Life-span Developmental Psychology

Life-span Development

Case Studies in Lifespan Development offers students a comprehensive view into life's key developmental stages through unique, diverse, and moving cases. Author Stephanie M. Wright presents a series of 12 case studies shaped by the contributions of real students—including their observations, concerns, and moments of triumph—to build immersive examples that readers can relate to and enjoy.

Life-span Developmental Psychology

This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be

studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

A Guide to Teaching Developmental Psychology

[Papers produced as the result of the First Life-span Developmental Psychology Conference, West Virginia University].

Life-span Development

The new edition of *The Developing Person Through the Lifespan* combines theory and the most up-to-date research with practical illustration in order to engage readers in the study of development. It addresses the fundamental issues from a chronological point of view, and covers the entirety of the lifespan (not just infancy or adolescence). The book's enhanced pedagogy works alongside the author's lively narrative voice to ensure that this edition remains as user-friendly, if not more so, than its predecessors.

Case Studies in Lifespan Development

Comprehensive and authoritative this handbook pushes back the frontiers of the study of human development in one single volume. It makes an ideal reference for experienced individuals who wish to update their understanding and remain at the cutting edge of developmental psychology.

Life-Span Developmental Psychology

First published in 1986. Routledge is an imprint of Taylor & Francis, an informa company.

Life Span Developmental Psychology

Although there has been a significant increase in studies of stress and coping processes in recent years, researchers have often approached these topics from rather narrow and constrained perspectives. Furthermore, little communication has occurred across disciplines and research directions, resulting in the emergence of

several relatively isolated literatures. An outgrowth of the Eleventh Biennial West Virginia University Conference on Life-Span Development, this volume emphasizes two major themes: the importance of taking a life-span approach to the study of stress and coping, and the development of new and more complete conceptual models of stress and coping processes. The first to approach these subjects from a life-span perspective, this book includes papers by distinguished researchers from each of the major periods of the life-span, and brings together the cognitive and socioemotional traditions in the study of dealing with pressures. The editors hope that this facilitation of communication among researchers with diverse views will help create a broadening and integration of perspectives.

Life-Span Developmental Psychology

Provides the most Support for Student Learning and Success Lifespan Development, 7/e by Denise G. Boyd and Helen L. Bee thoroughly and accessibly addresses the most critical concepts of development. Through their engaging writing style, the authors have made more abstract material about developmental theories approachable to students. Readers will appreciate both the applied nature of this title and the clarity of the authors' presentation of current research. Students will emerge from your course with a thorough understanding of developmental science and will be able to apply this understanding to their own lives.

Life-span Developmental Psychology

The Handbook of Career Studies brings together, for the first time in a single work, a comprehensive scholarly treatment of the major topics within the growing field of career studies. Drawing on the expertise of leading international scholars in each area of career studies, editors Hugh Gunz and Maury Peiperl have assembled a consummate set of writings, defining the field with a breadth of coverage and integration of topics not found elsewhere. From a view of the history of the field and a map of its elements to a set of essays about the future of careers and work, this volume provides the most complete reference available on the role of work careers in individual lives, institutions, and industries. Key Features • Offers a comprehensive history and structure of the field: Building on previous work done in the discipline, the editors and contributors take a fresh look at the origins and current structure of career studies. • Presents the most complete review of research available: An unparalleled set of prominent global contributors describes the state of work in their areas of expertise as well as offering a glimpse at future trends. • Extends subject area knowledge to other disciplines: By linking career studies to a wider set of disciplines through critical essays, this volume thoroughly explores future directions for career research, policy, and practice. • Includes an endorsement and critical comments on the state of the field: Edgar H. Schein, widely acknowledged as a seminal contributor to the modern field of career studies, provides a Foreword and a critical Afterword. Intended Audience This Handbook is an invaluable reference work for students, academics, and researchers in the areas of Careers, Industrial and Organizational Psychology, Social Psychology, Counseling, Sociology, and Organization Studies as well as for human resource practitioners interested in the state of knowledge of the field.

Life-Span Developmental Psychology

Work Across the Lifespan

The Developing Person Through the Life Span, Sixth Edition presents theory, research, practical examples, and policy issues in a way that inspires students to think about human development--and about the individual's role in the community and the world. Review the new edition, and you'll find Berger's signature strengths on display--the perceptive analysis of current research, the lively and personal writing style, and the unmistakable commitment to students. You'll also find a wealth of new topics--plus a video-based Media Tool Kit that takes the teaching and learning of human development to a new level.

Assessment and Intervention Issues Across the Life Span

Life-Span Developmental Psychology: Normative Life Crises is a compilation of papers that deals with various points of view between the academic perspective — studies in developmental psychology and applied perspective — and the practical efforts of social workers to help individual clients. Part I discusses normative life crises from the two perspectives that include human behavior theory in social work education. This part also includes an interdisciplinary approach covering developmental, social, sociological, economic, and psychological fields. Part II covers the normative life crises in individual development such as discussions on death, ego development, and a practioner's response on models of ego development. The book also discusses an abstract model versus an actual individual experience in dealing with crises, as well as the meanings of adaptation and survival during old age. Part III presents the normative life crises in the family circle covering topics such as parenthood, sex roles, depression, widowhood, and an example of situational stress. Part IV deals with the normative life crises and the social system, including socialization, life course, changing work cycles, and public policy on death. This book will prove valuable for psychologists, psychiatrists, sociologists, social workers, and behavioral scientists.

The Developing Person Through the Life Span

This volume evolved from the second life span development conference held at Southern Illinois University entitled "Assessment and Intervention Across the Lifespan." Providing an overview and consideration of important directions for research in areas of assessment and intervention across the lifespan, the presentations covered a variety of topic areas including social ecology, cultural diversity, attitudes about aging, as well as attention, visual, and linguistic skills. This volume consists of chapters based on the conference presentations as well as additional chapters by experts in related specialty areas discussing attachment theory, learning disabilities, and phonological processing. The second conference and volume continue the work of the first conference and its associated earlier volume. The chapters cover important interactions between assessment and intervention for each major developmental period; several emphasize the importance of early assessment and intervention. A common theme found

throughout is the critical connection between basic research and practice. The editors hope this book will prove useful not only to researchers, but also to practitioners in related disciplines working with individuals of all ages.

Development Through Life: A Psychosocial Approach

Child Development From Infancy to Adolescence

This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

Handbook of Developmental Psychology

Winner of the 2020 Textbook Excellence Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, Child Development From Infancy to Adolescence, Second Edition presents topics within the field of child development through unique and highly engaging Active Learning opportunities. The Active Learning features foster a dynamic and personal learning process for students. Within each chapter, authors Laura E. Levine and Joyce Munsch introduce students to a wide range of real-world applications of psychological research to child development. Pedagogical features help students discover the excitement of studying child development and equip them with skills they can use long after completing the course. This title is accompanied by a complete teaching and learning package. Contact your SAGE representative to request a demo. Digital Option / Courseware SAGE Vantage is an intuitive digital platform that delivers this text's content and course materials in a learning experience that offers auto-graded assignments and interactive multimedia tools, all carefully designed to ignite student engagement and drive critical thinking. Built with you and your students in mind, it offers simple course set-up and enables students to better

prepare for class. Learn more. Life-span Developmental Psychology: Personality and Socialization

When a local context really makes the difference... The new edition of this original Australian text continues to offer the most balanced coverage of theory and research for Australian students and educators and appeals to students from many backgrounds. It covers the domains of development including neurological, cognitive, social, physical and personality. The text is organised chronologically by chapter. Within each chapter content is organised topically. This structure allows for a degree of flexibility and lecturers can choose the way they wish to approach the content, whether it is topically or chronologically.

Life-span Developmental Psychology

Work Across the Lifespan coalesces theoretical and empirical perspectives on aging and work. This volume examines a collection of human development theories that explain trajectories of change, including patterns of growth, maintenance, and decline across the adult lifespan. At its core, the lifespan perspective assumes a focus on aging as a continuous process of intraindividual change and goal-based self-regulation. In this text, the lifespan perspective serves as a lens for examining the complex relationship between aging and work. Integrating research from the fields of developmental psychology as well as industrial, work, and organizational psychology, this authoritative reference brings together the collective thinking of researchers who study work, careers, organizations, and aging. Summarizes key tenets of lifespan theories Applies lifespan theories to work, organizational life, and careers Examines age and work-related processes Provides an comprehensive lifespan perspective on work and aging Focuses on aging as a continuous intraindividual change process

LIFE-SPAN DEVELOPMENTAL PSYCHOLOGY: DIALECTICAL PERSPECTIVES ON EXPERIMENTAL RESEARCH- PAPERS PRESENTED AT THE 5TH WEST VIRGINIA UNIVERSITY CONFERENCE.

Life-Span Development Psychology: Research and Theory covers the issues and problems associated with a life-span conceptualization of developmental psychology. The book discusses the status, issues, and antecedents of life-span developmental psychology; an approach to theory construction in the psychology

of development and aging; and models and theories of development. The text also describes the methodology and research strategy in the study of developmental change; the application of multivariate strategies to problems of measuring and structuring long-term change; and the mechanisms required for the operation of perception and recognition. Learning and retention; language; and intellectual abilities are also considered. Developmental psychologists will find the study invaluable.

Life-span Developmental Psychology

Life-span Developmental Psychology; Research and Theory

Newman and Newman use a life-stage approach to present development across the life span, drawing on the psychosocial theory of Erik Erikson to provide a conceptual framework for the text. The authors address physical, intellectual, social, and emotional growth in 11 life stages, from the prenatal period through elderhood, focusing on the idea that development results from the interdependence of these areas at every stage, and placing special emphasis on how optimal development may be fostered throughout life. Updated with new research findings throughout, *DEVELOPMENT THROUGH LIFE: A PSYCHOSOCIAL APPROACH*, 13th Edition, provides a balanced view of normative patterns of development and diverse pathways, considering individual, family, cultural and societal factors that contribute to the diversity of life stories. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

LIFE-SPAN DEVELOPMENTAL PSYCHOLOGY: RESEARCH AND THEORY- PAPERS PRESENTED AT A CONFERENCE- WEST VIRGINIA UNIVERSITY.

Sanrock - connecting research and results! As a master teacher, Sanrock connects students to current research and real world application. His integrated, personalized learning program gives students the insight they need to study smarter and improve performance. Connect with Life-Span Development and connect with success! *Essentials of Life-Span Development 4e* was developed to help meet the ever-changing needs of students in the lifespan course. Research shows that students today learn in multiple modalities. Not only do their work preferences tend to be more visual and more interactive, but their reading and study sessions often occur in short bursts. With shorter chapters and the LearnSmart interactive study modules in Connect Lifespan, *Essentials of Life-Span Development* allows students to study whenever, wherever, and however they choose. LearnSmart helps ensure that your students read and appreciate the material while McGraw-Hill's Milestones video series helps bring the course material to life, so your students can witness real children achieving their developmental milestones. Regardless of individual study habits, preparation, and approaches to the course, *Essentials* connects with students on a personal, individual basis and provides a road map for success in the course.

Life-Span Developmental Psychology

Life-Span Developmental Psychology: Methodological Issues is based on a conference, held at West Virginia University in 1971, that focused on the general topic of Life-Span Developmental Psychology. The conference provided a forum for the discussion of a variety of methodological issues related to the study of developmental processes over the life-span. The principal objectives of the Life-Span Conference have been not only to explicate, by successive approximation, the range of empirical phenomena with which a life-span developmental psychology should be concerned, but also to explore issues about theory, measurement, design, and data analysis which bear upon it. The book opens with a chapter on ethical issues in developmental psychology. This is followed by separate chapters on topics such as cross-cultural research in developmental psychology; the implications of the two models that have had the greatest impact on developmental psychology—the mechanistic (reactive organism) model and the organismic (active organism) model; and research strategies and measurement methods for investigating human development

Life-Span Developmental Psychology

Life-span Developmental Psychology

Part of the Blackwell Series on Teaching Psychological Science, this practical, hands-on guide shares ideas, tips, and strategies for effectively teaching lifespan developmental psychology to undergraduates. Provides a unique wealth of concrete suggestions and a clear roadmap for successfully teaching developmental psychology Links chapters to major areas of a lifespan development course, including Research Methods, Teaching Infant Development, and Teaching Adolescent Development Offers practical, hands-on tips for novice teachers and experienced instructors alike Includes sample syllabi and lecture outlines, reading quizzes, critical thinking assignments, and references for helpful videotapes and websites

Life-Span Developmental Psychology

APA dictionary of clinical psychology : 11, 000 entries offering clear and authoritative definitions ; Balanced coverage across core areas-including assessment, evaluation, diagnosis, prevention, and treatment of emotional and behavioral disorders; training and supervision; as well as terms more generally relevant to the biological, cognitive, developmental, and personality/social psychological underpinnings of mental health ; Hundreds of incisive cross-references to deepen the user's understanding of related topics ; A Quick guide to use that explains stylistic and formal features at a glance ; Appendixes listing major figures relevant in the history of clinical psychology and psychological therapies and psychotherapeutic approaches.--[book jacket].

Child Development in a Life-Span Perspective

Essentials of Life-Span Development

What is the unique mission of developmental psychology? How has it evolved historically? What are its current challenges? The chapters in this collection present the view that research, history and policy are essential and interlocking components of a mature developmental psychology. Patterns of human development differ markedly across historical epochs, cultures and social circumstances. Major societal changes examined by contributing authors - the advent of universal compulsory schooling, the adoption of a one-child policy in China, US policy shifts in healthcare, welfare and childcare - present 'natural experiments' in social design. Authors challenge the idea of a clear distinction between basic and applied developmental research. In sharp contrast with the view that science is value-neutral, developmental psychologists have from the outset pursued the betterment of children and families through educational, childcare and health initiatives. An historical perspective reveals the beneficial, if sometimes contentious, interplay between empirical research and social programs and policies.

LIFE-SPAN DEVELOPMENTAL PSYCHOLOGY: METHODOLOGICAL ISSUES- PAPERS PRESENTED AT THE 2ND CONFERENCE- WEST VIRGINIA UNIVERSITY.

Although there has been a significant increase in studies of stress and coping processes in recent years, researchers have often approached these topics from rather narrow and constrained perspectives. Furthermore, little communication has occurred across disciplines and research directions, resulting in the emergence of several relatively isolated literatures. An outgrowth of the Eleventh Biennial West Virginia University Conference on Life-Span Development, this volume emphasizes two major themes: the importance of taking a life-span approach to the study of stress and coping, and the development of new and more complete conceptual models of stress and coping processes. The first to approach these subjects from a life-span perspective, this book includes papers by distinguished researchers from each of the major periods of the life-span, and brings together the cognitive and socioemotional traditions in the study of dealing with pressures. The editors hope that this facilitation of communication among researchers with diverse views will help create a broadening and integration of perspectives.

Developmental Psychology and Social Change

Life-Span Developmental Psychology: Personality and Socialization presents papers on personality and socialization. The book discusses the history, theory, and psychological approaches of developmental psychology, with focus on socialization and personality development through the life span; personality dimensions; and theories of socialization and sex-role development. The text also describes the life-span perspective of creativity and cognitive styles; continuities in childhood and adult moral development revisited; and issues of intergenerational relations as they affect both individual socialization and continuity of culture. The interactional analysis of family attachments; social-learning theory as a framework for the study of adult personality development; person-perception research; and the perception

of life-span development are also considered. The book further tackles the potential usefulness of the life-span developmental perspective in education; the strategies for enhancing human development over the life span through educational intervention; and some ecological implications for the organization of human intervention throughout the life span. Developmental psychologists, sociologists, gerontologists, and people involved in the study of child development will find the book invaluable.

Looking Forward Through the Lifespan: Developmental Psychology

Life-Span Developmental Psychology: Historical and Generational Effects provides theoretical and methodological frameworks and examples in history-graded influences on life-span development. The book is a compilation of select research papers by sociologists and psychologists in the study of the biological and environmental determinants of development. The topics discussed in the text include the historical and cohort effects; the aims, methods, and problems of research on historical constancy and change; the relationships between history-graded events and normative age-graded (ontogenetic) events; and the investigation of the developing individual in a changing world. Empirical samples of history-graded influence studies of various age cohorts from the United States and other countries are presented as well. Psychologists and sociologists will find the book very insightful.

Life-span Developmental Psychology

Life-Span Developmental Psychology: Dialectical Perspectives on Experimental Research is a compilation of papers that deals with the dialectical perspective focusing on the developmental process of the individual's interaction with the environment. Part 1 discusses the theoretical issues of psychological theorists such as Piaget and Kaplan. The text includes topics such as the dialectics of time and post-Newtonian metatheory for psychologists. One paper discusses the dialectic method and theory in the work of psychology as social proof structures, particularly when systems of action cause conflict with systems of thought. The text analyzes research versus theory through the Wundt-Titchener Laboratory example. Another paper addresses the status of dialectics in developmental psychology using the approach of theoretical orientation versus the scientific method. Part 2 presents research applications covering topics such as the phenomenological and a behavioral approach to remembering, as well as ""remembering"" in empiricism. Another paper addresses the dialectical perspectives of discriminative learning and transfer that includes both theory and research done on discriminative performance. This book will prove valuable for psychologists, behavioral therapists and researchers, and students in behavioral psychology.

Life-span Developmental Psychology

Comprised of papers written by members of the Social Science Research Council Subcommittee on Child Development in Life-Span Perspective, this book provides a

representation of the current status of the relation between child development and the life-span. It suggests the possible synthesis of these two fields from both conceptual and empirical evidence. Theories and methods concerning the social, psychological, and anatomical influences on children's cognitive development through adolescence are highlighted.

LIFE-SPAN DEVELOPMENTAL PSYCHOLOGY

Lifespan Development, Global Edition

Personality Development across the Lifespan examines the development of personality characteristics from childhood, adolescence, emerging adulthood, adulthood, and old age. It provides a comprehensive overview of theoretical perspectives, methods, and empirical findings of personality and developmental psychology, also detailing insights on how individuals differ from each other, how they change during life, and how these changes relate to biological and environmental factors, including major life events, social relationships, and health. The book begins with chapters on personality development in different life phases before moving on to theoretical perspectives, the development of specific personality characteristics, and personality development in relation to different contexts, like close others, health, and culture. Final sections cover methods in research on the topic and the future directions of research in personality development. Introduces and reviews the most important personality characteristics Examines personality in relation to different contexts and how it is related to important life outcomes Discusses patterns and sources of personality development

The editors hope that this facilitation of communication among researchers with diverse views will

help create a broadening and integration of perspectives.

Personality Development Across the Lifespan

What are the changes we see over the life-span? How can we explain them? And how do we account for individual differences? This volume continues to examine these questions and to report advances in empirical research within life-span development increasing its interdisciplinary nature. The relationships between individual development, social context, and historical change are salient issues discussed in this volume, as are nonnormative and atypical events contributing to life-span change.
