The Force is strong with this series! Introducing a line of workbooks that marries the iconic popularity of Star Wars with the unique mix of editorial quality, fun presentation, and rigorous educational standards that Workman applied to the BRAIN QUEST Workbooks. Twelve titles launch the series—three each for Pre-K through 2nd Grade—and dig deep into core subjects, including numbers, ABCs, phonics, and reading readiness for younger grades, and math, reading, and writing for the older ones. The material, which aligns with national Common Core State Standards, is designed to reinforce essential concepts and lessons taught in schools. Any child, not just fans of Star Wars—but yes, those fans will be especially delighted (as will reluctant learners)—will love the *ÒÁ* is for Anakin approach to phonics. Kids will practice learning numbers by counting and circling X-wing starfighters and clone troopers. Master place values by sorting groups of Wookiees. There are math problems—Yoda is holding 7 lightsabers. 5 of the lightsabers are blue. The rest are green. How many green lightsabers is he holding? And Language Arts—Circle the correct homophone in this sentence: Luke is a Jedi knight/night. Featuring favorite

characters like Luke Skywalker, Queen Amidala, Yoda, and Obi-Wan Kenobi, and other creatures, monsters, Jedi, and Sith, the workbooks are filled with thousands of original illustrations drawing from all six Star Wars movies and the expanded Star Wars universe. Learn well, you will.

At 4th grade, children are introduced to cursive writing. The reason is because cursive writing comes with benefits that are absent in printing. For example, writing in cursive helps improve brain development particularly in thinking and in working memory. It is also responsible in activating both hemispheres of the brain for synapses and synchronicity. Use this workbook for cursive writing practice.

This is because he/she would have to write per letter; whereas in cursive, there is a need to write per word. The continuity will help in the more effective expression of ideas and thoughts. competitors don't have numbers to practice, just letters. For the ultimate practice, write short stories in cursive after story prompts This is a cursive handwriting workbook for kids grades 2-5. It is important to know that neuroscientists believe that learning cursive is developmentally beneficial for the human brain at any stage. Writing by hand, especially in cursive, is vital in training the brain to practice and improve more skills and senses all at once: hand-eye coordination, patience, self-control, and a sense of involvement, and ownership. All this is done while learning more about the English language. The book starts with the basic alphabet and numbers to develop the required muscle memory and progressively advances to words, sentences, then finally, whole stories. It builds an understanding of how to form each cursive letter and number correctly and connect them. This book takes the writer on a skill building journey of: Learning the dot-to-dot method, then tracing the cursive letters and numbers, then introducing free handwriting Connecting multiple letter words, some short, some long, in cursive Advancing to writing simple and complex sentences in cursive The included story prompts give a great foundation for writing cursive in paragraphs A free practice section for writing anything you need in cursive In this workbook, you will find various writing exercises in over 200 pages. The lines in the book are wide/legal ruled. The book is 8.5 x 11 inches, giving a wide berth to practice. The letter size is customized for kids to help with learning cursive writing on ruled lines. What's included? Part 1 starts of with the alphabet where writing letters in both lowercase and capital forms are practiced through tracing and

connecting the dots. Each letter is presented with directional arrows to guide the hand movements. This book has plenty of space with a whole page for practicing each letter. Then it gives lessons on writing all numbers in cursive form as well once letters are learned. Part 2 builds on the previous knowledge with word building. A list of words starting with each letter is first practiced so that one can learn how to connect different letters longer. Common words for family, relationships, common items, directions, times, and such are presented in the second half of Part 2. Short words and longer words are included in each list. Part 3 is all about sentences. Common sentences are traced, and then free writing of the sentence finishes each. This is so that one can be comfortable writing longer in preparation for the next section. Part 4 puts it all together by giving story prompts. Initiative and creativity are tested with this ultimate practice of cursive writing. A couple pages for each story prompt is available to make a short story. Once finished, be confident that you have learned cursive extensively enough. Part 5 is a collection of empty, free practice pages once you have mastered cursive.
