The Sailor's Word-book

Andre Castelot was a French writer born in Belgium who wrote 65 biographies of famous persons in the History of France. He is perhaps best known for his biography of Josephine. His biography of Napoleon emphasizes not only his military campaigns, but his many love affairs and his many mistresses. It shows how his tumultuous relationship with Josephine influenced and affected his Napoleonic Code. It was because of Josephine's fickleness and unfaithfulness to Napoleon that Napoleon decreed that all women upon leaving their father's houses and entering into matrimony must understand that henceforth they are to be under the control of their husbands. Women cannot be trusted to be free, said Napoleon. Yet, Napoleon was easily influenced by women. On page 299 is recounted an incident where his Governor of Berlin had committed an act of treason, and had been arrested and faced death. Then, the man's wife, who was expecting a child, came and threw herself at the feet of Napoleon, begging forgiveness. With that, Napoleon ordered the man's release, something that Napoleon did not often do. Throughout this book, there are discussions of Napoleon's relationships with women, including his fears that he could not father a child or that a child who had been born was not really his."

Curriculum Reform in the European Schools

Broers repositions the context in which the Napoleonic empire can be studied, and reconfigures the political and historical geography of Italy, in the century before its Unification in 1859. The Napoleonic Empire in Italy marks a fresh departure in the study of both modern Italy and Napoleonic Europe, based on primary sources.

Life

The Bankers Magazine

Against a backdrop of seven hundred years of bourgeois struggle, eminent lawyer and educator, Michael E. Tigar, develops a Marxist theory of law and jurisprudence based upon the Western experience. This well-researched and documented study traces the role of law and lawyers in the European bourgeoisies's conquest of power and in the process complements the analyses of such major figures as R.H. tawney and Max Weber. Using a wide frange of primary sources, Tigar demonstrates that the legal theory of insurgent bourgeoisie predated the Protestant Reformation and was a major ideological ingredient of the bourgeois revolution.

The Continental Army

Napoleon by Andre Castelot

Published in the United States in 1839, the letters of French political economist Michel Chevalier made note of the economic constructs of America, comparing the democratic model he found in the U.S. to the aristocratic model more prevalent in Europe. Chevalier focused his attention on work in America-on the centrality of employment to American culture and politics, and how work, rather than class, gave the American his place in society. He also made note of forms of transportation, particularly railroads, as well as of slavery, banking, and the policies of Andrew Jackson.

Military Career of Napoleon the Great: An Account of the Remarkable Campaigns of the "Man of Destiny"

A landmark comparative history of Europe and China that examines why the Industrial Revolution emerged in the West The Great Divergence sheds light on one of the great questions of history: Why did sustained industrial growth begin in Northwest Europe? Historian Kenneth Pomeranz shows that as recently as 1750, life expectancy, consumption, and product and factor markets were comparable in Europe and East Asia. Moreover, key regions in China and Japan were no worse off ecologically than those in Western Europe, with each region facing corresponding shortages of land-intensive products. Pomeranz's comparative lens reveals the two critical factors

resulting in Europe's nineteenth-century divergence—the fortunate location of coal and access to trade with the New World. As East Asia's economy stagnated, Europe narrowly escaped the same fate largely due to favorable resource stocks from underground and overseas. This Princeton Classics edition includes a preface from the author and makes a powerful historical work available to new readers.

Writing Award From the bestselling author of the acclaimed *Chaos and Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa's talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live.

WINNER OF THE NATIONAL BOOK CRITICS CIRCLE AWARD AN AMERICAN BOOK AWARD FINALIST Now in paperback, *War Without Mercy* has been hailed by *The New York Times* as “one of the most original and important books to be written about the war between Japan and the United States.” In this monumental history, Professor John Dower reveals a hidden, explosive dimension of the Pacific War—race—while writing what John Toland has called “a landmark book . . . a powerful, moving, and evenhanded history that is sorely needed in both America and Japan.” Drawing on American and Japanese songs, slogans, cartoons, propaganda films, secret reports, and a wealth of other documents of the time, Dower opens up a whole new way of looking at that bitter struggle of four and a half decades ago and its ramifications in our lives today. As Edwin O. Reischauer, former ambassador to Japan, has pointed out, this book offers “a lesson that the postwar generations need most . . . with eloquence, crushing detail, and power.”

This open access book examines the modern role of the European School system within the European Union, at a time when the global economy demands a new vision for contemporary education. The European schools are currently in a state of crisis: their 60-year-old tradition of bilingual and multilingual education is being strained by rapid EU expansion and the removal of English speaking teachers as a result of Brexit. Their tried and tested model of mathematics and science education has rapidly been overtaken by new developments in pedagogy and assessment research, while recruitment and retention of students and teachers has become increasingly fraught as European member states review what they are, and what they are not, prepared to fund. The authors draw on original and empirical research to assess the European Schools' place in a new Europe where the entire post-war European Project is potentially at risk. This well-researched volume will be of interest to practitioners working in European schools as well as students and scholars of EU politics and international education.
