“A smoothly written private-eye story” and Edgar Award Finalist: Indianapolis PI Albert Samson stirs up a wealthy family’s secrets (The New York Times). It’s a slow afternoon for Indianapolis private detective Albert Samson. He’s just awoken from an office doze when a new client walks in. Sixteen-year-old Eloise Crystal recently discovered that her blood type doesn’t match either of her parents’, and she wants Samson to find her biological father. Skeptical, but one hundred dollars richer, Samson begins some preliminary digging into the past of one of the most respected family names in Indiana. What he unearths is the kind of dirt that makes people do desperate things—and it thrusts him into a shifting world of lies, old money, and murderous secrets. A beloved series by a Shamus Award-winning author, Ask the Right Question introduces the smart-mouthed midwestern detective “who’s always good, wry company” (Kirkus Reviews). Ask the Right Question is the 1st book in the Albert Samson Mysteries, but you may enjoy reading the series in any order.

In the memoir-like chapbook, "Blossom's Wine Bar" Frida R. snatches her audience's hearts and drags them down the unpaved roads of her messy, ever-changing alcohol soaked world. With fair amounts of wit and grit, "Blossom's Wine Bar" is a collection of stoems (poems that read like short stories) and personal essays where she pulls readers deeper into her world by revealing the events that pushed her to create such raw art. Genuine, vulnerable and sometimes crass, Frida R. opens up about abortion, relationships, depression, and suicide. With so many things that have gone wrong, she shares the life lessons and moments of self-awareness that allow her to continuously progress because as she says, "If you aren't going to continue to grow and change, you're just a waste of food and resources." "Blossom's Wine Bar" reads like conversations between friends because Frida R. is an author who thrives from the idea of connecting with her audience. She wishes to be a voice to the voiceless and a source of motivation for the underdog, making her the stoet (storyteller & poet) to look out for.

McKeown's Price Guide to Antique and Classic Cameras 2005-2006

The contemporary guide to urban gardens. In this mould-breaking book, Joe Swift addresses the new generation of the stylish city, for whom the garden is just another room in the house - somewhere to relax, entertain, cook, eat, work and play. Like the other rooms, the 'plant room' needs to be decorated and, for people leading busy lives, the garden provides a new and satisfying way to express themselves creatively, as they blend textures, colours, sounds and scents to make a highly individual outdoor space. In the past, the garden was primarily a place to grow plants. But now, plants are only one of the main elements which go towards creating a successful garden. It takes careful planning to foster plants which will look good in the urban setting. Joe Swift shows readers how to achieve this and how to choose from the wide range of garden furniture and accessories available to complete the look.

The Plant Room

Landscape photography is one of the most popular genres for amateur photographers. Mastering the genre, however, takes time: time to perfect exposure, color, composition, and--perhaps above all else--the ability to see and record the landscape in a way that will make your photographs stand above the rest. This guide delves into the world of 16 leading lights, each with their own unique take on how, where, and why the landscape should be recorded. Through probing interviews and beautifully reproduced images, the reader is given an insight into the artist's working practices, from equipment to techniques. Glorious color photographs sit beside atmospheric monochrome, the latest digital techniques rub shoulders with traditional film-based imaging, and conventional landscape mores are countered by experimental artworks, guaranteeing something to inspire every reader.

Introducing Maya 6

In this revised, updated edition of his 1983 retrospective, Yousuf Karsh, the most renowned portrait photographer of our time, presents over sixty years of his work. This classic portrait artist of the camera has repeatedly - and unforgettably - photographed the statesmen, artists, and literary and scientific figures who have shaped our lives and the private world of the mind with such perception and illumination that his image has often become the definitive portrait. Karsh is the record of a major artist whose portraits have made being "Karshed" (as Field Marshal Montgomery described it) a singular accomplishment. It is the first book on Karsh to include a large group of photographs of arresting people not in the public eye, of workers in their environments, and of his early works and experiments. It is the first book to represent his work in color, with surprising masterworks. One of the most striking features of this book is the first-time presentation of multiple portraits: a number of subjects are shown in several prints from the same or other sittings, the collective portrait revealing the consistency and depth of the photographer's vision.

The Road to Oxiana

Macroeconometrics and Time Series Analysis

Historical Sketches of the Late War Between the United States and Great Britain

In 1933 Robert Byron began a journey through the Middle East via Beirut, Jerusalem, Baghdad, and Teheran to Oxiana--the country of the Oxus, the ancient name for the river Amu Darya which forms part of the border between Afghanistan and the Soviet Union. The Road to Oxiana offers not only a wonderful record of his adventures, but also a rare account of the architectural treasures of a region now inaccessible to most Western travelers.

A lavish photographic celebration that captures the fascinating behaviors of land and sea animals in the Galápagos Islands. The Galápagos Islands are home to an amazing variety of iconic creatures, from Giant Tortoises, Galápagos Sea Lions, Galápagos Penguins, and Ghost Crabs to Darwin's finches, the Blue-footed Booby, and Hummingbird Moths. But how precisely do these animals manage to survive on—and in the waters around—their desert-like volcanic islands, where fresh water is always scarce, food is often hard to come by, and finding a good mate is a challenge because animal populations are so small? In this stunning large-format book, Galápagos experts Walter Perez and Michael Weisberg present an unprecedented photographic account of the remarkable survival behaviors of these beautiful and unique animals. With more than 200 detailed, close-up photographs, the book captures Galápagos animals in action as they feed, play, fight, court, mate, build nests, give birth, raise their young, and cooperate and clash with other species. Watch male Marine Iguanas fight over territory and females; see frigatebirds steal food and nesting materials from other birds; witness the courtship dance of a pair of Blue-footed Boobies; go underwater to glimpse a Galápagos Sea Lion pup playing with its mother; and observe a baby Pacific Green Turtle enter the water for the first time. These and dozens of other unforgettable scenes are all vividly captured here—including many moments that even experienced Galápagos observers may never be

lucky enough to see in person. Complete with a brief text that provides essential context, this book will be cherished by Galápagos visitors and anyone else who wants to see incredible animals on the move.

Women playwrights speak about their art and the theatre in this collection of interviews about a key decade of British drama. Twenty leading contemporary dramatists discuss their work from the perspective of being both writers and women. Each talks about the state of the theatre now, the craft of playwrighting, and the pressures of working within a male dominated environment. The book also features Sarah Kane's very last public interview. 'What I think is so exciting about the response to a number of the plays written by women in the last ten years is that they are popular with audiences - because they've got this quality, this energy and this culture that hasn't been seen much on stage before: a humour, sexiness and wit that's been missing' - Charlotte Keatley

Reason for Visit

London is not just a city of ten million people, it is also home to an extraordinary diversity of beautiful wildlife. With world population exploding and more and more countryside being lost to urban sprawl or commercial agriculture, the sharing of urban space with nature is more important than ever. To achieve this, we have to preserve and increase the green and blue spaces in our cities and see and love the wildlife that we already have. Since London is my city, I set out to observe and

create photographic portraits of all the creatures I could find. Whilst this has taken many hundreds of hours, it has been the happiest time imaginable as I immersed myself in the sweetness and delight of my wild neighbours.

"Emmet Gowin likes to ask a provocative question: "Which country on earth has had the largest number of nuclear bombs detonated within its borders?" The answer is the United States. Covering approximately 680 square miles, the Nevada National Security Site, formerly known as the Nevada Test Site, was the primary testing location of American nuclear devices from 1951 to 1992; 1,021 announced nuclear tests occurred there, 921 of which were underground. The site, which is closed to the public, including its airspace, contains 28 areas, 1,100 buildings, 400 miles of paved roads, 300 miles of unpaved roads, 10 heliports, and two airstrips. Its surface is covered with subsidence craters from testing, and in places looks like the moon. In 1996, Gowin received permission to document the landscape by air, after over a decade of working to secure access. These aerial views of environmental devastation--made quietly majestic but no less potent in the hands of a master photographer--unveil environmental travesties on a grand scale. While groups of images from the Nevada Test Site series have been published previously, this book will produce the largest number yet, and three quarters of the pictures will not have been published at all. Gowin is the only photographer to have been granted access to this site, which is now permanently closed, post-9/11. Other than images made by the government for geographic purposes, no other images of this landscape exist. The book will feature a preface by photographer Robert Adams (America, b. 1937), whose photographic and written work is concerned with landscape, urbanization, and activism. It will also feature an afterword by Gowin on how he made the images, and their significance to him today."--Provided by publisher.
