Pest on the Run

Critics warn that corporate leaders have too much influence over American politics. Mark Mizruchi worries they exert too little. American CEOs have abdicated their civic responsibilities in helping the government address national challenges, with grave consequences for society. A sobering assessment of the dissolution of America's business class.

Engineering Mathematics Through Applications

This multicultural reader for first-year composition courses poses critical questions about American culture and the construction of identity. Beyond Borders includes both conventional writing (essays, poems, and short fiction) and less conventional works (photographs, advertisements, graphic novels, and maps). The thematically arranged readings raise questions and ideas about both individual and group identity. The interactive format shows students how to read and write by freely crossing the borders between writer and reader, student and critic, and consumer and producer. The Second Edition features material on the writing process, with writing activities throughout, and a focus on research and argument.

'The godfather of Australian crime fiction.' Casinos are not to Cliff Hardy's liking, nor is wearing a suit and tie, which is why he turns down the job of head of security at a new Sydney gambling establishment. However, when his friend Scott Galvani takes the job and is then murdered, Hardy feels bound to investigate in the face of police indifference. He takes the security job, meets the attractive but unpredictable Vita Drewe, and adds to his list of enemies. Galvani's killers are closer to home than Hardy anticipated and his life and his relationship are on the line.

Pachinko, a game played by over 30 million Japanese, is synonymous with glaring lights, mind-rattling noise and smoke-choked parlors. To the uninitiated, the game's phenomenal popularity is nothing less than an enigma. The unofficial truth is

that pachinko is one of Japan's biggest forms of gambling. For non-Japanese, the hush surrounding this money-making aspect has contributed to misunderstandings about the game. Now, with *Winning Pachinko* Eric Sedensky opens parlor doors to the English-speaking world and guides readers through the essentials of play - where to buy balls, how to select a machine, and most importantly, how and where to claim one's booty of cool cash. A glossary of pachinko terms, useful diagrams, and photographs accompany the text.

Isaac Asimov's death on April 6, 1992, was a great loss to the world of literary science and freethought. The prolific author's vision is unmatched today, and his pointed honesty shines through in *The Roving Mind*, now reissued in this special tribute edition. This collection of essays is wide-ranging, reflecting Asimov's extraordinary skill in disseminating knowledge from across the spectrum of human thought. Some of the areas explored in this volume of 62 essays include creationism, pseudoscience, censorship, population, philosophy of science, transportation, computers and corporations of the future, and astronomy. His predictions about cloning which has only recently become the topic of public debate the theory of technophobia, and other scientific developments are astounding. In a lighter tone, Asimov includes several personal stories from his life including thoughts on his style of writing and memories of family in younger days. With tributes by Arthur C. Clarke, L. Sprague de Camp, Harlan Ellison, Kendrick Frazier, Martin Gardner, Donald Goldsmith, Stephen Jay Gould, E. C. Krupp, Frederik Pohl, and Carl Sagan. The collection is very readable and thus is accessible to a wide audience of nonscientists as well as scientists. Both adults and young people should find it interesting. -*The Physics Teacher*. . . Asimov's best include pieces detailing the present mysteries of solar astronomy, removing the mythology of cloning (backyard gardeners do it all the time), and pointing out deficiencies in the supposed chemistry expertise of Sherlock Holmes. -*Nature*

This is the most talked-about book on the Blackjack scene. This book has sold more copies since its initial release than any other gaming book. Prior to this new edition there was no foolproof way to learn how to play Blackjack accurately. This is the only Blackjack book that is easy to understand and completely accurate, written for the beginner or for the expert player. "Playing Blackjack as a Business" was written by a successful professional Blackjack player. The author has probably spent more time playing Blackjack, more time in the casinos, and more time in research, than have all of the others combined who have written Blackjack books or devised Blackjack systems. The book features a new Basic Strategy for one deck, the first accurate Strategy to be published for four decks, and four easy-to-learn Count Strategies including the Reverse Point Count Strategy, which is the most accurate and most powerful strategy that has ever been published. The strategies were devised from computer runs by Julian H. Braun of IBM Corporation, long recognized as the world's most

capable man in this field.

This book offers a variety of strategies and tactics that financial institutions can employ to manage their exposure to this significant business risk. It is the first book to comprehensively address the many problems caused by the widespread and naïve use of spreadsheets in organisations. The book explores the notion that users do not take into account that through their use of a spreadsheet to solve a problem, they are deploying a complex software application. Technology can be faulty, but also spreadsheets are used, misused, abused and through the non-adoption of any of the disciplines of software

engineering. The apparently simple task of creating a spreadsheet, for example, to calculate the cost of building a garden wall will be frequently performed incorrectly unless independent and comprehensive testing has taken place. Given that most financial spreadsheets are significantly more complex than this, it is essential that spreadsheet users come to understand how careful they must be in reaching decisions that are supported by spreadsheet models. The purpose of the book is to lay bare the various risks of using spreadsheets, supported by a comprehensive summary of the well-established academic and commercial research on the subject. The book will include some simple exercises for the reader to perform which will support the truth of the research being reported. The book outlines a set of strategies and tactics which can be put in place to control the risks of using spreadsheets, and introduces the emerging discipline of spreadsheet engineering. It considers technological solutions to spreadsheet risk, looking also at the alternatives to using spreadsheets.

Protect Yourself from Casino Cheats! Bill Zender, a highly paid consultant to the gambling industry, is widely respected as an expert on game protection. Although cheating is rare in today's modern, highly-regulated casinos, the proliferation of casinos throughout the U.S. and around the world has created new opportunities for crooked dealers, and new dangers for honest players. Never before has any casino insider revealed the hidden tricks of the trade of the scam artists. Zender describes in vivid detail how slick blackjack dealers can rob you. None of this information has ever been made available to the general public in the past. The cheats aren't talking, and the casinos rarely disclose this sensitive information because they don't want to scare players away from their games. With blackjack now being dealt on riverboats, Indian reservations, and vacation resorts, as well as in high stakes private games all over the country, the time has come for players to know how to recognize cheaters and how to protect themselves.

Paddy Pest is a hero to himself and others. You'd better believe it. The man has been fighting crime all his life and although he does have his shortcomings, he does try hard. Bless his heart, he really tries. And now, someone has put out a contract on him. Is there no justice? Luckily for Paddy, his wing-person is the exquisite barmaid, Stormy Weathers, his longtime girlfriend and undercover operative. There is no more potent a force in the fight against corruption and wrongdoing, and the supersleuth is the favored go-to man for any number of international agencies. Admittedly, when the chips are down, they are always prepared to disown him. Paddy's relationship with Australia's unmarried prime minister has tongues wagging, but in times of trouble, she wouldn't have anyone else by her side. And his relationship with Frankie Hogan, the bordello queen? Well, that's another story. Paddy's tales of intrigue are unbelievable and even Maxwell Smart would be impressed. He makes that gentleman look like a genius.

"At times we all feel frustrated, stressed, or out of control. What if you could be at your best when your challenges are on the rise? Well, you can. Be the Hero introduces us to the way of the "Everyday Hero" and shows how to turn self-defeating thoughts and behaviors into heroic actions. All day long, without even realizing it, we tell ourselves dozens of stories—about other people, our situations, and ourselves—stories that shape our emotions and behavior. These stories are so powerful, they make us think and act like either a hero or a victim. Be the Hero shows you how to choose the stories that lead to personal and professional success. In the tradition of the best storytellers, Noah Blumenthal weaves a tale of a young professional's journey from victim to hero, one that is both captivating and profound. The powerful resources at the end of the book, including a hero tip of the week, smart cards, manager tip sheets, and more, will help you make your hero stories stick "
