Junius: including letters by the same writer, under other signatures Second edition

Armin G Stromberg was arguably one of the founding fathers of the technique of stripping voltammetry frequently used in chemical analysis, yet he is virtually unheard of in Western scientific circles. He was a brilliant scientist, but due to his German ancestry he was interred in one of the NKVD GULAG camps at the outbreak of the Second World War. This semi-biographical history presents the complete set of 74 surviving letters written by Stromberg to his wife during this period. The letters provide both historians and the interested public with a rare and unique glimpse into the everyday living conditions of inmates in one of the GULAG labour camps. The book also traces Stromberg's life following his release. More importantly, it relates how he founded the thriving Tomsk school to the wider historical context of electroanalysis in the USSR, drawing conclusions about the rate of scientific development as compared to the West and showing how 'wet analysis' remained of vital importance to industry long after equivalent measurements were made elsewhere. Readers will also appreciate how Stromberg's invaluable contributions in the Tomsk School of Electroanalysis laid the foundations for the extensive metallurgical extraction and nuclear industries that dominated the entire Siberian region for many years. This book is a must-read for anyone interested in the life and times of an important, yet often overlooked scientist of the Second

World War. Contents: The Deportation of the Ethnic Populations of Russia 'A Willow in Siberia': The Family History and Early Life of Armin G Stromberg Pre-1937 Letters from the GULAG (March 1942–September 1943) Release, Work in Sverdlovsk and the Start of Polarography in the USSR The Tomsk School of Electroanalysis Life in Tomsk After Retirement Readership: Professional historians and general readership interested in the GULAG labour camps; chemists, electrochemists and other scientists interested in A G Stromberg. Keywords: Stromberg; Electrochemistry; Stripping Voltammetry; GULAG; USSR; Electroanalysis; Russia Key Features: The complete biography of Armin Stromberg, one of Russia's most eminent and hugely influential electroanalytical chemists, is set against the historical backdrop of Russian history from the 17th–21st centuries, covering the fall of the Tsars and the October Revolution, the rise of Stalin, WW II and the nuclear arms race that followed during the Cold War, through to Perestroika in the 1990s The book publishes the complete set of 74 letters written from the GULAG describing Stromberg's daily struggle for survival during his internment Provides not only Stromberg's own insights into the amazing events that unfolded during his life, but also the first-hand recollections of his daughter, Elza, and several students (many of whom became influential Soviet analytical chemists in their own right) who graduated from the Tomsk School of Electroanalysis under Stromberg's tutelage Reviews: "Compton's book exactly paints that picture of a great scientist and humanist. It can be read by anybody interested in getting a picture of USSR science, and the hard struggle of its people to reach world significance. It does not need special background knowledge in science, and it will be valuable for historians as well as for the science community." Journal of Solid State Electrochemistry

A unique coming-of-age story, this entertaining memoir recounts a young woman's experience becoming a nun in the '60s, a decade of serious change not only for America but also for the Roman Catholic Church. In 1964, 18-year-old Karol Jackowski joined the Sisters of the Holy Cross in Indiana, beginning what would be a seven-year journey towards her final vows. In that time, the Second Vatican Council decided to change liturgy to allow sisters to preside with priests at the altar, permit young nuns to keep their birth names, and modify the traditional black habit, among other advancements meant to put women on equal footing with men. Alongside this, Jackowski writes of her appreciation of the more traditional aspects of her vocation, such as silence, contemplative prayer, and the three-fold vow of poverty, chastity, and obedience. She mixes these lessons with humorous anecdotes—such as the time her high school friends unsuccessfully attempted to smuggle a bag of vodka-laced oranges to her—to craft a memoir marked by both spiritual enlightenment and hilarious candor.

Journal writing is not new--journals have been around for centuries. More recently, journals have been viewed as a means of scaffolding reflective teaching and encouraging reflectivity in research processes. As a result, some educators may ask, "What more do we need to know?" Those likely to raise this question are probably not thinking of the explosive growth of reflective writing enabled by social networking on the Web, the blogs and other interactive e-vehicles for reflection on experiences in our literate, "real," and virtual lives This revisiting of journal writing from a 21st century perspective, informed by relevant earlier literature, is what Christine Pearson Casanave guides readers through in this first book-length treatment of the use of journal writing in the contexts of language learning, pre and in-service teaching, and research. Casanave has put together existing ideas that haven't been put together before and has done it not as an edited collection, but as a single-authored book. She has done it in a way that will be especially accessible to teachers in language teacher education programs and to practicing teachers and researchers of writing in both second and foreign language settings, and in a way that will inspire all of us to think about, not just do, journal writing. Those who have never attempted to use journals in their classes and own lives, as well as others who have used it with mixed results, will probably be tempted to try it in at least some of the venues Casanave provides guidance for. Those already committed to journal writing will very likely find in this book new reasons for expanding and enhancing their use of journals.
