In his choice of texts, the Editor has been faced with the difficult task of selecting, from among the author's more than 600 publications, those of the greatest philosophical interest. It is chiefly the topics of value-relativism and the logic of norms that have been kept in view. The selection has also been guided by the endeavour to reprint, so far as possible, texts which have not hitherto appeared in English. At times, however, this aim has had to be discarded, in order to include works of key importance and also the latest expressions of Kelsen's view. In addition to the two topics already mentioned, the Editor has considered Kelsen's discussions of the causal principle to be so far worthy of philosophical attention, that some writings on causality and account ability have been included in this collection of philosophical studies. OTA WEINBERGER Hans Kelsen died on April 19th, 1973. Only his work now lives, for the inspiration of future generations of jurists and philosophers. Graz, 25th April, 1973 OT A WEINBERGER TRANSLATOR'S NOTE I am obliged to the Editor for his careful scrutiny of the translation, which has led to a number of corrections and improvements in the text.

Ethical Theories in Islam

Translated for the first time into English here, the Latin was translated in the 12th century and into Hebrew in 1279. Henceforth the Canon served as the chief guide to medical science in the West and is said to have influenced Leonardo da Vinci. Its encyclopedic content, its systematic arrangement and philosophical plan soon worked its way into a position of pre-eminence in the medical literature of Europe, displacing the works of Galen and becoming the textbook for medical education in the schools of Europe. The text was read in the medical schools at Montpellier and Leuven as late as 1650. Experimental medicine the Canon of Medicine was the first book dealing with evidence-based medicine, experimental medicine, clinical trials, randomized controlled trials, efficacy tests, risk factor analysis, and the In phytotherapy, the Canon introduced the medicinal use of *Taxus baccata* L. He used it as a cardiac remedy. This was the first known use of a calcium channel blocker drug.

This work provides a typology of Islamic ethics, without overlooking the chronological development. Four types of ethical theory are isolated: the scriptural, the theological, the philosophical and the religious. This edition contains extra material from Ibn Sina's writings, translated into English. The book should interest Islamic scholars, philosophers and historians of ethics.

Averroes' Tahāfut al-Tahāfut

Does God exist? The question implies another: Who is God? This book is meant to give an answer to both questions and to give reasons for this answer. Does God exist? Yes or no? Many are at a loss between belief and unbelief; they are undecided, skeptical. They are doubtful about their belief, but they are also doubtful about their doubting. There are still others who are proud of their doubting. Yet there remains a longing for certainty. Certainty? Whether Christians or Jews, believers in God or atheists, the discussion today runs right across old denominations and new ideologies—but the longing for certainty is unquenched. Does God exist? We are putting all our cards on the table here. The answer will be "Yes, God exists," As human beings in the twentieth century, we certainly can reasonably believe in God—even more so in the Christian God—and perhaps even more easily today than a few decades or centuries ago. For, after so many crises, it is surprising how much has been clarified and how many difficulties in regard to belief in God have melted into the Light that no darkness has overcome.

Strategy: An Introduction to Game Theory (Third Edition)

In this path breaking study, Jasser Auda presents a systems approach to the philosophy and juridical theory of Islamic law based on its purposes, intents, and higher objectives (maqasid). For Islamic rulings to fulfill their original purposes of justice, freedom, rights, common good, and tolerance in today's context, Auda presents maqasid as the heart and the very philosophy of Islamic law. He also introduces a novel method for analysis and critique, one that utilizes relevant features from systems theory, such as, wholeness, multidimensionality, openness, and especially, purposefulness of systems. This book will benefit all those interested in the relationship between Islam and a wide variety of subjects, such as philosophy of law, morality, human rights, interfaith commonality, civil society, integration, development, feminism, modernism, postmodernism, systems theory, and culture.

Does God Exist

Dalam banyak kalangan, filsafat dipersepsi sebagai sebuah pengetahuan yang menyeramkan, susah, ruwet, dan membingungkan. Sehingga sering terdengar ungkapan para penikmat filsafat “Kebingungan adalah awal dari terkuaknya kebenaran”. Namun demikian, benarkah filsafat merupakan suatu disiplin yang tidak membumi. Sehingga tidak banyak orang yang sudi mendekatinya, Secara sederhana, filsafat dapat dimaknai sebagai metodologi berfikir. Dengan demikian, jika berfikirnya secara metodis maka sudah pasti akan dilakukan secara sistematis (terencana, step by step), komprehensif (Menyeluruh /Multiperspektif) dan radikal(Berfikir keras, sampai pada hakikat yang dapat difikirkan). Pada tahap inilah kemudian filsafat seakan menjauh dari kebanyakan orang yang gemar berfikir sederhana. Sementara itu, filsafat sebagai sebuah metodologi berfikir, memiliki tiga cabang (landasan) yang dapat digunakan untuk menetap sebuah proyek sudah layak disebut sebagai ilmu atau tidak. Yaitu pertama disebut landasan ontologis; cabang ini menguak tentang objek apa yang ditelaah ilmu. Bagaimana hubungan antara objek tadi dengan daya tangkap manusia (seperti berpikir, merasa dan mengindra) yang membuahkan pengetahuan. Kedua disebut dengan landasan epistemologis; berusaha menjawab bagaimana proses pengetahuan itu diperoleh. Mulai dari sumber pengetahuan, metode mendapatkan pengetahuan, sampai pada verifikasi / pemeriksaan tentang ilmu yang diperoleh. Sedang yang ketiga disebut dengan landasan aksiologi; landasan ini akan menjawab, untuk apa pengetahuan yang berupa ilmu itu dipergunakan. Bagaimana kaitan anatar acara penggunaan tersebut dengan kaidah-kaidah normal.

Madness, sexuality, power, knowledge—are these facts of life or simply parts of speech? In a series of works of astonishing brilliance, historian Michel Foucault excavated the hidden assumptions that govern the way we live and the way we think. The Archaeology of Knowledge begins at the level of "things as they are" and moves quickly to illuminate the connections between knowledge, language, and action in a style at once profound and personal. A summing up of Foucault's own methodological assumptions, this book is also a first step toward a genealogy of the way we live now. Challenging, at times infuriating, it is an absolutely indispensable guide to one of the most innovative thinkers of our time.

"I grew up reading the Qur'an on my mother's lap," writes Ziauddin Sardar. "It's an experience I share with most Muslim children. And so it is that our connection to the Qur'an is infused with associations of the warmest and most enduring of human bonds." In *Reading the Qur'an*, Sardar—one of Europe's leading public intellectuals—laments that for far too many Muslims, the Qur'an he had learned in his mother's lap has become a stick used for ensuring conformity and suppressing dissenting views. Indeed, some find in the Qur'an justification for misogyny, validation for hatred of others, an obsession with dress and mindless ritual, rules for running modern states. Arguing passionately but reasonably against these trends, Sardar speaks out for a more open, less doctrinaire approach to reading the Qur'an. He contends that the Qur'an is not fixed in stone for all time, but a dynamic text which every generation must encounter anew, and whose relevance and implications for our time we have yet to fully discover. The words of the Qur'an imply movement: the religious life, it tells us, is not about standing still but always striving to make our life, our society, the entire world around us a better place for everyone. Sardar explores the Qur'an from a variety of perspectives, from traditional exegesis to hermeneutics, critical theory, and cultural analysis, drawing fresh and contemporary lessons from the Sacred Text. He also examines what the Qur'an says about such contemporary topics as power and politics, rights of women, suicide, domestic violence, sex, homosexuality, the veil, freedom of expression, and evolution. Ziauddin Sardar opens a new window on this remarkable Sacred Text, in a book that will engage all devout Muslims and will interest anyone curious about the Qur'an and Islam today.

Ilmu pengetahuan dan teknologi telah mengubah dunia; terutama dalam memberantas kemiskinan, kelaparan, penyakit, dan berbagai potret duka dalam kehidupan umat manusia dan alam raya ini. Tradisi keilmuan dan teknologi yang berkembang sekarang merupakan tradisi yang tumbuh dari sistem logika dari Yunani, dilanjutkan dengan logika renaissance Arab, diteruskan dengan logika renaissance Eropa menjadi ilmu dan teknologi mutakhir. Unsur utama dalam tradisi sistem logika adalah rasionalitas dan empiri. Rasionalitas menjadi unsur pertama dalam berilmu pengetahuan, dan empiri menjadi unsur keduanya. Penting dimiliki oleh para calon ilmuwan muda, mahasiswa filsafat, cendekiawan, dosen/pengajar/ pendidik, periset, dan mereka yang menggemari filsafat ilmu untuk menggali lebih banyak ilmu pengetahuan melalui apa yang disebut *Intellectual exercise*; dengan mengungkapkan pikiran dan pengetahuan secara teratur dan sistematis. ----- Penerbit Kencana (Prenadamedia Group)

“THIS BOOK’S purpose is to tell you what a cultivated person is, what the value of the cultured person is to himself, his fellows, and his society, and finally, the kind of things the cultured person knows, thinks, and feels. The point of the book is that

it may succeed in giving you a fair idea of where you stand in relation to the continuum of culture, and help you understand in what further direction you need to proceed.”—Ashley Montagu, Ph. D. This provocative book, first published in 1958, is an inquiry into, and an answer to, three very important questions: 1) What is a cultured man? 2) What does “culture” mean in America? 3) What is YOUR “culture quotient”? Dr. Montagu analyzes and evaluations the first two questions above in a brilliant opening essay. He then provides 50 tests (1,500 questions with answers) which explore YOUR knowledge and attitudes and which enable you not only to determine where you stand as a truly cultured person but also to find out precisely in what directions you need to move to improve your “culture quotient.” From ballet to biology, from psychology to sex, this is an instructive test of your own intellectual status, a challenge and a guide to self-improvement. Dr. Montagu was a professor of anthropology at Rutgers University before retiring in order to devote all his time to writing. He was well-known for his TV and radio appearances, and became a renowned author.

Reaktualisasi cita hukum dalam pembangunan hukum

Sebagai landasan filosofis bagi tegaknya suatu ilmu, peran Filsafat Ilmu dalam

struktur bangunan keilmuan tidakbisa disangsikan lagi. Filsafat ilmu banyak menawarkan pola pikir dengan memperhatikan objek dan subjek ilmu, termasuk pola pikir logika sebagai bagian inheren di dalamnya. Bahkan filsafat ilmu merupakan instrumen dalam proses penggalan suatu ilmu, sekaligus memberikan kerangka pada rangkaian kegiatan keilmuan. Demikian signifikansi filsafat ilmu dalam konteks pengembangan keilmuan. Buku ini merupakan kumpulan tulisan yang saya tulis sejak berada di Mesir, saat strata satu, dan secara khusus saat aktif menulis di Jurnal OASE (Media silaturahmi ICMI Kairo).^É Saat belajar filsafat ilmu di IAIN Bandung, (kini UIN) penulis merilis tema demi tema sesuai judul-judul dalam buku filsafat ilmu. Kemudian saat kuliah program doktoral di UIN Jakarta, tema-tema yang berkaitan kembali satu per satu dirangkai untuk melengkapi keutuhan tematik kajian filsafat ilmu. Dalam buku ini diperkaya penulisannya ketika penulis terlibat mengajar matakuliah filsafat ilmu di IAIN Batusangkar dalam rentang 5 semester. Kekuatan buku ini terletak pada tema pembahasan yang dirilis berdasarkan kebutuhan tematik para mahasiswa pascasarjana. Lewat diskusi-diskusi yang intensif, para mahasiswa memberi sumbangan ide bagi penulisan buku ini yang disampaikan melalui pertanyaan-pertanyaan dalam diskusi. *** Persembahan penerbit Kencana (Prenadamedia Group)

A Primer on Postmodernism

Filsafat Ilmu

Take a deep breath. Air—without it, life on Earth would cease to exist. Though not usually seen, its presence is relied upon. At once both ethereal and physical, air has been associated with flight and spirit, and yet it has progressively become a territory that can be claimed through communications, warfare, travel, and scientific exploration. At the same time, air is no longer a completely reliable part of our daily life: like water, it has become an environmental element that must be watched closely for quality and purity. *A Matter of Air* investigates the meanings of air over the last three centuries, including our modern concern over emissions and climate change. Steven Connor looks at the human relationship with air, both positive and negative. His explorations include the dangers posed by radio atmospherics, poison gas, and haze as well as our continued fascination with effervescence and explosives. Drawing ideas from religion, science, art, literature, and philosophy, *A Matter of Air* creates a comprehensive history of the human perception of air. Thoroughly researched and written with wit and quirky enthusiasm, the book will appeal to a wide range of general readers interested in the environment, human history, and our most essential aspects of life.
