Second Conference on Trends in the Education and Training of Professional Mechanical Engineers

This book has been designed as a full programme of study for the most popular mechanical engineering option units followed by students on Mechanical Engineering, Manufacturing Engineering and Operations & Maintenance BTEC National Certificate and National Diploma courses. The author has structured the material so that manageable sections of text are complemented by in-text questions and features such as Test Your Knowledge, Activity and Maths in Action panels, making this an ideal book for student-centred classroom learning and independent study. Written for the new (2002) BTEC National specifications, this book will also be useful as an option unit resource for AVCE.

Background and Demand for Engineering Training and Need for Engineers in South Texas

The API Individual Certification Programs (ICPs) are well established worldwide in the oil, gas, and petroleum industries. This Quick Guide is unique in providing simple, accessible and well-structured guidance for anyone studying the API 570 Certified Pipework Inspector syllabus by: Summarising and helping them through the syllabus Providing multiple example questions and worked answers Technical standards covered include the full API 'body of knowledge' for the examination, i.e. API570 Piping inspection code; API RP 571 Damage mechanisms affecting fixed equipment in the refining industry; API RP 574 Inspection practices for piping system components; API RP 577 Welding and metallurgy; API RP 578 Material verification program for new and existing alloy piping systems; ASME V Non-destructive examination; ASME IX Welding qualifications; ASME B16.5 Pipe flanges and flanged fittings; and ASME B 31.3 Process piping. Provides simple, accessible and well-structured guidance for anyone studying the API 570 Certified Pipework Inspector syllabus Summarizes the syllabus and provides the user with multiple example questions and worked answers Technical standards covered include the full API 'body of knowledge' for the examination

PHMSA's Process for Granting Special Permits and Approvals for Transporting Hazardous

Materials Raises Safety Concerns

There are safety issues within the Pipeline and Haz. Materials Safety Admin.'s (PHMSA) Special Permits and Approvals (SPA) Program. Special permits and approvals exempt their holders from certain Fed. reg's. governing the transport of haz. materials. This testimony focuses on these concerns: (1) shortcomings in the processes for reviewing and approving SPA; (2) concerns with PHMSA's oversight of permit holders' compliance with safety requirements; and (3) long-standing safety issues that remain unaddressed by PHMSA. It was found that PHMSA grants SPA without exercising its regulatory authority to review applicants' safety histories and without coordinating with partner safety agencies. Tables.

Countries that have sustained rapid growth over decades have typically had a strong public commitment to expanding education as well as to improving learning outcomes. South Asian countries have made considerable progress in expanding access to primary and secondary schooling, with countries having achieved near-universal enrollment of the primary-school-age cohort (ages 6+11), except for Afghanistan and Pakistan. Secondary enrollment shows an upward trend as well. Beyond school, many more people have access to skilling opportunities and higher education today. Although governments have consistently pursued policies to expand access, a prominent feature of the region has been the role played by nonstate actors—private nonprofit and forprofit entities—in expanding access at every level of education. Though learning levels remain low, countries in the region have shown a strong commitment to improving learning. All countries in South Asia have taken the first step, which is to assess learning outcomes regularly. Since 2010, there has been a rapid increase in the number of large-scale student learning assessments conducted in the region. But to use the findings of these assessments to improve schooling, countries must build their capacity to design assessments and analyze and use findings to inform policy.
