Natasha is ten years old when her parents take her back to Islamabad. Born and bred in Los Angeles, she is less than keen on the move. Slowly she assimilates, guided by a grandmother who is determined to transform her and discovering the customary traditions through funerals and weddings. When an early marriage presents the opportunity to move back to the land of her birth, however, Natasha jumps at it, only to be disappointed by the less than favorable treatment of Muslims she witnesses in post 9/11 America. Spanning a decade (1994-2004), Rodeo Drive to Raja Bazaar is a social and political portrait of contemporary

Pakistan and its immigrant population in America. With its mixture of the rich, poor and middle classes, democracy interspersed with military rule, liberals facing off with conservatives, and increasing interplay of religion, the novel is at once humorous, thought-provoking, and an easy read for all ages.

American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic

Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, *Made in Korea* takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

When I wrote the book 'Alcohol Lied To Me, ' I had no idea the impact it would make to problem drinkers around the world. I certainly had no idea it would end up helping hundreds of thousands of people out of the miserable loop of alcoholism. I only wanted to document how I had finally dealt with my problem without any of the usual pain and struggle. Alcohol Lied To Me is how I escaped the trap of functional alcoholism without any of those embarrassing group meetings, no dangerous medication, expensive rehab, or ineffective willpower. It has been a savior to so many successful, loving, caring, and amazing people whose only flaw is being in a loop with their drinking. It offers a compelling alternative solution to the twelve steps. 1.No need to label yourself an alcoholic2.No religion or giving your problem to a higher power3.A logical and intelligent approach to problem drinking4.It's proven effective5.The only Trustpilot 5-star rated quit drinking program This book features all the best advice of 'Alcohol Lied To Me, ' and the secrets I share with attendees of Quit Drinking Bootcamp. Plus all the great sober living tips I have picked up over a decade of helping problem drinkers around the world. The truth is, this social pleasantry is a drug and a dangerous one at that.

Alcohol kills millions of people every year, and yet we are repeatedly made to feel that if you refuse to join in with the consumption of attractively packaged poison, it's you who has a problem. In the western world, we live in a bubble of unreality around this drug. When you write down the nonsense, we believe about this drug; it looks quite insane.-We toast our 'good health' with a liquid proven to cause seven significant forms of cancer. -We drink when we feel down, even though alcohol is a depressant.-Alcohol is used to help us with insomnia, even though we know it disturbs sleep.-Drinkers are suspicious of the people who choose not to drink the poison, not the other way around. We have got ourselves into a bizarre situation where we are looking at black and insisting it is white. It's the unpicking of this universal distortion that explains why this approach has been so useful for so many problem drinkers around the world. Reading this book is a bit like going to see Penn And Teller, the famous illusionists. First they wow you with a spectacular illusion and you can see no other explanation than to call it magic. However, then they come back on the stage and show you how the trick was performed. From this point on, you will never be able to be fooled by that illusion again.It doesn't matter how long you live; you will never be able to label that routine as 'magic' again. Even if you reach the ripe old age of 100-years-old, that piece of theatre will fail to fool you again. In this book I show you how the alcohol trick is being performed. I show you why you believe that drinking helps you relax and cope with life. I reveal why you think that alcohol enables you to be more sociable and confident in public. I shine the spotlight of truth on all the nonsense and illusion of this drug. I proudly

reveal myself to be the man who forever spoils alcohol for you, for good! While it is true that you can go through this book, complete my online course, or come to Bootcamp and still go back to drinking after. However, it will not be the same. You will never be able to drink using the old excuses and justification you previously employed to explain your actions. This is the book that changes your view of alcohol, forever! www.StopDrinkingExpert.com

Made in Korea

More than ever, the economic health of a country depends upon the skills, knowledge, and capacities of its people. How does a person acquire these human assets and how can we promote their development? *Securing the Future* assembles an interdisciplinary team of scholars to investigate the full range of factors—pediatric, psychological, social, and economic—that bear on a child's development into a well-adjusted, economically productive member of society. A central purpose of the volume is to identify sound interventions that will boost human assets, particularly among the disadvantaged. The book provides a comprehensive evaluation of current initiatives and offers a wealth of new suggestions for effective public and private investments in child development. While children from affluent, highly educated families have good quality child care and an expensive education provided for them, children from poor families make do with informal child care and a public school system that does not always meet

their needs. How might we best redress this growing imbalance? The contributors to this volume recommend policies that treat academic attainment together with psychological development and social adjustment. Mentoring programs, for example, promote better school performance by first fostering a young person's motivation to learn. Investments made early in life, such as preschool education, are shown to have the greatest impact on later learning for the least cost. In their focus upon children, however, the authors do not neglect the important links between generations. Poverty and inequality harm the development of parents and children alike. Interventions that empower parents to fight for better services and better schools are also of great benefit to their children. *Securing the Future* shows how investments in child development are both a means to an end and an end in themselves. They benefit the child directly and they also help that child contribute to the well-being of society. This book points us toward more effective strategies for promoting the economic success and the social cohesion of future generations. A Volume in the Ford Foundation Series on Asset Building

Enterprise Networks and Logistics for Agile Manufacturing presents a focused collection of quality chapters on state-of-the-art research efforts in the areas of enterprise networks and logistics, as well as their practical applications towards agile manufacturing. With the increasing decentralisation of manufacturing systems and outsourcing of processes, more robust and practical approaches and systems are needed to support agile manufacturing operations. Enterprise Networks and Logistics for Agile Manufacturing consists of two major sections: the first presents a broad-based review of the key areas of research in enterprise networks and logistics; the second focuses on an in-depth treatment of a particular methodology or system relevant to the book title. Examples include: • sustainable green supply chain; • value creation and supplier selection; • extended enterprise network management; • reverse logistics; and • innovative supply chain systems. The authors take into account the need to pose intellectual challenges while retaining a balanced approach in terms of scope versus depth and theory versus applications. Enterprise Networks and Logistics for Agile Manufacturing can be beneficial to academic researchers, practicing engineers and managers, and graduate students with an interest in any manufacturing sectors. It can enable them to better understand the present state and future trends of research in this important area, in order to position themselves strategically for future challenges as we enter the era of agile and distributed manufacturing.

"Like animals, plants and book reviewers, words can become extinct, but Grambs is here to salvage the most missed of the lexical dinosaurs."—Patricia Holt, San Francisco Chronicle We often hear about the richness of the English language, how many more words it contains than French or German. And yet modern desk dictionaries are the result of a paring away of that glory, so that merely standard, functional, current words remain. The price we pay for such convenience is the thousands of delightful words we never see or hear. This book is an effort to save some of those words applicable to everyday life and countless word games from extinction. From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the

most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955–1957 Chevrolets, the “Forward Look” Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company’s models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

The year 1968 was the year of the Tet Offensive including Khe Sanh and Hue City. These were momentous events in the course of the war and they occurred in the first three months of the year. This book, however, documents that 1968 was more than just the Tet Offensive. The bloodiest month of the war for the U.S. forces was not January nor February 1968, but May 1968 when the Communists launched what was called their “Mini-Tet” offensive. This was followed by a second “Mini-Tet” offensive during the late summer which also was repulsed at heavy cost to both sides. By the end of the year, the U.S. forces in South Vietnam’s I Corps, under the III Marine Amphibious Force (III MAF), had regained the offensive. By December, enemy-initiated attacks had fallen to their lowest level in two years. Still, there was no talk of victory. The Communist forces remained a formidable foe and a limit had been drawn on the level of American participation in the war. Although largely written from the perspective of III MAF and the ground war in I Corps, the volume also treats the activities of Marines with the Seventh Fleet Special Landing Force, activities of Marine advisors to South Vietnamese forces, and other Marine involvement in the war. Separate chapters cover Marine aviation and the single manager controversy, artillery, logistics, manpower, and

This book investigates how chess-players find good ideas. Amatzia Avni, a psychologist by profession, pursues this goal by interviewing top players and analysts. The discussion focuses on their most interesting and instructive games and compositions. Avni has been careful to allow his interviewees to convey their own thoughts, rather than direct their answers to comply with any pre-existing theories. We experience the events on the board through the vivid recollections of the player. This gives us a realistic view of each struggle and how the critical decisions were really made. Avni also presents the players with some unfamiliar positions, and records their reactions upon encountering these new situations. Once we have heard from the grandmasters, Avni discusses the essence of what was said, and provides some insights and recommendations. The interviewees include famous grandmasters such as Boris Gelfand, Ilia Smirin and Lev Psakhis.

"the present book will be of great value for both newcomers to the field and mature active researchers by serving as a coherent and timely introduction to

some of the modern approaches, ideas, results, emerging understanding, and many open questions in this fascinating field of polymer glasses, supercooled liquids, and thin films" –Kenneth S. Schweizer, Morris Professor of Materials Science & Engineering, University of Illinois at Urbana-Champaign (from the Foreword) This book provides a timely and comprehensive overview of molecular level insights into polymer glasses in confined geometries and under deformation. Polymer glasses have become ubiquitous to our daily life, from the polycarbonate eyeglass lenses on the end of our nose to large acrylic glass panes holding water in aquarium tanks, with advantages over glass in that they are lightweight and easy to manufacture, while remaining transparent and rigid. The contents include an introduction to the field, as well as state of the art investigations. Chapters delve into studies of commonalities across different types of glass formers (polymers, small molecules, colloids, and granular materials), which have enabled microscopic and molecular level frameworks to be developed. The authors show how glass formers are modeled across different systems, thereby leading to treatments for polymer glasses with first-principle based approaches and molecular level detail. Readers across disciplines will benefit from this topical overview summarizing the key areas of polymer glasses, alongside an introduction to the main principles and approaches.
