Economics, Global Edition

Real, current macroeconomic events connected to the theory The new fourth edition of Blanchard's respected Macroeconomics text has been substantially revised to account for the impact of the GFC on the Australasian Economy and the many issues it raises. Thus, in addition to a first discussion of the crisis in Chapter 1 and numerous boxes and discussions throughout the book, we have brought forward the chapter on the GFC to Chapter 9. Macroeconomics is the only intermediate resource with a truly Australasian focus, demonstrating economic ideas and issues with hundreds of local and international examples. This comprehensive resource presents an integrated view of macroeconomics, drawing on the implications of equilibrium conditions in three sets of markets: the goods market, the financial markets and the labour market.

Real examples. Real companies. Real business decisions. Covering the core economics principles and providing engaging, relevant examples within just nineteen Chapters, Hubbard Essentials of Economics is the perfect teaching and learning resource for a one semester unit. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first year economics ask themselves are: "Why am I here?" and "Will I ever use this?" Hubbard Essentials of Economics answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.
