Financial Reporting and Analysis

Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

Starting Out with C++

Wahlen/Baginski/Bradshaw is a balanced, flexible, and complete Financial Statement Analysis book that is written with the premise that students learn financial statement analysis most effectively by performing the analysis on actual companies. Students learn to integrate the concepts from economics, finance, business strategy, accounting, and other business disciplines through the integration of a unique six-step process. CMA Review for Part 3, Strategic Management

Financial Reporting & Analysis (FR&A) by Revsine/Collins/Johnson/Mittelstaedt emphasizes both the process of financial reporting and the analysis of financial statements. This book employs a true "user" perspective by discussing the contracting and decision implications of accounting and this helps readers understand why accounting choices matter and to whom. Revsine, Collins, Johnson, and Mittelstaedt train their readers to be good financial detectives, able to read, use, and interpret the statements and-most importantly understand how and why managers can utilize the flexibility in GAAP to manipulate the numbers for their own purposes.

Financial Statement Analysis

Issues in Financial Accounting addresses the controversial issues in financial accounting that have been debated by the preparers, users, auditors and regulators of financial statements. Henderson provides the best balance of technical and theoretical coverage in any Financial Accounting text on the market today, with its presentation of real-world examples, current debates and the underlying rationale for the accounting concepts demonstrated. Throughout the text, academic studies and professional accounting research are referenced to also provide a critical understanding of historical

debates in financial accounting. The new 15th edition covers significant recent developments to the accounting standards in Australia and is based on the AASB standards and interpretations that have been issued up to the end of 2012. This includes the Australian Accounting Standard Board's (AASB) program of changes to make accounting standards equivalent to International Financial Reporting Standards.

How to Use Finance and Accounting in HR (Collection)

In *Compensation and Benefit Design*, Bashker D. Biswas shows exactly how to bring financial rigor to the crucial "people" decisions associated with compensation and benefit program development. This comprehensive book begins by introducing a valuable Human Resource Life Cycle Model for considering compensation and benefit programs. Next, Biswas thoroughly addresses the acquisition component of compensation, as well as issues related to general compensation, equity compensation, and pension accounting. He assesses the full financial impact of executive compensation programs and employee benefit plans, and discusses the unique issues associated with international HR systems and programs. This book contains a full chapter on HR key indicator reporting, and concludes with detailed coverage of trends in human resource accounting, and the deepening linkages between financial and HR planning. Replete with both full and "mini" case examples throughout, the book also contains chapter-

ending exercises and problems for use by students in HR and finance programs. More than ever before, HR practitioners must empirically demonstrate a clear link between their practices and firm performance. In *Investing in People*, Wayne F. Cascio and John W. Boudreau show exactly how to choose, implement, and use metrics to improve decision-making, optimize organizational effectiveness, and maximize the value of HR investments. They provide powerful techniques for looking inside the HR "black box," implementing human capital metrics that track the effectiveness of talent policies and practices, demonstrating the logical connections to financial and line-of-business, and using HR metrics to drive more effective decision-making. Using their powerful "LAMP" methodology (Logic, Analytics, Measures, and Process), the authors demonstrate how to measure and analyze the value of every area of HR that impacts strategic value.

Financial and Managerial Accounting

Finance is a notoriously difficult core subject for

business undergraduates, which many find difficult to understand. The area has been dominated by large and complex introductory texts - often from the US - which many lecturers find too detailed and unwieldy. This carefully developed and researched text will fill this gap by providing a succinct, modular, UK-focused introduction to the subject of financial management. Quality controlled by an academic review panel, the content and approach has been rigorously developed to answer the needs of non-finance students. The user-friendly features and design will be of great appeal to the many undergraduates who find finance a difficult subject. Examples, models, formulas, and exercises are lucidly and clearly presented, supported by strong pedagogical features - learning objectives, worked examples, key learning points, further reading, practical assignments, references, case studies and teacher's guide. This ensures that Financial Management will prove the most accessible text for business and finance students.
