This book shares the experiences and insight of a Montessori educator over the course of her 40 years as a Montessori teacher, administrator, school owner, and Montessori teacher trainer. It addresses the need for parents and educators to better understand the Montessori philosophy and to embrace it as a means to solve the problems inherent in the traditional structure of education in the United States. Despite the fact that Dr. Maria Montessori created this method over 100 years ago, most of her discoveries about how children learn and the effect of their environment on their developing brains have only recently been validated by current technology and specialists in brain development. These recent discoveries and the real-world success of numerous high-profile Montessori-educated entrepreneurs have helped the popularity of this educational philosophy. Turning Education Inside-Out: Confessions of a Montessori Principal shows the impact that the Montessori experience has on the developing child, clears up misconceptions about exactly what Montessori is, and helps prospective parents determine if Montessori is right for their child. Montessori educators will also find the author's insights into the challenges of successfully implementing the Montessori philosophy into the classroom and school to be helpful in their own journey.

An updated edition—with a new preface—of the bestselling parenting classic by the author of "BRAINSTORM: The Power and Purpose of the Teenage Brain" In Parenting from the Inside Out, child psychiatrist Daniel J. Siegel, M.D., and early childhood expert Mary Hartzell, M.Ed., explore the extent to which our childhood experiences shape the way we parent. Drawing on stunning new findings in neurobiology and attachment research, they explain how interpersonal relationships directly impact the development of the brain, and offer parents a step-by-step approach to forming a deeper understanding of their own life stories, which will help them raise compassionate and resilient children. Born out of a series of parents' workshops that combined Siegel's cutting-edge research on how communication impacts brain development with Hartzell's decades of experience as a child-development specialist and parent educator, this book guides parents through creating the necessary foundations for loving and secure relationships with their children.
