Loretto Manual

Manual of Historico-critical Introduction to the Canonical Scriptures of the Old Testament

A Manual Greek Lexicon of the New Testament by George Abbott-Smith, first published in 1922, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

A Manual of Catholic Theology

A Manual of Church History Translated from the German by W. G. T. Shedd. Ancient Church History, comprising the first six centuries

A Complete Manual of Canon Law: Church discipline

THE word "Theology" means the Science of God. This science has God not only for its subject, but also for its source and its object; hence the Divine character of Theology cannot better be described than by the old formula: "Theology teaches about God, is taught by God, and leads to God." Theology may be taken objectively as doctrine, or subjectively as knowledge. But it is not every knowledge of Divine doctrine, especially not the mere apprehension of it, that is called Theology. The term is restricted to scientific knowledge; and consequently Theology, in its technical sense, is the scientific exposition of the doctrine concerning God and things Divine. Aeterna Press
