The Industrial Bulletin

This book is aimed at students who are entering further and higher education and need to acquaint themselves with elementary mathematics or reacquaint themselves with mathematics that they might have learned a little while before and forgotten. It is written assuming virtually no previous knowledge beyond the ability to count and it has an easy conversational style. The text has copious amounts of worked examples and end-of-chapter exercises, which will enable you to test your understanding of the material. Answers to selected exercises are provided.

Proceedings of the Institution of Electrical Engineers

Electrical Review

The Perception of the Environment

Journal of the Institution of Electrical Engineers

This book covers the principles and techniques that will help you develop the skills needed to carry out effective vehicle body repair and re-finishing. This edition has been updated to deal with changes in technology and best practice and meets the current Automotive Skills standards. It also covers the topics studied at NVQ levels 2 and 3 and contains handy revision notes making it an ideal text for students on the following courses: Automotive Skills Council Vehicle Body and Paint Operations requirements IMI Body Repair and Refinishing Technical Certificates (VRQs) National Vocational Qualifications (NVQs) City & Guilds Vehicle Body Repair Competence courses NVQ and Progression Awards of both City & Guilds and the Institute of the Motor Industry at levels 2 and 3. Professionals and hobbyists will continue to find this an essential manual for the workshop when repairing the latest models or classic cars. The Repair of Vehicle Bodies, 6th ed

The Boeing B-29 was one of the most sophisticated aircraft of WWII. It featured many innovations including guns that could be fired by remote control and pressurized crew compartments. It was also the heaviest production plane of the war with terrific range and bomb carrying capabilities. Carrying a crew of ten, the Superfortress devastated Japan in a series of gigantic raids in 1944-45. In the end it would be the B-29s "Enola Gay" and "Bock's Car" that dropped the atomic bombs and effectively ended the conflict. Originally printed by the United States Army Air Force in January of 1944, the B-29 Bomber Pilot's Flight Operating Manual taught pilots everything they needed to know about the "Superfort" Originally classified "Restricted," the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted, and color images appear as black and white. Care has been taken however to preserve the integrity of the text.
