Higher Education in the Era of the Fourth Industrial Revolution

Aucune information saisie

Education, Learning, Training

This handbook brings together and promotes research on the area of vocational education and training (VET). It analyzes current and future economic and labor market trends and relates these to likely implications for vocational education and training. It questions how VET engages with the growing power of human development approaches and with the sustainable development agenda. Equity and inclusion are discussed in a range of ways by the authors and the consideration of the construction of these terms is an important element of the handbook. It further addresses both the overall notion of system reform, at different scales, and what is known about particular technologies of systems reform across a variety of settings. Vocational learning and VET teacher/trainer education are discussed from a comparative perspective. National and comparative experiences are also shared on questions of equity and efficiency in funding in terms of those that fund and are funded, and for a range of funding methodologies. As well as reviewing existing gaps, this handbook is looking forward in identifying promising new directions in research and environment. Areas

covered: The Changing World of Work | Editors: Margarita Pavlova and Salim Akoojee Skills for Sustainable Human Development | Editor: Lesley Powell Planning and Reforming Skills Systems | Editor: Robert Palmer Private Training Markets | Editors: Michael Gessler, Larissa Freund and Susanne Peters Vocational Learning | Editors: Karen Evans and Natasha Kersh Competence and Excellence | Editor: Kirby Barrick Measuring Learning and Instructional Performance | Editor: Esther Winther Supporting Learners | Editor: Joy Papier VET Teacher/Trainer Education | Editor: Volker Wedekind

OECD Reviews of Vocational Education and Training: A Learning for Jobs Review of China 2010

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

Life Orientation

This book focuses on understandings of higher education in relation to notions of decoloniality and decolonization in southern Africa. The volume draws on a range of case studies in multiple politico-cultural contexts on the African continent, and examines some of the challenges to be overcome in order to achieve education for decolonization and decoloniality. Acknowledging that patterns of exclusion, inequality and injustice are still prevalent in the African higher education landscape, the editors and contributors proffer bold attempts at democratizing education and examine how to cultivate just, equal and diverse pedagogical relations. Featuring case studies from South Africa, Zambia, Malawi, and Zimbabwe, the authors and editors examine how higher education can be further democratized and transformed along the lines of equality, liberty and recognition of diversity. This hopeful and bold collection will be of interest to scholars of decoloniality and decolonization in higher education, as well as higher education in southern Africa more specifically.

Reflective Public Administration

This book constitutes the refereed proceedings of the 47th Annual Conference of the Southern African Computer Lecturers' Association on ICT Education, SACLA 2018, held in Gordon's Bay, South Africa, in June 2018. The 23 revised full papers presented together with an extended abstract of a keynote paper were carefully reviewed and selected from 79 submissions. The papers are organized in topical sections: playfulness, media and classrooms, academia and careers, teaching programming, adaptation and learning, teamwork and projects, learning systems, topic teaching.

The SAGE Handbook of Philosophy of Education

This book provides an authoritative, yet accessible guide to the Philosophy of Education, its scope, its key thinkers and movements, and its potential contribution

to a range of educational concerns. The text offers a balanced view of three key dimensions: first, in giving an equal weight to different styles and modes of philosophy; second, by including past and present perspectives on philosophy of education; and third, in covering both the general "perennial" issues in philosophy and issues of more contemporary concern. Section one of the book exemplifies different styles of philosophy, paying attention to the contemporary debates as to the nature, possibilities and limitations of these different approaches to philosophy of education. Section two is devoted to particular thinkers of the past, and more general coverage of the history of philosophy of education. Section three is dedicated to contemporary philosophic thought on education, providing the basis and reference point for an exploration of contemporary issues. The handbook is designed primarily to be useful to students studying the field of philosophy of education, in the context of the study of educational foundations or theory. But it is also designed to be of use to practising teachers who wish to gain easy access to current philosophical thinking on particular contemporary educational issues, and to educationalists of all types who want a succinct guide to questions relating to the nature, the history, and the current state of the art of philosophy of education. Corruption in Higher Education

Experts explore current theory and practice in the application of digitally enabled open networked social models to international development. The emergence of open networked models made possible by digital technology has the potential to transform international development. Open network structures allow people to come together to share information, organize, and collaborate. Open development harnesses this power, to create new organizational forms and improve people's lives; it is not only an agenda for research and practice but also a statement about how to approach international development. In this volume, experts explore a variety of applications of openness, addressing challenges as well as opportunities. Open development requires new theoretical tools that focus on real world problems, consider a variety of solutions, and recognize the complexity of local contexts. After exploring the new theoretical terrain, the book describes a range of cases in which open models address such specific development issues as biotechnology research, improving education, and access to scholarly publications. Contributors then examine tensions between open models and existing structures, including struggles over privacy, intellectual property, and implementation. Finally, contributors offer broader conceptual perspectives, considering processes of social construction, knowledge management, and the role of individual intent in the development and outcomes of social models. Contributors Carla Bonina, Ineke Buskens, Leslie Chan, Abdallah Daar, Jeremy de Beer, Mark Graham, Eve Gray, Anita Gurumurthy, Havard Haarstad, Blane Harvey, Myra Khan, Melissa Loudon, Aaron K. Martin, Hassan Masum, Chidi Oguamanam, Katherine M. A. Reilly, Ulrike Rivett, Karl Schroeder, Parminder Jeet Singh, Matthew L. Smith, Marshall S. Smith Copublished with the International Development Research Centre of Canada (IDRC)

Higher Education Admissions Practices

Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different

aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things - whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

Measuring Quality

Globalization has fueled the growth of entrepreneurship. Starting a new venture involves risk taking as well as capital investment. This book delves into all the varied aspects of entrepreneurship. The impact of economic policies, finances, opportunity and capacity are some of the topics covered in this text. It will prove beneficial to students, scholars, professionals, aspiring entrepreneurs, etc.

Entrepreneurship and Business Management

First Steps in Journal Article Writing

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Introduction to Engineering Technology, Eighth Edition, explains the responsibilities of technicians and technologists in the dynamic world of engineering. The basic tools of engineering technology, including problem solving, calculator skills, conversion of units, geometry, computer skills, and technical reporting, are explained. Mathematical concepts are presented in a moderately-paced manner, including practical, worked-out examples for the engineering calculator. In addition to developing your skills in algebra, trigonometry, and geometry, this popular text also helps you to understand the broad spectrum of today's technologies.

Education Policy Reform Trends in G20 Members

This book offers a conceptual re-think of how university community engagement functions as a lifelong learning resource for communities. While having a specific focus on the South African context, it has important implications for other universities which are concerned with their communities, and makes a compelling argument for the university as a public good, in spite of current trends towards marketization and commodification of higher education. The book draws on a theoretical framework of capabilities, asset-based community development, and the adult learning concept of dialogue, to propose a model whereby the boundary walls of the university become metaphorically 'porous', so that community

members feel free to interact with the university as equal members of society. A historical outline of African universities is provided, as well as an exploration of the evolution of terms for community engagement, service learning and learning cities; and an examination of the policy and practice implications for the ideological model of a porous university.

Universities, Employability and Human Development

This book constitutes the refereed proceedings of the 48th Annual Conference of the Southern African Computer Lecturers' Association on ICT Education, SACLA 2019, held in Northern Drakensberg, South Africa, in July 2019. The 16 revised full papers presented were carefully reviewed and selected from 57 submissions. The papers are organized in following topical sections: computer programming education; system security education; software engineering education; education of post-graduate research-students; our students, our profession.

Strategic Marketing of Higher Education in Africa

The International Journal for Research in Vocational Education and Training (IJRVET) is a double blind peer-reviewed journal for VET-related research. IJRVET is the official journal of VETNET (founded in 1996), the European Research Network in Vocational Education and Training (umbrella organisation: EERA European Educational Research Association), supported by CINTERFOR (founded in 1963), the Centro Interamericano para el Desarrollo del Conocimiento en la Formación Profesional / Inter-American Centre for Knowledge Development in Vocational Training (a technical service of OIT Organización Internacional del Trabajo / ILO International Labour Organization) and IRNVET (founded in 2013), the International Research Network in Vocational Education and Training (umbrella organisation: WERA World Education Research Association). All articles are indexed in SCOPUS. The Yearbook includes all articles published in 2019.

Higher Education Pathways

The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a group, protect their interests, and find solutions to global problems.

Invited Lectures from the 13th International Congress on Mathematical Education

The book makes a significant contribution to critical higher education studies, specifically to graduate employability research and to capabilities and education research. The book moves beyond the simplistic conception of alleged 'gaps' in graduate skills and 'mismatches' between employers and universities, and instead provides an innovative multi-dimensional and intersectional human capabilities

conceptualisation of graduate employability. The book challenges an individualised notion of employability, instead locating employability issues in social and economic conditions, and argues that employability choices cannot be divorced from inequality. Qualitative and quantitative data from multiple case-study universities in South Africa are used to explore the perceptions and experiences of diverse students, lecturers, support officers and employers, regarding what each university is doing, or should be doing, to enhance graduate economic opportunities and contribute to inclusive development. The book will be highly relevant to students, scholars and researchers in the fields of education and sociology, particularly those with an interest in graduate employability.

Open and Distance Education in Asia, Africa and the Middle East

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Shadow Libraries

This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series, following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online, open and distance education, this book will prove particularly valuable for policy-makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

Struggling to Make the Grade: A Review of the Causes and

Consequences of the Weak Outcomes of South Africa's Education System

This book was developed in order to deliver a unit standards-based curriculum that is in line with the National Qualifications-Framework (NQF).

Ethics in higher education : values-driven leaders for the future

This food-lover's delight presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.

Shaping the Future of South Africa's Youth

This book provides a path for resolving challenges related to access, diversity, equity, and other issues facing higher education admissions. It illuminates current higher education admissions practices in a global context, highlighting common obstacles. The chapters outline decision-making models used in college admissions, details those assessments commonly employed in admissions, and provides innovative perspectives on the future of admissions. The book's multidisciplinary approach defines much-needed changes in admissions brought about by shifts in the makeup of student populations and in higher education itself. Rationales for moving away from traditional assessments used in admissions and expanding the criteria used to ensure a student's academic success are discussed. Readers will come away with an understanding of the current issues, philosophies, and historical circumstances facing higher education admissions across the globe and will be equipped to contemplate and react to future possibilities and opportunities.

Change Management in TVET Colleges

The book presents the Invited Lectures given at 13th International Congress on Mathematical Education (ICME-13). ICME-13 took place from 24th- 31st July 2016 at the University of Hamburg in Hamburg (Germany). The congress was hosted by the Society of Didactics of Mathematics (Gesellschaft für Didaktik der Mathematik - GDM) and took place under the auspices of the International Commission on Mathematical Instruction (ICMI). ICME-13 - the biggest ICME so far - brought together about 3500 mathematics educators from 105 countries, additionally 250 teachers from German speaking countries met for specific activities. The scholars came together to share their work on the improvement of mathematics education at all educational levels.. The papers present the work of prominent mathematics educators from all over the globe and give insight into the current discussion in mathematics education. The Invited Lectures cover a wide spectrum of topics, themes and issues and aim to give direction to future research towards educational improvement in the teaching and learning of mathematics education. This book is of particular interest to researchers, teachers and curriculum

developers in mathematics education.

Organizational Success Through Effective Human Resources Management

This book deals with the relevance of recognition and validation of non-formal and informal learning education and training, the workplace and society. In an increasing number of countries, it is at the top of the policy and research agenda ranking among the possible ways to redress the glaring lack of relevant academic and vocational qualifications and to promote the development of competences and certification procedures which recognise different types of learning, including formal, non-formal and informal learning. The aim of the book is therefore to present and share experience, expertise and lessons in such a way that enables its effective and immediate use across the full spectrum of country contexts, whether in the developing or developed world. It examines the importance of meeting institutional and political requirements that give genuine value to the recognition of non-formal and informal learning; it shows why recognition is important and clarifies its usefulness and the role it serves in education, working life and voluntary work; it emphasises the importance of the coordination, interests, motivations, trust and acceptance by all stakeholders. The volume is also premised on an understanding of a learning society, in which all social and cultural groups, irrespective of gender, race, social class, ethnicity, mental health difficulties are entitled to quality learning throughout their lives. Overall the thrust is to see the importance of recognising non-formal and informal learning as part of the larger movement for re-directing education and training for change. This change is one that builds on an equitable society and economy and on sustainable development principles and values such as respect for others, respect for difference and diversity, exploration and dialogue.

Through the Eyes of an African Chef

This review assesses the main challenges facing the vocational education and training system in China and presents a package of policy recommendations.

ICT Education

While South Africa has made significant improvements in basic and tertiary education enrollment, the country still suffers from significant challenges in the quality of educational achievement by almost any international metric. The paper finds that money is clearly not the main issue since the South Africa's education budget is comparable to OECD countries as a percent of GDP and exceeds that of most peer sub-Saharan African countries in per capita terms. The main explanatory factors are complex and multifaceted, and are associated with insufficient subject knowledge of some teachers, history, race, language, geographic location, and socio-economic status. Low educational achievement contributes to low productivity growth, and high levels of poverty, unemployment, and inequality. Drawing on the literature, the paper sketches some policy considerations to guide the debate on what works and what does not.

Education for Decoloniality and Decolonisation in Africa

Current challenges, emerging issues, and HRM innovations that managers at all levels must understand and apply to help their organizations succeed in a rapidly changing work environment.

Handbook of Vocational Education and Training

The Senior Training Officer Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: principles of curriculum development and the evaluation of training materials; training methods in staff development; principles of learning and instruction; classroom practices; preparing written material; and other related areas.

IJRJET International Journal for Research in Vocational Education and Training

Strategic Marketing of Higher Education in Africa explores higher education marketing themes along the lines of understanding higher education markets, university branding and international marketing strategies, digital marketing, and student choice-making. The Higher Education landscape around the world is changing. There is global competition for students' enrolments, universities are competing within their home market as well as in the international market, and as government funding for public universities is reducing there is pressure on universities to seek additional income by increasing their student enrolment. African universities are not an exception in this competitive market. This book is unique in providing a composite overview of strategic marketing and brand communications of higher education institutions in Africa. It recognises that there is a growing need for universities to understand the stakeholders and develop strategies on how best to engage with them effectively. Highlighting the unique characteristics, nature, and challenges of African universities, this book explores the marketisation strategies of African universities, with focus on the strategic digital marketing and brand management. The book provides significant theoretical and marketing practice implications for academics, higher-education administrators, and practitioners on how best to market higher education in Africa and reach out to prospective students. International practitioners aiming to market to Africans and start a partnership with an African university will also find this relevant in understanding the dynamics of the African market.

Vocational Education and Training in Sub-Saharan Africa

Reading the past, writing the future

In Education, Learning, Training: Critical Issues for Development, renowned scholars and practitioners examine shifts in global education policy and practice over the last 50 years.

Senior Training Officer

This concise and practical volume guides the reader through the process of article writing for submission to scholarly journals. It provides helpful examples and clarification of the steps involved and will prove to be an invaluable resource for both novice and experienced researchers. Chapters include selecting a topic, proposal design, research design and methodological considerations, submitting an article for publication and the role of critical readers.

University Community Engagement and Lifelong Learning

G20 members bring together the world's major advanced and emerging economies, as well as the European Union. Together they represent some 90% of global GDP, 80% of global trade and two-thirds of the world's population. In recognition of educational development as a key driver of economic development, the G20 members have put education reform high on their policy agenda in order to meet the challenges and embrace the opportunities ahead. Their experiences and lessons in education reform will not only showcase the global trend of education development, but also will provide valuable reference and inspiration for undertaking education reform to advance national development in China as well as other countries. This book documents recent policy reform in G20 members' systems, showcases the global trends in education policy, serves as a valuable reference tool and also provide inspiration for undertaking education reform to advance development in related countries.

Trends in E-learning

South Africa has made huge gains in ensuring universal enrolment for children at school, and in restructuring and recapitalising the FET college sector. However, some three million young people are not in education, employment or training and the country faces serious challenges in providing its youth with the pathways and support they need to transition successfully into a differentiated system of post-school education and training. Across nine evidence-based chapters, 17 authors offer a succinct overview of the different facets of post-school provision in South Africa. These include an analysis of the impact of the national qualifications system on occupational training, the impact of youth unemployment, the capacity of the post-school system to absorb larger numbers of young people, the relationship between universities and FET colleges, the need for more strategic public and private investment in skills development, and a youth perspective on education and training policy. The authors have a number of recommendations for improving the alignment between schooling, further education and training, and university education - interventions that could shape the future of our youth.

Global Perspectives on Recognising Non-formal and Informal Learning

The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions.

The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on:

- The political economy of TVET types in different countries which, by comparison, illuminate the South African case;
- A periodisation of government interventions in the TVET sector over the last three decades;
- The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service;
- The halting evolution of collegial relationships between college lecturers towards higher collegiality;
- Employer expectations of college graduates and how colleges are responding; and
- An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape.

This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

ICT Education

Corruption in Higher Education: Global Challenges and Responses discusses the magnitude of this phenomenon, its complexity, and the actions that are needed to mitigate it.

Open Development

Current State of Open Educational Resources in the “Belt and Road” Countries

This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands – shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the

frontline of higher education.

Getting Skills Right Community Education and Training in South Africa

This book presents the current state of Open Educational Resources (OER) within the countries covered by the China's Belt and Road Initiative. The authors describe eight aspects of OER development in their countries: infrastructure, policy, resources, open license, curriculum and teaching methodology, outcome, stakeholders and impact. This book also conducts a comparative study between those countries to identify the OER gaps in the Belt and Road countries. It then offers valuable insights and recommendations for several stakeholders, including policy makers and educators, wishing to integrate open educational resources into educational processes, as well as for those involved in inter-regional open educational resources cooperation.

Introduction to Engineering Technology

How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several "open" publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Contributors Balázs Bodó, Laura Czerniewicz, Miroslaw Filiciak, Mariana Fossatti, Jorge Gemetto, Eve Gray, Evelin Heidel, Joe Karaganis, Lawrence Liang, Pedro Mizukami, Jhessica Reia, Alek Tarkowski

Twenty Years of Education Transformation in Gauteng 1994 to 2014

Adult learning systems play a crucial role in helping people adapt to the changing

world of work and develop relevant skills. Community Education and Training has been brought forward as a possible way to foster adult learning in South Africa, especially among disadvantaged groups. South Africa
