#### How to Read a Book

With half a million copies in print, *How to Read a Book* is the best and most successful guide to reading comprehension for the general reader, completely rewritten and updated with new material. A CNN Book of the Week: "Explains not just why we should read books, but how we should read them. It's masterfully done." -Farheed Zakaria Originally published in 1940, this book is a rare phenomenon, a living classic that introduces and elucidates the various levels of reading and how to achieve them—from elementary reading, through systematic skimming and inspectional reading, to speed reading. Readers will learn when and how to "judge a book by its cover," and also how to X-ray it, read critically, and extract the author's message from the text. Also included is instruction in the different techniques that work best for reading particular genres, such as practical books, imaginative literature, plays, poetry, history, science and mathematics, philosophy and social science works. Finally, the authors offer a recommended reading list and supply reading tests you can use measure your own progress in reading skills, comprehension, and speed.

#### Aim High, Grade 3

"This book objectively challenges the link between ethics and our everyday activities. It takes ethics out of philosophy departments and puts it squarely onto the streets, into the villages, towns and cities, and connects ethics to all life on

Earth. The book's primary audience is teacher trainers, college instructors, university professors and others responsible for professional development in education. It is also aimed at environmental educators who want to take their teaching more deeply into the questions that lie at the heart of sustainable living."--pub. desc.

Howard Zehr is the father of Restorative Justice and is known worldwide for his pioneering work in transforming understandings of justice. Here he proposes workable principles and practices for making Restorative Justice possible in this revised and updated edition of his bestselling, seminal book on the movement. (The original edition has sold more than 110,000 copies.) Restorative Justice, with its emphasis on identifying the justice needs of everyone involved in a crime, is a worldwide movement of growing influence that is helping victims and communities heal, while holding criminals accountable for their actions. This is not soft-on-crime, feel-good philosophy, but rather a concrete effort to bring justice and healing to everyone involved in a crime. In *The Little Book of Restorative Justice*, Zehr first explores how restorative justice is different from criminal justice. Then, before letting those appealing observations drift out of reach into theoretical space, Zehr presents Restorative Justice practices. Zehr undertakes a massive and complex subject and puts it in graspable form, without reducing or trivializing it. This resource is also suitable for academic classes and workshops, for conferences and trainings, as well as for the layperson interested in understanding this innovative and influential movement.

In Chinese, peng you means friend. But in any language, all Anna knows for certain is that friendship is complicated. When Anna needs company, she turns to her books. Whether traveling through *A Wrinkle in Time*, or peering over *My Side of the Mountain*, books provide what real life cannot—constant companionship and insight into her changing world. Books, however, can't tell Anna how to find a true friend. She'll have to discover that on her own. In the tradition of classics like Maud Hart Lovelace's *Betsy-Tacy* books and Eleanor Estes' *One Hundred Dresses*, this novel subtly explores what it takes to make friends and what it means to be one.

While touring through the unusual territory that is game design, this book gives the reader one hundred of these lenses - one hundred sets of insightful questions to ask yourself that will help make your game better. These lenses are gathered from fields as diverse as psychology, architecture, music, visual design, film, software engineering, theme park design, mathematics, writing, puzzle design, and anthropology. In this 21st century, technological and social changes have never been as rapid as before, and educative practices must evolve and innovate to keep up. What is being done by educators today to prepare future global citizens? What are the skills and competencies that will be required by our students? What changes in how we approach education might need to be made? This book presents a modern focus on some significant issues in teaching, learning, and research that are valuable in preparing students for the 21st century. The book discusses these issues in four sections. The first section presents contemporary, innovative curriculum and pedagogical practices that are relevant for the 21st century. This also includes how social networking has an integrated role within current educative practice. The next section then explores issues and current research around motivation and engagement, and how these are changing in this era of technological and social change. The third section presents debates around inclusion and social contexts, both global and local. Finally, the fourth section explores current discourses in regard to internationalisation and globalisation and how these are being considered in educational research. The book is an important representation of some of the work currently being done for these rapidly changing times. It will appeal to academics, researchers, teacher educators, educational administrators, teachers and anyone interested in preparing students for a modern and globally interconnected world.

"Texts must be interesting enough for students to want to read them in their own language. Otherwise, how can we expect students to want to read them in English?" This is the authors' golden rule when they choose texts and topics for every level of American English File. It ensures you get material that learners will enjoy reading and will want to talk about. Texts such as "Could you live without money?" really help to generate opinion and discussion. They create a desire to communicate. Having created the desire, American English File then helps you to develop learners' communication skills. One way it does this is with a strong focus on pronunciation. Research shows that poor pronunciation is a major contributor to breakdowns in communication (Jennifer Jenkins: The Phonology of English as an International Language). American English File integrates pronunciation into every lesson - the "little and often" approach. But that's not all. The unique English File Sounds Chart puts a picture to each sound in the phonetic alphabet, so learners find it easier to remember the sounds and, ultimately, improve their pronunciation.
