Aeschylus: Persians and Other Plays

What do you do when you owe the Ukrainian mafia a huge amount of money that you don't have? Drive a twenty-year old ambulance ten thousand kilometres from London to the remotest country in the world, of course. Not to run away, you understand, but to bag your share of a million pound cash prize. Melissa, a suddenly unemployed City trader, finds herself stunningly in debt to Victor, a leading light in the Ukrainian mafia following an unlucky hand in an underground poker game in East London. Escaping to her grandmother's flat in Hammersmith, she is reunited with old school mate Julia, who offers her the chance to take part in the Ulaanbaatar Cup - where competitors drive to the capital of Mongolia in chase of a one million pound cash prize. In the high-pressure atmosphere of challenge, sabotage, espionage, misinformation and unmitigated disasters with Melissa's future up against the clock, against all odds she finds herself having more fun than she can remember, forging friendships that will last for life and falling head over heels in love. But what will happen when she returns to London?

This second edition of Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond is the latest volume in the Issues in Career

Development Series, edited by Drs. Grafton Eliason, Mark Lepore, Jeff Samide, and John Patrick, from California University of Pennsylvania and Clarion University of Pennsylvania. The purpose of Career Development Across the Lifespan is to provide a broad and in-depth look at the field of career development as it applies to individuals involved in all areas of community counseling, school counseling, and higher education. The book will examine some of the field's major theories, themes, approaches, and newest models incorporating chapters from national and international career counseling experts. Specific emphasis is spent examining issues reflective of today's challenges in developing and maintaining a workforce that is diverse, flexible, and efficient. Readers will be provided with an action-based framework built on the best available research. This text book is truly the culmination of a decade's work, compiling comprehensive studies from four previous volumes and updating key concepts in career counseling with the most contemporary theories and innovations. We examine three primary domains of career counseling throughout all of the developmental stages of the lifespan: community, schools K-12, and higher education. We include a specific focus on career history and theories, to prepare students for both the counseling environment and for national exams leading to certification and licensure, such as the (NCE) National Counseling Exam. We also include cutting edge research on contemporary topics, including such areas as: military careers, life after the military, individuals with disabilities or special needs, career counseling in our current socio-economic environment, and current technologies such as virtual

counseling. In addition, we have added case studies and key terms as study guides at the end of each chapter. We are fortunate to include many recognized experts in the field of career counseling. *Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond* is a comprehensive text, written to address the broad needs of career counselors, educators, and students today.

Hands-on systematic innovation : for business and management

Mass Communications and Media Studies: An Introduction, 2nd edition is a comprehensive yet concise survey of the history of mass communication media, discussing the current state of each medium, and anticipating the future of mass

media. Divided into twelve chapters, it can be used in either 16-week semesters or 12-week terms. Retaining the successful organization of the 1st edition, Peyton Paxson writes in an accessible and well-organized manner, catering to both the needs of students and instructors. He begins each chapter with a list of the current issues and trends concerning the chapter's topic, followed by a brief history of that topic, its current state, predictions for the future, an assessment of career opportunities, and discussion questions for critical thinking. More than just updating statistical data, the 2nd edition weaves in discussions of relevant contemporary issues, including crowdsourcing, going 'viral', interactive advertising, tv industry consolidation, 'the internet of things', conflicting ideas of net neutrality and their continuing implications in a more-connected world.

The Cathedral and Others Poems

A young lady, just returned from college, was making a still-hunt in the house for old things—old furniture, old china, and old books. She had a craze for the antique, and the older things were the more precious they were in her eyes. Among other things she found an old scrap-book that her mother and I thought was safe under lock and key. She sat in a sunny place and read it page by page, and, when she had finished, her curiosity was aroused. The clippings in the old scrap-book were all about the adventures of a Union scout whose name was said to be Captain Frank Leroy. The newspaper clippings that had been preserved were queerly

inconsistent. The Northern and Western papers praised the scout very highly, and some of them said that if there were more such men in the army the cause of the Union would progress more rapidly; whereas the Southern papers, though paying a high tribute to the dash and courage of the scout, were highly abusive. He was "one of Lincoln's hirelings" and as villanous as he was bold.

Who would think you could meet the man of your dreams in your favorite coffee shop? Well, that is what Zoe Parker wanted to believe. Sometimes being blindsided and being blind aren't exactly the same thing as she struggles to shake him off. What seems like innocent dating turns to a deadly disease as the man of her dreams starts to become the shadow of her nightmares. And the first man of her dreams, Greg Walker, is just waiting in the wings. Greg Walker, former boyfriend and trusted cop, would love nothing more than handcuff this guy to his police cruiser and boogie down the road at ninety miles an hour. First though, Greg must keep Zoe safe and alive. As the two heat up the moment as they reunite in their friendship, they must put a promise and a few bad choices behind them. Much more than that, as new Christians, they must learn how to walk broken, putting their pride aside and be willing to forgive.

Allie Saunders has a dirty secret. Make that two fantastically filthy secrets: Beau Colton and Van Mitchell. The leading stars of her fantasies also happen to be her brother's best friends. Hello, big fat hairy complication. It's no mystery why her unrequited crushes insist on keeping her at arm's length, but it doesn't stop her from wishing for the impossible. When she discovers their dirty secret, the once forbidden is suddenly a tantalizing temptation and the key that could turn her dreams into a reality. In addition to being co-owners of a boxing gym, Van and Beau share mutual tastes outside of the ring-they're both Doms. That's partly the reason for their unbreakable Bro Code where Allie is concerned. She's far too sweet and innocent for the edgy games they enjoy. Or so they thought. Their assumption-and willpower-is about to be tested. Big time. All courtesy of an annual Sub-For-A-Night charity event, and the irresistible, thoroughly off-limits woman who just stepped onto the auction block Warning: This wickedly hot MMF ménage contains two deliciously dirty boxers, a not-so-innocent dirty-talking heroine, dirty rope

tricks, and dirty ways to break a sweat. Who says exercise can't be fun?

Reece was a guitar player and a singer at his grandfather's pub in Dublin until someone betrays his secret. Once he was a happy and carefree young man, who finds himself on the streets and homeless. He meets a handsome stranger, who gives him hope that the world still has people with compassion, until he discovers the man may have compassion, but he is no softie. Conner hires Reece as his houseboy. Much to his shock, Conner Braden isn't only a garda (Irish police officer),

but he is also a Dom! The two men are complete opposites, but that doesn't stop Reece from wanting to win his heart. What happens when Master Braden blurs the lines between employer and Dom when Reece is his employee? AUTHOR'S NOTE: This book contains mild BDSM elements including restraints, blindfolds, and spanking. While the story uses characters from The Irish Runaway Series, you can read this book as a standalone.

Solution architecture is concerned with the design and definition of (information technology) solutions so they can be subsequently implemented, used, operated and supported securely and efficiently. The solution exists to operate business processes in order to achieve business objectives, meet a business need and deliver business value. Solution architecture is concerned with engaging with the

originating business function looking for the solution to create a solution vision and design a solution that meet their needs, subject to a range of constraints such as cost and affordability, time to deliver and organisational standards. The solution must exist as a coherent whole. Solutions must be designed consistently across the solution landscape and make optimum use of appropriate technologies. Solution architecture must focus on creating usable and useful solutions. Solution architecture must have a standard reliable approach to business engagements and the design of solution that emerge from them. Solution architecture must work collaboratively with other information technology functions - other architecture roles, business analysis and service management - to ensure continuity along the solution delivery journey. Effective solution architecture involves: -Have a depth and breadth of solution delivery and technical experience to be able to identify solution design options quickly-Being able to understand the detail of the solution while maintaining a view of the wider (and higher) context of the business need for the solution and being able to explain both these views of sets of information-Being able to communicate effectively with all parties - technical and business - involved in the solution design and delivery journey, assist with decision-making, be realistic and make appropriate compromises and design choices in order to create the best solution design-Being able to apply technology appropriately and with selective innovation (and the desire to constantly acquire new knowledge and ways of applying technology)-Being involved in the solution delivery journey along its entire length-Being able to be the solution advocate and subject matter

expertThis book is aimed at a variety of potential readers: -Existing solution architects who want to have a more theoretical and a broader understanding of their role-Existing or new managers of solution architecture functions who want to create a high-performing practice within their organisations and who want to articulate the benefits and value solution architect can contribute to the information technology function and the wider business and the potential it can offer to the business organisation-Mangers of information technology functions who want to understand what solution architecture is, where it fits into the wider architecture context and disciplines and solution delivery and operation and the value it can contribute to both the information technology function and the wider business-Other information technology architects who want to understand how the architecture disciplines can work together to deliver value-Business analysts and managers of business analysis functions who want to understand how they can work more closely with the solution architecture function in order to provide the business with a better overall service-Other information technology personnel who want to move into solution architecture and who want to understand what it is-Consulting organisations and individuals who want to develop and offer value-adding solution architecture services

TRIZ For Dummies

Most Perl programmers were originally trained as C and Unix programmers, so the

Perl programs that they write bear a strong resemblance to C programs. However, Perl incorporates many features that have their roots in other languages such as Lisp. These advanced features are not well understood and are rarely used by most Perl programmers, but they are very powerful. They can automate tasks in everyday programming that are difficult to solve in any other way. One of the most powerful of these techniques is writing functions that manufacture or modify other functions. For example, instead of writing ten similar functions, a programmer can write a general pattern or framework that can then create the functions as needed according to the pattern. For several years Mark Jason Dominus has worked to apply functional programming techniques to Perl. Now Mark brings these flexible programming methods that he has successfully taught in numerous tutorials and training sessions to a wider audience. * Introduces powerful programming methods new to most Perl programmers that were previously the domain of computer scientists * Gradually builds up confidence by describing techniques of progressive sophistication * Shows how to improve everyday programs and includes numerous engaging code examples to illustrate the methods

JSP developers encounter unique problems when building web applications that require intense database connectivity. *MySQL and JSP Web Applications* addresses the challenges of building data-driven applications based on the JavaServer Pages development model. *MySQL and JSP Web Applications* begins with an overview of the core technologies required for JSP database development--JavaServer Pages, JDBC, and the database schema. The book then outlines and presents an Internet commerce application that demonstrates concepts such as receiving and processing user input, designing and implementing business rules, and balancing the user load on the server. Through the JDBC (Java DataBase Connector), the developer can communicate with most commercial databases, such as Oracle. The solutions presented in *MySQL and JSP Web Applications* center on the open source tools MySQL and Tomcat, allowing the reader an affordable way to test applications and experiment with the book's examples.
