible for higher education, to comprehensive system - wide program accreditation and ranking of institutions. Within institutions of higher learning, self assessment and academic audits are gradually being

adopted to supplement traditional quality assurance methods. However, knowledge about and experience with self - assessments are limited. The main challenges to quality assurance system in Africa are cost and human capacity requirements. For countries with large tertiary systems, the report recommends institutional, rather than program accreditation as a cost - effective option. However, where tertiary systems are small and underdeveloped, a less formal self - assessment for each institution may be necessary until the capacity could be strengthened to support a more formal nation quality assurance agency in the long run.

Report of the Auditor-General for on the Accounts of Parastatal Bodies

In recent years, growing attention has been focussed on real estate education. The objective of Real Estate Education Throughout The World: Past, Present and Future is to document the current status and perspectives of real estate education and the underlying research throughout the world. The intent is to inform students, academics and practitioners about the situation in the widest possible range of countries and to provide a foundation for the future of the real estate discipline. The structure of this monograph follows the organisation of the world-wide network of real estate societies. In Part 1, Stephen E. Roulac sets the framework for the other contributions. Part 2 contains 20 chapters that examine real estate education in Europe. Part 3 consists of two articles covering North America. Part 4 includes two chapters dealing with Latin America. In Part 5, 8 countries in Asia are

examined. Part 6 contains two chapters covering the Pacific Rim. Finally, Part 7 focuses on Africa. This collection of papers is unique, in the sense that 50 authors have contributed to the monograph and 37 countries or regions in total are covered. The editor does not know of any comparable book.

History

This book sets out to bring voices of the South to the debate on localization of education and makes the case that it should be considered a right in education. Despite all the scientifically-based evidence on the improved quality of education through the use of a local language and local knowledge, English as a language of instruction and "Western" knowledge based curriculum continue to be used at all educational levels in many developing nations. This means that in many African countries, the goal of rights to education is becoming increasingly remote, let alone that of rights in education. With this understanding and with the awareness of the education challenges of millions of children throughout Africa, the authors argue that local curriculum through local languages needs to be valued and to be preserved, and that children need to be prepared for the world in a language that promotes understanding. The authors make a clear case that policy makers are in a position to work towards a quality education for all as part of a more comprehensive right-based approach. We owe it to the children of the South to offer the best quality education possible in order to achieve social justice.

Thomas Kellaghan Educational Research Centre, St. Patrick's College, Dublin, Ireland Daniel L. Stufflebeam The Evaluation Center, Western Michigan University, Ml, USA Lori A. Wingate The Evaluation Center, Western Michigan University, Ml, USA Educational evaluation encompasses a wide array of activities, including student assessment, measurement, testing, program evaluation, school personnel

evalua tion, school accreditation, and curriculum evaluation. It occurs at all levels of education systems, from the individual student evaluations carried out by class room teachers, to evaluations of schools and districts, to district-wide program evaluations, to national assessments, to cross-national comparisons of student achievement. As in any area of scholarship and practice, the field is constantly evolving, as a result of advances in theory, methodology, and technology; increasing globalization; emerging needs and pressures; and cross-fertilization from other disciplines. The beginning of a new century would seem an appropriate time to provide a portrait of the current state of the theory and practice of educational evaluation across the globe. It is the purpose of this handbook to attempt to do this, to sketch the international landscape of educational evaluation - its conceptual izations, practice, methodology, and background, and the functions it serves. The book's 43 chapters, grouped in 10 sections, provide detailed accounts of major components of the educational evaluation enterprise. Together, they provide a panoramic view of an evolving field.
