The complex material histories of the Nintendo Entertainment System platform, from code to silicon, focusing on its technical constraints and its expressive affordances. In the 1987 Nintendo Entertainment System videogame *Zelda II: The Adventure of Link*, a character famously declared: I AM ERROR. Puzzled players assumed that this cryptic message was a programming flaw, but it was actually a clumsy Japanese-English translation of "My Name is Error," a benign programmer's joke. In *I AM ERROR* Nathan Altice explores the complex material histories of the Nintendo Entertainment System (and its Japanese predecessor, the Family Computer), offering a detailed analysis of its programming and engineering, its expressive affordances, and its cultural significance. Nintendo games were rife with mistranslated texts, but, as Altice explains, Nintendo's translation challenges were not just linguistic but also material, with consequences beyond simple misinterpretation. Emphasizing the technical and material evolution of Nintendo's first cartridge-based platform, Altice describes the development of the Family Computer (or Famicom) and its computational architecture; the "translation" problems faced while adapting the Famicom for the U.S. videogame market as the redesigned Entertainment System; Nintendo's breakthrough console title *Super Mario Bros.* and its remarkable software innovations; the introduction of Nintendo's short-lived proprietary disk format and the design repercussions on *The Legend of Zelda*; Nintendo's efforts to extend their console's lifespan through cartridge

augmentations; the Famicom's Audio Processing Unit (APU) and its importance for the chiptunes genre; and the emergence of software emulators and the new kinds of play they enabled.

Beguiling and bewitching stories from Ramsey Campbell, Brian Lumley, Graham Masterton, and others will give you goosebumps—in more ways than one . . . Sex and horror, intertwined since the beginning of the human race, take on all new twists, turns, and contortions in *Stranger by Night*, sixth in the Hot Blood erotic horror anthology series—with one of its most illustrious lists of contributors. Two of the United Kingdom's greatest horror writers, Ramsey Campbell and Brian Lumley, both appear. Actress and scream queen Brinke Stevens contributes original fiction. Comics illustrator and TV writer Bruce Jones features in the Hot Blood series for the first time, while Graham Masterton returns with another classic. Lucy Taylor and Brian Hodge are among the other brilliant horror writers, eighteen stories in all, that probe every dark desire. The Heliocentric Net said, "whatever your tastes, be prepared to be titillated and terrorized," and according to Deathrealm, "*Stranger by Night* demonstrates that the Hot Blood books haven't lost their steam in any sense of the phrase." Praise for the Hot Blood series "Read Hot Blood late at night when the wind is blowing hard and the moon is full." —Playboy "Outstanding . . . A daring combination of sex and terror." —Cemetery Dance "Will appeal to your

every kink.” —Locus “Seek out this one (or its predecessors) for some naughty fun.” —Booklovers

This new volume examines both fundamental and applied aspects of UV and EB chemistries in several areas, particularly coatings materials. It offers an overall perspective of the subject, and provides direct insight into the future of this rapidly developing field. Its 36 chapters are divided into six sections, covering photoinitiators, novel radiation photocurable systems, properties of radiation-cured

materials, photodegradation of radiation-cured films, radiation curing of cationic polymerization, laser-initiated polymerization, and high-energy radiation curing. A brief summary appears at the beginning of each section.

### **The Anti-Cancer Food and Supplement Guide**

### **A Slice of the Pie**

This book constitutes the refereed proceedings of the 9th European Conference on Artificial Intelligence in Music, Sound, Art and Design, EvoMUSART 2020, held as part of Evo\*2020, in Seville, Spain, in April 2020, co-located with the Evo\*2020 events EuroGP, EvoCOP and EvoApplications. The 15 revised full papers presented were carefully reviewed and selected from 31 submissions. The papers cover a wide spectrum of topics and application areas, including generative approaches to music and visual art, deep learning, and architecture.

### **The Absolute Sound**

This book follows the lives and careers of two Jewish boxers, Max Baer and Barney Ross. Fighting in the 1920s and 1930s when anti-Semitism was rampant, American Jews found symbols of strength and courage in these two world champions. This book provides a vivid picture of Baer and Ross as they fought opponents in the ring and prejudice outside it.

With vivid photography, and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top

of the structure that symbolize the formless world of pure knowledge and perfection.

Handbook of Low Carbon Concrete brings together the latest breakthroughs in the design, production, and application of low carbon concrete. In this handbook, the editors and contributors have paid extra attention to the emissions generated by coarse aggregates, emissions due to fine aggregates, and emissions due to cement, fly ash, GGBFS, and admixtures. In addition, the book provides expert coverage on emissions due to concrete batching, transport and placement, and emissions generated by typical commercially produced concretes. Includes the tools and methods for reducing the emissions of greenhouse gases Explores technologies, such as carbon capture, storage, and substitute cements Provides essential data that helps determine the unique factors involved in designing large, new green cement plants

How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he

lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. *A Slice of the Pie* will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

## **Italian Literature in North America**

"Josh Rosenthal is a record man's record man. He is also a musician's record man. He is in the line of Samuel Charters and Harry Smith. In this age where we have access to everything and know the value of nothing, musicians need people like Josh to hear them when no one else can." T Bone Burnett Grammy-nominated producer and Tompkins Square label founder Josh Rosenthal presents his first book, *The Record Store of the Mind*. Part memoir, part "music criticism," the author ruminates over unsung musical heroes, reflects on thirty years of toil and fandom in the music business, and shamelessly lists some of the LPs in his record collection. Crackling with insightful untold stories, *The Record Store of the Mind* will surely delight and inspire passionate music lovers especially those who have spent way too many hours in record stores. Celebrating ten years in 2015, Rosenthal's San Francisco-based independent record label Tompkins Square has received seven Grammy nominations and wide acclaim for its diverse catalog of new and archival recordings.

### **Borobudur: Majestic Mysterious Magnificent**

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating

the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methylations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

NOW AN EBOOK FOR THE FIRST TIME For fifty years and more than two thousand shows, the Grateful Dead have been earning the "deadication" of more than a million fans. Along the way, Deadheads have built an original and authentic American subculture, with vivid jargon and rich love, and its own legends, myths, and spirituality. Skeleton Key: A Dictionary for Deadheads is the first map of what Jerry Garcia calls "the Grateful Dead outback," as seen through the eyes of the faithful, friends, and family, including Bill Walton, Elvis Costello, Tipper Gore, Al Franken, Bob Bralove, Dick Latvala, Blair Jackson, David Gans, Bruce Hornsby, Rob Wasserman, and Robert Hunter. Skeleton Key puts you on the Merry Pranksters' bus behind the real Cowboy Neal, uncovers the origins of Cherry Garcia, follows the

dancing bear on its trip from psychedelic artifact to trademarked icon, and unlocks the Dead's own tape vault. Informative reading for the new fan or the most grizzled "tourhead," Skeleton Key shines throughout with Deadheads' own stories, wit, insiders' knowledge, sincere appreciation of the music of the "band beyond description," and the diverse and soulful culture it inspires.

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation

process. Ming, James E. Goddard Space Flight Center
