This ambitious and vivid study in six volumes explores the journey of a single, electrifying story, from its first incarnation in a medieval French poem through its prolific rebirth in the nineteenth and twentieth centuries. The Juggler of Notre Dame tells how an entertainer abandons the world to join a monastery, but is suspected of blasphemy after dancing his devotion before a statue of the Madonna in the crypt; he is saved when the statue, delighted by his skill, miraculously comes to life. Jan Ziolkowski tracks the poem from its medieval roots to its rediscovery in late nineteenth-century Paris, before its translation into English in Britain and the United States. The visual influence of the tale on Gothic revivalism and vice versa in America is carefully documented with lavish and inventive illustrations, and Ziolkowski concludes with an examination of the explosion of interest in The Juggler of Notre Dame in the twentieth century and its place in mass culture today. Volume 2: Medieval Meets Medievalism deals with the influence of the tale in nineteenth- and early-twentieth-century Europe and America, and the development of literary medievalism at this time. The Juggler of Notre Dame and the Medievalizing of Modernity is a rich case study for the reception of the Middle Ages in modernity. Spanning centuries and continents, the medieval period is understood through the lens of its (post)modern reception in Europe and America. Profound connections between the verbal and the visual are illustrated by a rich trove of images, including book illustrations, stained glass, postage stamps, architecture, and Christmas cards. Presented with great clarity and simplicity, Ziolkowski's work is accessible to the general reader, while its many new discoveries will be valuable to academics in such fields and disciplines as

medieval studies, medievalism, philology, literary history, art history, folklore, performance studies, and reception studies.

Wine is becoming increasingly popular in the Anglophone world and there are many books available which describe how and where it is made. However, none address the fundamental questions of different structures of production and how the consumer relates to the product – this book is the first to do just that. Wine and Society: the cultural and social context of wine production and consumption looks at the relationship between wine production and marketing, focussing in consumer behaviour and cultural attitudes. Divided into four parts, it examines the context of wine production, the wine consumer and the social context of wine, discussing the

following themes: * That the core of wine production and consumption is shaped by historical, geographical and cultural factors. * Wine production – European and new world looking at the different kinds of producer and how the varying background of each shapes their perspective on what they produce * Terroir and appellations: why demarcation and sense of place became important, how they are used to achieve marketing differentiation, and the 'benefits' (or otherwise) to the customer. * The contemporary wine consumer and lifestyle factors – looking at wine clubs, tourism, education, culture and literature * The politics and economics of wine – from supporting rural industries in France to protecting customers from deception and health risks. Suitable for third year and post-graduate students of hospitality, wine (both in production and marketing), wine tourism, gastronomy and related courses, it encourages students to think critically about the issues raised by using real life case studies and examples from around the world, also including press releases and marketing campaigns.
