He undergoes a brain operation which increases his intelligence. Yet such an operation begs many questions--can Charlie's emotional development keep pace with the intellectual? How do the psychiatrists and psychologists view Charlie--as a man or as the subject of an experiment like the mouse, Algernon? And the biggest question of all--will the operation be successful?

"You see, there is safety in simplicity in a life of simple peace, where the electricity doesn't dance across the backs of my eyelids, and the sparks don't slither over my consciousness. Only asinine peace, where my paintings don't seem to paint themselves, leaving me with terrible feelings of premonition and a chill beneath my fingernails." Seraph Black used to think that she was prepared for anything. She could last days without eating and she always walked away from the violent altercations with her father relatively unharmed. She survived working at the club and the drive to school every day in her mother's rust-bucket of a car but it all changed when Noah and Cabe came bulldozing into her life, careless of the precious secrets they picked apart in their quest to take over her world. She was even less prepared for the mysterious Miro and Silas, and nothing could have prepared her for the bond. The connection. The reason for it all. Someone wanted her to stay away from her new friends, but she wasn't willing to do that. Everyone had secrets. She wanted to know theirs. They wanted to own hers. And the stalker? He seemed to know everything already. This is a full, 100,000 word novel. Book 1 of the Seraph Black series.
