Personnel Management Abstracts

Leadership Agility is the master competency needed for sustained success in today's complex, fast-paced business environment. Richly illustrated with stories based on original research and decades of work with clients, this groundbreaking book identifies five levels that leaders move through in developing their agility. Significantly, only 10% have mastered the level of agility needed for consistent effectiveness in our turbulent era of global competition. Written in an engaging, down-to-earth style, this book not only provides a map that guides readers in identifying their current level of agility. It also provides practical advice and concrete examples that show managers and leadership development professionals how they can bring greater agility to the initiatives they take every day.

It begins by defining what is meant by assessment, outcome, evaluation and measurement and discussing the complexity of therapy assessment and measurement, including the challenge of measuring human behaviour and the impact of factors such as task demand and context, including the environment. Methods of data collection (e.g. observation, interview, standardised testing) and sources (e.g. self-report, proxy) for collecting information about clients are then reviewed, and the main purposes of assessment (e.g. descriptive, evaluative, predictive, discriminative) presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

In Energy Leadership, renowned coach Bruce D. Schneider teaches how to understand the most important personal resource of all -- energy, and shows how to harness it to achieve success in the workplace, the home, and in the world at large. This engaging and fast-paced story clearly explains how managers and leaders from all walks of life can use the principles of Energy Leadership to inspire themselves and others to achieve extraordinary results in whatever they do. The author provides insight into a cutting edge coaching process he has developed, which has positively impacted the lives of tens of thousands of people in both the corporate and private sectors. You will learn how to: Recognize the seven distinct levels that are the key to understanding why everyone thinks and acts the way they do, in life and specifically within the workplace. Distinguish truly effective leaders from those who deplete the energy of the people around them, and specific techniques to shift energy levels to inspire

A Blueprint for Building Entrepreneurial Organizations
Nobody needs to tell you that in the new economy, managers using conventional strategies are losing out to smart, fast, entrepreneurial competitors who move on ideas others overlook and who confidently act while others dither. Are the managers of leading companies simply doomed to let this happen? Not at all, argue Rita Gunther McGrath and Ian MacMillan. The fundamental problem is that the tools, training, and conceptual frameworks that work for business-as-usual can't, and don't, work when your main challenge is to bury old business models and aggressively create completely new ones. To succeed, today's strategists need the thought process and discipline that are second nature to successful

entrepreneurs. The Entrepreneurial Mindset offers a refreshingly practical blueprint for thinking and acting in environments that are fast-paced, rapidly changing, and highly uncertain. It provides both a guide to energizing the organization to find tomorrow's opportunities and a set of entrepreneurial principles you can use personally to transform the arenas in which you compete. Using lessons drawn from leading entrepreneurs and entrepreneurial companies, The Entrepreneurial Mindset presents a set of practices for capitalizing on uncertainty and rapid change. Like McGrath and MacMillan's bestselling Harvard Business Review articles, such as "Discovery-Driven Planning," the book provides simple but powerful ways to stop acting by the old rules and start thinking with the discipline of habitual entrepreneurs. The Entrepreneurial Mindset will show you how to:

- * Eliminate paralyzing uncertainty by creating an entrepreneurial frame that shapes a shared understanding of what is to be accomplished and what would be worthwhile
- * Create a richly stocked opportunity register in which you mobilize great ideas for redesigning existing products, finding new sources of differentiation, resegmenting existing markets, reconfiguring market spaces, and seizing the huge upside potential of breakthroughs
- * Build a dynamic portfolio of businesses and options that continuously move your organization toward the future
- * Execute dynamically your ideas so that you can move fast, with confidence and without undue risk
- * Develop your own way of leading with an entrepreneurial mindset to create a vibrant entrepreneurial climate within your organization

The Entrepreneurial Mindset is about succeeding in an unpredictable world. It will

help everyone from independent entrepreneurs to managers of large corporations develop insights that others overlook and act on them to build the truly entrepreneurial organizations of the future.

Introduction to Leadership

The responsibilities and skills of college administrators and training needs and programs are discussed. After tracing typical career paths of administrators, skills and knowledge that they need are identified, based in part on similar positions from government, service organizations, and the military. The list of administrators' responsibilities also serves as a checklist for analyzing professional development needs. Specific responsibilities are indicated under the heading of visions, goals, and action; responsibility for operations; and responsibility for people. The different programs available nationwide are identified and organized into four types of models based on educational mission and goals and length: national institutes and internships; administrative conferences; conventions; and workshops, meetings, and seminars. Other ways to categorize programs include participant's job level, functional area, and content. Uses, benefits, and problems of professional development programs are also considered. Recommendations are offered for implementing a cohesive on-campus program to coordinate overall staff development, from middle managers to institutional leaders. 112 references. (SW)

Applying the Concept and Time-Out sidebars offer opportunities for critical thinking by having the student think about how specific concepts relate to a sport situation or to the student's actual experiences in sports, including part-time jobs, full-time jobs, internships, and volunteer work. Self-Assessment exercises offer insight into students' strengths and weaknesses and how to address shortcomings. An enhanced web study guide is integrated with the text to facilitate a more interactive setting with which to complete many of the learning activities. Several of the exercises require students to visit a sport organization and answer questions to gain a better understanding of sport management. Skill-Builder Exercises present a variety of scenarios and provide step-by-step guidance on handling day-to-day situations such as setting priorities, conducting job interviews, handling conflict, and coaching employees to better performance. Sports and Social Media Exercises offer Internet-based activities that expose students to the role of social media in managing a sport organization. Students are required to use popular social media sites such as Facebook, Twitter, and LinkedIn and visit sport websites. Game Plan for Starting a Sport Business cases put students in the driver's seat and ask them to perform managerial activities such as developing an organization structure and formulating ideas on how to lead their employees. The web study guide allows students to complete most of the learning activities online or download them and then submit them to the

Students will appreciate the opportunity to begin building a solid foundation for a fulfilling career in sport management.

The Goal

From the bestselling authors of The Leadership Challenge and over a dozen award winning leadership books, James M. Kouzes and Barry Z. Posner have written a new book that examines a fundamental question: How do people learn leadership? How do they learn to become leaders? Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader (ISBN: 978-1-119-14428-1; Wiley; May 2016) is a comprehensive guide to unleashing the inner-leader in us all and to building a solid foundation for a lifetime of leadership growth and mastery. The book offers a concrete framework to help individuals of all levels, functions, and backgrounds take charge of their own leadership development and become the best leaders they can be. Arguing that all individuals are born with the capacity to lead, Kouzes and Posner provide readers with a practical series of actions and specific coaching tips for harnessing that capacity and creating a context in which they can excel., Supported by over 30 years of research, from over

seventy countries, and with examples from real-world leaders, Learning Leadership is a clarion call to unleash the leadership potential that is already present in today's society. According to Kouzes and Posner, "Leadership makes a significant difference in levels of engagement and commitment and is perhaps the most important asset in every organization, yet recent research points to a shortage of leaders. It is a serious global concern. The world needs more exemplary leaders in order to promote high-performing workplaces and inspire feelings of greater self-worth and meaningfulness. The shortage, however, is not because of the lack of potential talent. The people are out there, the eagerness is out there, and the capability is out there. The shortage results from prevailing myths—myths about talent, strengths, position, self-reliance, and effort—that inhibit the vast majority of leaders from shining and organizations from realizing the full benefits of the talent they already have." Learning Leadership provides readers with evidence-based strategies to ignite the habit of continuous improvement and the mindset of becoming the best leaders they can be. Emerging leaders, as well as leadership developers, internal and external coaches and trainers, and other human resource professionals will learn from first-hand stories and practical examples so that they can deeply understand and apply the fundamental for becoming the best leaders they can be. Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader is divided into digestible bite-sized chapters that encourage daily actions to becoming a better leader. Key takeaways from the book include: Believe in Yourself. Believing in oneself is the

essential first step in developing leadership competencies. The best leaders are learners, and they can't achieve mastery until and unless they truly decide that inside them there is a person who can make and difference and learn to be a better leader than they are right now. **Aspire to Excel.** To become an exemplary leader, people have to determine what they care most about and why they want to lead. Leaders with values-based motivations are the most likely to excel. They also must have a clear image of the kind of leader they want to be in the future—and the legacy they want to leave for others. **Challenge Yourself.** Challenging oneself is critical to learning leadership. Leaders have to seek new experiences and test themselves. There will be inevitable setbacks and failures along the way that require curiosity, grit, courage, and resilience in order to persist in learning and becoming the best. **Engage Support.** One can't lead alone, and one can't learn alone. It is essential to get support and coaching on the path to achieving excellence. Whether it's family, managers at work, or professional coaches, leaders need the advice, feedback, care, and support of others. **Practice Deliberately.** No one gets better at anything without continuous practice. Exemplary leaders spend more time practicing than ordinary leaders. Simply being in the role of a leader is insufficient. To achieve mastery, leaders must set improvement goals, participate in designed learning experiences, ask for feedback, and get coaching. They also put in the time every day and make learning leadership a daily habit. Kouzes and Posner offer unrivaled insights into what it means to become an exemplary leader in today's world with their original research and over 30 years of

experience studying the practices of extraordinary leadership. They show that anyone can become a better leader if they believe in themselves, aspire to excel, challenge themselves, to grow, engage the support of others, and practice deliberately. Learning Leadership challenges readers to do the meaningful and disciplined work necessary to becoming the best they can, using a new mindset and toolkit that can make extraordinary things happen. It's not the once-in-a-while transformational acts that demonstrate leadership. It's the little things that one does day in and day out that pave the path to greatness.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch

"Business Schools Face Test of Faith." "Is It Time to Retrain B-Schools?" As these headlines make clear, business education is at a major crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of Rethinking the MBA, and MBA programs must change with it. Increasingly, managers and recruiters are questioning conventional business

education. Their concerns? Among other things, MBA programs aren't giving students the heightened cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors:

- Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education
- Provide case studies showing how leading MBA programs have begun reinventing themselves for the better
- Offer concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies

Rich with examples and thoroughly researched, *Rethinking the MBA* reveals why and how business schools must define a better pathway for the future.
