Pharmacotherapeutics For Advanced Practice Nurse Prescribers

Nursing Pharmacology Made Incredibly Easy, 3rd Edition, provides the nursing student and practicing nurse with information about how drugs act and interact in the treatment of disease. The book focuses on mechanisms of drug action; details specific drugs by pharmacologic class; reviews the nursing process related to each drug category for all body systems, plus pain medications, anti-infective drugs, and cancer drugs; and highlights potentially dangerous interactions, including drug-herb interactions. It does all of this in the award-winning, lighthearted Incredibly Easy! style that makes intimidating concepts thoroughly approachable.

Pharmacology for the Primary Care Provider

This primary textbook for a first course in pharmacology offers an integrated, systems-based, and mechanism-based

approach to understanding drug therapy. Each chapter focuses on a target organ system, begins with a clinical case, and incorporates cell biology, biochemistry, physiology, and pathophysiology to explain how and why different drug classes are effective for diseases in that organ system. Over 400 two-color illustrations show molecular, cellular, biochemical, and pathophysiologic processes underlying diseases and depict targets of drug therapy. Each Second Edition chapter includes a drug summary table presenting mechanism, clinical applications, adverse effects, contraindications, and therapeutic considerations. New chapters explain how drugs produce adverse effects and describe the life cycle of drug development. The fully searchable online text and an image bank are available on thePoint.

Taylor's Handbook of Clinical Nursing Skills

Designed with the student in mind, and easy to read and use, the new 2nd edition of Lilley will cover all the key pharmacology content needed by Canadian nursing students. Known for its appealing layout, plenty of photos, and numerous helpful boxed features, Lilley helps students manage the extremely detailed subject of pharmacology. This edition focuses on the role of nurses and their practices in culturally diverse Canada, and includes new content on natural health products and ethnocultural considerations. Evidence-Informed Practice Boxes: Provide a bridge between research evidence and its relevance to nursing practice Laboratory Values Related to Drug Therapy: Provide normal ranges and values for specific lab tests, and rationales for lab assessments in relation to specific drug therapy UNIQUE! In My Family Boxes: Written by nursing students of various ethnocultural backgrounds, relaying their cultural health beliefs and practices and drug use Preventing Medication Errors Boxes: Reinforce concepts introduced in the medication errors chapter and relate them to specific common errors that occur in clinical practice. Special Populations: Women: In addition to other special populations, some boxes specifically focus on women's health UNIQUE! Tear out cards from Mosby's Pharmacology Memory NoteCards Increased pathophysiology coverage: Introduces key chapters to provide students with a brief overview before launching into drug information Chapters on Antibiotics and Antineoplastics: Subjects have both been divided into two chapters each, making difficult material easier to digest for students Generic and trade drug names are used throughout - with a new Drug Index at the back of the book Emphasis on nursing roles and practices in Canada More info on natural health products More info on ethnocultural considerations

Professional Issues in Nursing

Using an approach that fosters critical thinking and values clarification, this textbook examines the full range of professional issues facing contemporary nursing. Coverage includes critical issues such as the nursing shortage, mandatory staffing ratios, violence in nursing, legal and ethical issues, plus the latest HIPAA regulations, career advancement and evaluations, and best practices for today and the future. This edition includes two NEW chapters: 1) a NEW chapter on developing effective leaders to meet 21st century healthcare challenges, and 2) a NEW chapter on the use of residencies for new graduate nurses as a transition to practice. In addition to these exciting additions, content has been updated throughout the book to reflect cutting-edge trends in healthcare including the impact of healthcare reform, and recommendations from the Institute of Medicine (IOM). This edition promises to be an integral tool to providing effective nursing care in an increasingly global, rapidly changing, technology driven world.

Lippincott Photo Atlas of Medication Administration

This comprehensive, up-to-date text introduces pharmacology from an interdisciplinary perspective, illuminating core concepts of anatomy, physiology, and pathology that make drug therapy understandable to all nursing students. Organized around body systems and diseases, it clearly places each drug in context. Its focused nursing content includes easy-to-read flowcharts that illuminate assessment, diagnosis, planning, interventions, patient education, discharge planning, and evaluation. This edition contains new chapters on the nursing process and drugs for degenerative diseases and muscles; new Safety Alerts; new coverage of weight loss surgery and drugs; revamped NCLEX-PN® questions; a brand-new glossary, and many other improvements. Some new features to this edition include: New! Full chapter on the nursing process New!

All-new chapter on drugs for degenerative diseases and muscles New! Safety Alerts call attention to medication errors and Joint Commission safety guidelines Updated! End-of-chapter NCLEX-PN® questions completely revamped to reflect the latest practice New! Scenario-based Case Study Questions help students apply pharmacology and nursing care to specific clients and circumstances

Comprehensive Neonatal Nursing Care

Pharmacology for Health Professionals, Second Edition is specifically written for students who may not directly administer drugs in their chosen health profession, but who will be involved in patient care and therefore need to understand basic pharmacological principles and practices

Nursing Pharmacology Made Incredibly Easy

Lippincott Fast Facts for NCLEX-RN, 2nd edition is a quick and easy review for nursing students to prepare for the licensing examination. Thousands of facts in this resource cover all aspects of nursing care. Each up-to-date fact has been thoroughly reviewed for validity, conciseness, and alignment with the 2016 NCSBN NCLEX-RN test plan. Content, features, and functionality of the resource are aligned with PassPoint RN, making this an ideal print-electronic study package.

Pharmacology for Nurses

The only pharmacology resource specifically written by and for nurse practitioners, this new edition provides a greater emphasis on prototype drugs while retaining its comprehensive approach to the pharmacology content needed by the primary care provider. New features include prototype drug lists in the coverage of drug classes that receive expanded coverage, detailed patient teaching guidelines, expanded content in both the geriatric and pediatric chapters, a special icon identifying the Top 200 Drugs, and highlighted Clinical Alerts. Comprehensive coverage is provided of all drugs commonly prescribed and used in the primary care setting. Prototype drugs are presented first in each drug class, with expanded coverage of these agents. Clear explanations describe how each drug in a class differs from its prototype. Detailed information shows how to provide effective patient teaching, as well as how to gain patient compliance. Chapters focus on the practitioner's role in patient teaching, drug action, and drug therapy. Online Resources are provided at the end of each chapter. The Top 200 Drugs are described according to the number of U.S. prescriptions dispensed. Five new units improve the organization of material: Renal/Genitourinary Agents (Unit 8); Psychotropic Agents (Unit 11); Endocrine Agents (Unit 12); Female Reproductive Agents (Unit 13); and Health Promotion (Unit 15). New chapters examine over-the-counter medications, compliance and the therapeutic experiment, overview of the nervous system, substance abuse, treatment of

common infections, weight management, and complementary and alternative treatments. Reorganized and redesigned format and headings are more consistent and easy to follow. Content has been expanded in the geriatric and pediatric "special populations" chapters (Ch. 6 and 7). More concise coverage of disease processes features clearer ties to the Mechanism of Action sections. 25 new figures have been added to the pathophysiology and Mechanisms of Action sections. A Table of Common Interactions is included on the inside of the back cover.

Get ready for your neonatal intensive care nursing certification exam with the only review developed in collaboration with three leading nursing organizations! From AACN, AWHONN, and NANN, Certification and Core Review for Neonatal Intensive Care Nursing, 5th Edition prepares you for your examination with hundreds of high-quality study questions and realistic test simulation. Based on the latest test plans of the AACN's CCRN®-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core Curriculum and reflect the latest evidence, essential knowledge, and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam! Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Realistic exam practice is offered through 675 total questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Online flexibility allows you to organize review questions and test format by your preferred examination, either the AACN or NCC. Online exam simulation — included free with each new copy of the book — mirrors the test-taking experience with an interactive, timed format. Customized study lets you choose whether to work through online questions in Study Mode or Examination Mode. Online remediation includes rationales for both correct and incorrect answers, and in-book remediation provides rationales for correct answers. A compact, portable size makes the book easier to study anytime, anywhere. 225 NEW review questions include 75 in the book and 150 additional online questions on the Evolve companion website. Thoroughly UPDATED review content reflects AACN's latest CCRN®-Neonatal exam and the NCC's latest Neonatal Intensive Care Nursing (RNC-NIC) exam, information in Core Curriculum for Neonatal Intensive Care Nursing, 5th Edition, and the newest evidence-based guidelines for neonatal critical care. NEW! Three new chapters include Grieving Process, Quality Improvement, and Facilitation of Learning. NEW focus on culturally sensitive care is included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines. Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.
