American Book Publishing Record

Americans have always put the past to political ends. The Union laid claim to the Revolution--so did the Confederacy. Civil rights leaders said they were the true sons of liberty--so did Southern segregationists.

This book tells the story of the centuries-long struggle over the meaning of the nation's founding, including the battle waged by the Tea Party, Glenn Beck, Sarah Palin, and evangelical Christians to "take back America." Jill Lepore, Harvard historian and New Yorker staff writer, offers a careful and concerned look at American history according to the far right, from the "rant heard round the world," which launched the Tea Party, to the Texas School Board's adoption of a social-studies curriculum that teaches that the United States was established as a Christian nation. Along the way, she provides rare insight into the eighteenth-century struggle for independence--a history of the Revolution, from the archives. Lepore traces the roots of the far right's reactionary history to the bicentennial in the 1970s, when no one could agree on what story a divided nation should tell about its unruly beginnings. Behind the Tea Party's Revolution, she argues, lies a nostalgic and even heartbreaking yearning for an imagined past--a time less troubled by ambiguity, strife, and uncertainty--a yearning for an America that never was. *The Whites of Their Eyes* reveals that the far right has embraced a narrative about America's founding that is not only a fable but is also, finally, a variety of fundamentalism--anti-intellectual, antihistorical, and dangerously antipluralist. In a new afterword, Lepore addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate.

Nature and Landscape

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Issued also separately.

Paperbacks in Print

Pulling Newspapers Apart: Analysing Print Journalism explores contemporary UK national and local newspapers at a significant and pivotal moment in their development when some pundits are busily, if mistakenly, announcing their demise. The book offers a detailed examination of features which previous studies have tended to neglect, such as editorial formats (News, Op Ed pages, readers' letters, cartoons, obituaries, advice columns, features and opinion columns), aspects of newspaper design (page layout, photographs, supplements, online editions, headlines, the emergence of the compact and Berliner editions), newspaper contents (sport, sex and Page 3, royalty, crime, moral panics and politics) as well as the content of newspapers which is not generated by in house journalists (advertising, TV listings, horoscopes, agency copy and public relations materials). This innovative and accessibly written collection provides journalism and media students with an invaluable study of newspapers in the digital age.

Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects. Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text

databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data

Solaris 10 System Administration Part II Exam
CX-310-202 Bill Calkins In this book you'll learn
Advanced Topics in Solaris 10 System Administration
for SPARC and x86-based systems including:
Administering the network environment in Solaris 10
Setting up RAID metadevices using SVM Configuring
ZFS storage pools and file systems Configuring and
administering Solaris zones and containers
Administering virtual file systems and swap space
Creating and administering user and Role-Based
access accounts (RBAC) Using advanced installation
tools to install, clone, and upgrade the operating
system Bill's original Cert Prep guides were used
throughout Sun's service organization as the SEs
studied for Certification. This was not mandated by

Sun management but happened through word-of-mouth by those software engineers who had successfully passed the exam. In this new edition, Bill adds a chapter for ZFS. It includes Live Upgrade conversion to a ZFS root filesystem and Zone/ZFS inter-operation. Plus, all chapters have been updated to reflect the Solaris 10 10/08 enhancements. This new guide remains the best source of preparation for the Solaris 10 Cert exam. –Brian Howard, Systems Engineer / Solaris Ambassador

WRITTEN BY A LEADING SOLARIS EXPERT! Bill Calkins is owner and president of Pyramid Consulting, a computer training and consulting firm specializing in the implementation and administration of open systems. He works as a consultant with Sun Microsystems and has contributed extensively to the Solaris certification program and simulation technology. He also owns www.unixed.com, a website that provides online UNIX training materials. Bill has more than 20 years of experience in UNIX system administration, consulting, and training at more than 250 different companies and government agencies and has authored several books on Solaris. informit.com/examcram ISBN-13: 978-0-7897-3817-2 ISBN-10: 0-7897-3817-1

Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available

research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial

psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

The 11th Hour Series of revision guides have been designed for quick reference. The organisation of these books will involve students actively in the learning process and reinforcement of concepts. At the end of each chapter there will be a test including multiple choice questions, true/false questions and short answer questions, every answer will involve an explanation. Each book will contain icons in the text indicating additional support on a dedicated web-page. Students having difficulties with their courses will find this an excellent way to raise their grades. Clinical correlations or everyday applications include examples from the real world to help students understand key concepts more readily. Dedicated web page, there 24 hours a day, will give extra help, tips, warnings of trouble spots, extra visuals and more. A quick check on what background students will need to apply helps equip them to conquer a topic. The most important information is highlighted and explained, showing the big picture and eliminating the guesswork. After every topic and every chapter, lots of opportunity for drill is provided in every format, multiple choice, true/false, short answer, essay. An easy trouble spot identifier demonstrates which areas

need to be reinforced and where to find information on them. Practice midterms and finals prep them for the real thing.

Improving Internet Reference Services to Distance Learners

The English Catalogue of Books

The Publishers' Trade List Annual

Whitaker's Five-year Cumulative Book List

The roots of environmental aesthetics reach back to the ideas of eighteenth-century thinkers who found nature an ideal source of aesthetic experience. Today, having blossomed into a significant subfield of aesthetics, environmental aesthetics studies and encourages the appreciation of not just natural environments but also human-made and human-modified landscapes. *Nature and Landscape* is an important introduction to this rapidly growing area of aesthetic understanding and appreciation. Allen Carlson begins by tracing the development of the field's historical background, and then surveys

contemporary positions on the aesthetics of nature, such as scientific cognitivism, which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments. Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes. He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is, in general, a correct way to aesthetically experience the environment.

Publishers Weekly

In their efforts to provide distance learners with the most effective services possible, librarians and information specialists are working more and more with faculty in academic departments, IT departments, and other librarians at cooperating institutions. *Improving Internet Reference Services to Distance Learners* chronicles how those efforts have seen librarians become actively involved in online course management and delivery systems, particularly Blackboard, Desire2Learn, and WebCT, or by “embedding” themselves into the online course structure to better learn where students need assistance. This invaluable resource also examines how librarians use Internet resources to support professional and continuing education and to establish university-wide information and referral services to provide quality service to distance learners. *Improving Internet Reference Services to Distance Learners* encourages librarians to think more

broadly about working with “outside” individuals when designing and providing reference and other services to nontraditional users. The book examines why it’s best to consider user needs, funding, staff management, and collaboration development when planning Internet reference services, how to develop and implement a required, credit-bearing online information literacy course, and how to apply effective marketing techniques from the business world to increase awareness of reference support services available to distance learners. It also offers a look at the Walden University Library at Indiana University-Bloomington, which “houses” no print collection—only online databases—and includes case studies that document the design and development of Internet reference services for the University of Illinois’ Fire Service Institute, and the efforts to provide support for doctor of pharmacy students at the University of Wisconsin-Madison in their final year of study. Improving Internet Reference Services to Distance Learners provides practical information on: monitoring online discussion threads devoted to library research Web-based interactive tutorials integrating library services in support of coursework integrating library services into online courses offering, promoting, and providing instruction to public users, as well as local and distance students developing a web site that centralizes information about library services and resources the potential of the academic library to be the central provider of information and referral services for an entire university Improving Internet Reference Services to Distance Learners is an invaluable resource for librarians working in academic, school, special, and

public settings, and for library science faculty and students.
