The latest edition of this essential text provides a comprehensive overview of the unique pediatric issues of inflammatory bowel disease. Through new and thoroughly revised chapters, the volume features updates regarding pathogenesis, clinic features, and management, with an emphasis on recent understanding of pharmacokinetics and the utilization of cutting edge therapeutic monitoring to maximize efficacy of medical management. The new edition also highlights newer, recently approved drugs, emerging therapies, and the most recent recommendations regarding post-operative management for patients who ultimately require surgery. Written by experts in the field, Pediatric Inflammatory Bowel Disease, Third Edition is a valuable resource for both pediatric and adult gastroenterologists involved in the care of children with inflammatory bowel disease.

Knight's Forensic Pathology Fourth Edition

California School District Financial Analyses

The fourth edition of Knight's Forensic Pathology continues to be the definitive international resource for those in training and in practice, covering all aspects of the medico-legal autopsy, including the cause and time of death, interpretation of wounds and every other facet of the investigation of a fatality. The contents are intended to lead the pathologist – and in some countries, the non-pathologist – through the procedures needed in the examination of a body found under obscure, suspicious or even criminal circumstances. Although police procedures and the habits of pathologists may vary from country to country, the philosophy and techniques presented in this book offer a guide to good practices that can be modified according to local circumstances. In this new edition the text has been thoroughly updated and is complemented by the addition of over 200 new colour illustrations. It maintains the praised tradition of clarity and readability established

since Prof. Bernard Knight's first edition was published in 1991, with an emphasis on the practical application of knowledge and research findings and the avoidance of over-interpretation.
