Laugh as much as you breathe and love as long as you live. Inspired by the 1950s landmark photographic exhibition 'The Family of Man', M.I.L.K. began as an epic global search to develop a collection of extraordinary and geographically diverse images portraying humanity's 'Moments of Intimacy, Laughter and Kinship' (M.I.L.K.). This search took the form of a global photographic competition in 1999. It was not only the richest in photographic history, but also one of the most significant, drawing participation from 17,000 professional and amateur photographers in 164 countries. In total, over 40,000 images were received by M.I.L.K., including entries from at least four Pulitzer Prize winners. The 300 winning images were chosen by eminent Magnum photographer Elliott Erwitt, and became the basis for a published collection. Ten years after the original M.I.L.K. competition comes a brand new collection FRIENDSHIP, FAMILY, LOVE & LAUGHTER. One hundred and fifty extraordinary images from around the world, chosen by Elliott Erwitt, continue to celebrate our moments of intimacy, laughter and kinship.

It is a very special honour for me to be able to present this handbook of medical oncology, which under diverse headings and origins covers such a vast spectrum of experience. I believe the reader will be struck in particular by the impressive volume of information available, especially with regard to childhood tumours, which represent, today, an immense "laboratory of hope". It is in this very field that we oncologists have been able to obtain the most consoling results in recent years. I feel sure that all those who read these chapters will find that their oncological competence is enriched and also in a certain sense that their wish to contribute to progress in cancer research and treatment has been renewed. In conclusion, my most heartfelt congratulations go to the authors for the excellent job they have done, as well as my admiration for

having been able to concentrate so much precious and innovative information into so little space. Umberto Veronesi Preface Since 1976, the VICC has been holding chemotherapy courses in all parts of the world, excluding North America and Australia. The Manual of Cancer Chemotherapy, originally devised as a didactic tool to be used by course participants, expanded itself in the successive editions to a comprehensive, although schematic, textbook of medical oncology.

No other photographer in modern times has recorded war and its aftermath as widely and unsparingly as Don McCullin. After a childhood in London during the Blitz, and after the hardships of evacuation, McCullin feels his life has indeed been shaped by war. From the building of the Berlin Wall at the height of the Cold War to El Salvador and Kurdistan, McCullin has covered the major conflicts of the last fifty years, with the notable exception of the Falklands, for which he was denied access. His pictures from the Citadel in Hue and in the ruins of Beirut are among the most unflinching records of modern war. The publication of many of his greatest stories in the Sunday Times magazine did much to raise the consciousness of a generation, even if he himself now fears that photographs cannot prevent history from repeating itself. The brutality of conflict returns over and over again. McCullin here voices his despair. McCullin recounts the course of his professional life in a series of devastating texts on war, the events and the power of photography. The conclusion of the book marks McCullin's retreat to the Somerset landscape surrounding his home, where the dark skies over England remind him yet again of images of war. Despite the sense of belonging and even contentment, for him there is no final escape.

For Henry Franks, Death is Everywhere. It claimed his mother a year ago, in an accident that robbed him of his memory and left him covered with horrific scars. It's in his skin, leaving him numb to pain no matter how hard he tries to hurt himself. It obsesses his distant father, who buries himself in his work at the morgue. And it's stalking the streets, where a serial killer's path of destruction reveals the dark truth of Henry's past. Praise for Henry Franks: "The thinking teen's horror choice of the year."—Booklist (starred review) "A strong start for a promising author." —Publishers Weekly

### **The Dinosaur Magnet-Activity Book**

Many books cover the sublime forms and colors of Luis Barragan's architecture - its visual aspect - yet are silent on his education and development as an architect, his methods and his theories. Luis Barragan: Mexico's Modern Master, 1902-1988 is the first in-depth study of the architect and his work. It also includes a great number of exquisite visual representations, thereby presenting a complete treatment of Barragan that enhances an understanding of the equally poetic and architectonic nature of his work and places him within the historical and political context of Mexico. The author portrays the myriad influence on the young Barragan: early trips to the United States and Europe, where he became acquainted with some of his most important and lasting models, Le Corbusier, Frederick Kiesler, Jose Clemente Orozco, and above all, Ferdinand Bac; the strong sense of identity of the tapatios, natives of his home city of Guadalajara; and his circle of contemporaries, all in the arts, all committed to discussing and publicizing new social and artistic ideas. Barragan's early

works synthesized many of these elements, and a quality of "Mediterraneanism" was their strongest characteristic. This monograph also features the most extensive documentation available on Barragan. In addition to photographs and architectural drawings of his best-known projects, it features a myriad of previously unpublished photographs, an extensive illustrated list of over sixty built and unbuilt works, and a complete register of projects.

Wake up to the aroma of fresh bread wafting through your kitchen every morning! A dream? No. With your bread machine, it's a reality. Push a button or two and transform what seems like a laborious, time-consuming and skilled process into a spectacularly easy affair. So why do you need this book when bread machines come with their own recipes? Well, such recipes vary, sometimes on the high side, in the amount of yeast, salt, sugar, fat and dried milk powder they contain. Annette Yates has set about reducing these ingredients and providing recipes for making loaves that are as natural as they can be. And they are delicious too. Or you can add extra ingredients - like herbs, spices, seeds, nuts, fruit, vegetables, honey, mustard and even chocolate! - and transform simple bread into something really special. Try it and see
