A Manual of Physiology
Manual of Histological Techniques
A Manual of Physiology with Practical Exercises
A Manual of Pathology
A Manual of physiology
Technical Manual
A Manual of Histology
Design News
Manual of Human and Comparative Histology
A Manual of Physiology with Practical Exercises
Manual of Histologic and Special Staining Technics
A Handbook of practical treatment v. 4, 1917
A Manual of normal histology and organography
Manual of Bacteriology
Manual of Techniques in Invertebrate Pathology
Manual of Pathological Histology: pt. 1-2. Special pathological histology; lesions of the organs
A Manual of Human Physiology
A Manual of Physiology
Manual of Medicine: Diseases of the respiratory and of the circulatory systems
Manual of vital function testing methods and their interpretation
A Manual of Medicine: Diseases of the respiratory and of the circulatory systems
A Manual of Bacteriology, Clinical and Applied
A Manual of Pathological Histology
The Students' Manual of Histology
Manual of General Pathology
A Manual of General Or Experimental Pathology for Students and Practitioners
A Manual of histology
Manual for the Physiological Laboratory
Physiology; a Manual for Students and Practitioners
A Manual of Pharmacology and Its Applications to Therapeutics and Toxicology
A Manual of Veterinary Physiology
Manual of human embryology v.1, 1910
Post-mortem Pathology
Manual of human and comparative histology v.3 1873
A Manual of Pathological Histology to Serve as an Introd. to the Study of Morbid Anatomy
Manual of Physiology for Students and Practitioners
Manual of Human Embryology
A Manual of pathological histology to serve as an introduction to the study of morbid anatomy v. 1 1872
A Manual of Veterinary Physiology
A Manual of Histology

A Manual of normal histology and organography

Manual of Bacteriology

Manual of Techniques in Invertebrate Pathology

Manual of Pathological Histology: pt. 1-2. Special pathological histology; lesions of the organs

A Manual of Human Physiology

A Manual of Physiology

In this manual, author has included the molecular techniques, immunohistochemistry, cell blocks, and immunofluorescence along with the conventional techniques. For students' easy understanding; many figures, charts, diagrams and tables have been included. At the same time, the volume of the book has been restricted; so that students do not become overburdened during preparation of examination. [Ed.].

Manual of Medicine: Diseases of the respiratory and of the circulatory systems

Manual of vital function testing methods and their interpretation

A Manual of Medicine: Diseases of the respiratory and of the circulatory systems

A Manual of Bacteriology, Clinical and Applied

A Manual of Pathological Histology

The Students' Manual of Histology

Manual of General Pathology

A Manual of General Or Experimental Pathology for Students and Practitioners

The second edition of Manual of Techniques in Invertebrate Pathology is written by an international group of experts that contribute a broad array of techniques for the identification, isolation, culture, bioassay, propagation, and storage of the major groups of entomopathogens. The manual provides general and specific background to experienced insect pathologists, biologists, and entomologists who work with pathogen groups that are new to them. It is also useful as a laboratory manual for courses in insect pathology and biological control and related areas of study. Safety testing of entomopathogens in mammals and complementary techniques for the preparation of entomopathogens are included as well as broader methods for the study of specimens such as microscopy and molecular techniques. This manual concentrates primarily on practical step-by-step aspects of the techniques, but also provides the reader with a short history, rationale for usage, guides to supplemental literature, plus recipes for media, fixatives, and stains. Step-by-step instructions for the latest techniques on how to isolate, identify, culture, bioassay and store the major groups of entomopathogens New edition fully updated to address changes in the taxonomy of the vast majority of taxa Discussion of safety testing of entomopathogens in mammals and also broader methods such as microscopy and molecular techniques Provides extensive supplemental literature and recipes for media, fixatives and stains

A Manual of histology

Manual for the Physiological Laboratory

Physiology; a Manual for Students and Practitioners

A Manual of Pharmacology and Its Applications to Therapeutics and Toxicology

A Manual of Veterinary Physiology

Manual of human embryology v.1, 1910
