FAO provides countries with technical support to conduct nutrition assessments, in particular to build the evidence base required for countries to achieve commitments made at the Second International Conference on Nutrition (ICN2) and under the 2016-2025 UN Decade of Action on Nutrition. Such concrete evidence can only derive from precise and valid measures of what people eat and drink. There is a wide range of dietary assessment methods available to measure food and nutrient intakes (expressed as energy insufficiency, diet quality and food patterns etc.) in diet and nutrition surveys, in impact surveys, and in monitoring and evaluation. Different indicators can be selected according to a study's objectives, sample population, costs and required precision. In low capacity settings, a number of other issues should be considered (e.g. availability of food composition tables, cultural and community specific issues, such as intra-household distribution of foods and eating from shared plates, etc.). This manual aims to signpost for the users the best way to measure food and nutrient intakes and to enhance their understanding of the key features, strengths and limitations of various methods. It also highlights a number of common methodological considerations involved in the selection process. Target audience comprises of individuals (policy-makers, programme

managers, educators, health professionals including dietitians and nutritionists, field workers and researchers) involved in national surveys, programme planning and monitoring and evaluation in low capacity settings, as well as those in charge of knowledge brokering for policy-making.

Earn consistent profits trading commodities, even if you're a newcomer to the commodities markets! Carley Garner's *A Trader's First Book on Commodities, Second Edition* is today's most practical and realistic introduction to successful commodities trading. More than any other primer, it recognizes that the most important trading decisions are made long before the first trade is executed. Drawing on years of dealing with retail traders from all walks of life, experience levels, and amounts of risk capital, Garner answers the most pressing questions newcomers ask -- and the questions they haven't realized they need to ask. This extensively updated Second Edition reflects major changes in the market over the past three years, including new trading challenges, platforms, tools, data resources, and risks. Garner presents a hard-eyed look at the collapses of MF Global and PFGBEST, their failure to honor the sanctity of "Customer Segregated Funds" accounts, the implications for investors, and techniques for mitigating these new risks. She has added new charts and example trades throughout; new coverage of commodity impacts arising from recent events in

Europe; important information about new technological improvements and competitive intraday position margin standards; and much more.

Tomorrow in the Battle Think on Me

Helpful, Accessible Guidance for Budding Hedge

Funds So You Want to Start a Hedge Fund provides critical lessons and thoughtful insights to those trying to decipher the industry, as well as those seeking to invest in the next generation of high performers. This book foregoes the sensational, headline-grabbing stories about the few billionaire hedge fund managers to reach the top of the field. Instead, it focuses on the much more common travails of start-ups and small investment firms. The successes and failures of a talented group of competitive managers—all highly educated and well trained—show what it takes for managers and allocators to succeed. These accounts include lessons on funding, team development, strategy, performance, and allocation. The hedge fund industry is concentrated in the largest funds, and the big funds are getting bigger. In time, some of these funds will not survive their founders and large sums will get reallocated to a broader selection of different managers. This practical guide outlines the allocation process for fledgling funds, and demonstrates how allocators can avoid pitfalls in their investments. So You Want to Start a Hedge Fund also shows how to: Develop a sound strategy and raise the money you need Gain a real-world perspective about how allocators think and act Structure your team and investment process for success Recognize the patterns of successful start-ups The industry is approaching a significant crossroads. Aggregate growth is slowing and competition is shifting away from industry-wide growth, at the expense of traditional asset classes, to market share capture within the industry. So You Want to Start a Hedge Fund provides guidance for the little funds—the potential future leaders of the industry.
